OLEVS 6689

OLEVS Model 6689 Automatic Mechanical Watch Instruction Manual

Model: 6689

1. INTRODUCTION

Thank you for choosing the OLEVS Model 6689 Automatic Mechanical Watch. This timepiece combines classic mechanical craftsmanship with modern design, featuring a skeleton tourbillon, moon phase, and second time zone display. This manual provides essential information for the proper setup, operation, and maintenance of your watch to ensure its longevity and accurate performance.

2. SETUP

2.1 Winding the Watch

Your OLEVS Model 6689 watch is an automatic mechanical timepiece. It is powered by the natural motion of your wrist. For initial setup or if the watch has stopped due to inactivity, it can be manually wound.

- **Manual Winding:** Rotate the crown clockwise approximately 30-40 times. This will provide sufficient power to start the watch and allow the automatic winding mechanism to take over with regular wear.
- **Automatic Winding:** When worn regularly (approximately 8-10 hours a day), the watch will self-wind through the movement of your arm. No battery is required.

2.2 Setting the Time

To set the time:

1. Pull the crown out to the outermost position.
 2. Rotate the crown to move the hands clockwise or counter-clockwise until the desired time is displayed.
 3. Push the crown back into its original position to engage the movement.
-

3. OPERATING FEATURES

3.1 Dial Display and Functions

The OLEVS Model 6689 features a unique dial with multiple functions:

- **Skeleton Tourbillon:** The visible mechanical movement at the 6 o'clock position showcases the intricate workings of the watch.
- **Moon Phase Display:** A subdial with sun and moon images indicates the current phase of the moon.
- **Second Time Zone:** Another subdial, often featuring an earth pattern, allows for tracking a second time zone.

FUNCTION DIAL DISPLAY

THE HOLLOW FLYWHEEL FOLLOWS THE STARS IN THE UNIVERSE
SEE THE MOVEMENT TRACK OF THE MOVEMENT
IMMERSE IN THE BRIGHT AND BLURRED FANTASY SPACE

SECOND TIME ZONE

HOLLOW OUT

PHASE OF THE MOON

3.2 Luminous Function

The watch hands and markers are equipped with a luminous coating. To activate the luminous effect, expose the watch to a strong light source for a period. In dark environments, the watch will emit a green glow, allowing for clear time readability.

Image 3: This composite image illustrates key features including 30m water resistance, a high-hardness coated mirror surface, the fully automatic movement visible through the case back, and the watch's luminous function in the dark.

4. MAINTENANCE

4.1 Water Resistance

Your OLEVS Model 6689 watch is water-resistant up to 30 meters (98 feet). This means it is suitable for daily use, such as hand washing or light rain exposure. It is **not** recommended for swimming, diving, or showering, as prolonged water exposure or high-pressure water jets can compromise the seals.

4.2 Cleaning and Care

- Wipe the watch case and crystal with a soft, dry cloth to remove dust and fingerprints.
- For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals to prevent damage and discoloration. Clean with a damp cloth and mild soap if necessary, then dry thoroughly.
- Store your watch in a cool, dry place away from strong magnetic fields when not in use.

5. TROUBLESHOOTING

If you encounter any issues with your watch, please refer to the following common problems and solutions:

- **Watch Stops Running:** If the watch stops, it may need to be manually wound. Rotate the crown clockwise 30-40 times. Ensure you wear the watch regularly to keep the automatic movement powered.
- **Time Inaccuracy:** Slight variations in timekeeping are normal for mechanical watches. If the inaccuracy is significant, ensure the watch is fully wound. Extreme temperatures or strong magnetic fields can affect accuracy.
- **Moisture Inside the Watch:** If condensation appears under the crystal, immediately take the watch to a professional watch repair service. Do not attempt to open the watch yourself.

6. SPECIFICATIONS

Feature	Detail
Brand Name	OLEVS
Model Name	Starry Sky Skeleton Tourbillon
Model Number	TY-G6689PLV-BLV
Display Type	Analog
Watch Movement Type	Automatic
Power Source	Self Winding
Case Material Type	Stainless Steel
Case Diameter	42 Millimeters
Case Thickness	13 Millimeters
Band Material Type	Leather
Band Color	Green
Band Width	22 Millimeters
Band Length	9.4 Inches
Dial Color	Green
Crystal	Mineral
Water Resistance Depth	98 Feet (30 Meters)
Additional Features	Luminous
Clasp Type	Buckle

7. WARRANTY AND SUPPORT

OLEVS provides a **24-month assurance** for automatic watches. Additionally, a **30-day free return policy** is available. If you encounter any problems with your wrist watch or require assistance, please contact our customer service for professional support.
