- **Drying:** Dry the inner pot thoroughly with a soft cloth before storing or placing it back into the rice cooker.
- **Dishwasher:** Consult your main rice cooker manual regarding dishwasher safety for the inner pot. Generally, hand washing is recommended to preserve the non-stick coating.

7. Troubleshooting

If you encounter issues related to the inner pot, consider the following:

- **Rice sticking:** Ensure you are using the correct water-to-rice ratio according to the inner pot's markings and your rice cooker's settings. Avoid using metal utensils that can scratch the non-stick surface.
- **Uneven cooking:** Verify that the inner pot is properly seated in the rice cooker and that there are no foreign objects preventing full contact with the heating element.
- **Damage:** If the non-stick coating is significantly scratched or peeling, it is recommended to replace the inner pot.

For issues related to the rice cooker's heating or electronic functions, refer to your main rice cooker instruction manual.
