OLEVS 6638: Black band & Black dial (TYG-OS-G6638GH-HH)

OLEVS Automatic Watch User Manual

Model: 6638: Black band & Black dial

INTRODUCTION

Thank you for choosing the OLEVS Automatic Gold Watch. This luxury classic timepiece features a stainless steel construction, calendar display, and luminous hands, designed for durability and precision. This manual provides essential information for the proper setup, operation, and maintenance of your watch to ensure its longevity and accurate performance.

SETUP

Initial Winding

Your OLEVS automatic watch is powered by an original mechanical movement that winds automatically with wrist motion. For the first use, or if the watch has stopped due to inactivity, it requires manual winding. Gently wind the crown 30-40 times in a clockwise direction until you feel resistance. This will initiate the movement and build up the power reserve.

Strap Adjustment

The watch comes with a comfortable stainless steel strap. A complimentary adjustment tool is included to help you easily remove links and fit the strap to your wrist size. Ensure the strap is securely fastened after adjustment.

The OLEVS watch comfortably worn on a wrist, demonstrating its fit and appearance.

OPERATING INSTRUCTIONS

Setting Time and Date

Your OLEVS watch features a multi-functional dial with day, 24-hour, and date displays. The crown on the side of the watch is used for adjustments:

- **First Gear (Calendar Adjustment):** Gently pull the crown out to the first click. Rotate the crown to adjust the day and date.
- **Second Gear (Time Adjustment):** Pull the crown out to the second click. Rotate the crown to set the hour and minute hands. Push the crown back in completely to start the watch.

Deep waterproof

High hardness coated mirror

Original mechanical movement

High Definition Luminous Function

Detailed view of the watch dial, highlighting the week, 24 o'clock, reverse month, and calendar subdials, along with crown adjustment points.

Luminous Function

The watch hands and hour markers are equipped with a high-definition luminous function, allowing for clear time reading in low-light conditions. The luminescence charges when exposed to light.

MAINTENANCE

Water Resistance

This watch features a sealed waterproof case with a 30-meter water resistance depth. It can withstand short-term

splashing or immersion in water, such as hand washing or light rain. **It is not suitable for showering, swimming, diving, or any activities involving hot water or prolonged submersion.**

Cleaning and Care

- Wipe the watch case and strap regularly with a soft, dry cloth to remove dust and smudges.
- Avoid exposing the watch to extreme temperatures, strong magnetic fields, or harsh chemicals.
- If the watch comes into contact with saltwater, rinse it gently with fresh water and dry thoroughly.

TROUBLESHOOTING

Watch Not Running or Losing Time

- Ensure the watch has been sufficiently wound. For automatic watches, consistent wrist movement is required. If inactive for an extended period, manually wind the crown 30-40 times.
- Check if the crown is fully pushed in. If it's pulled out, the watch will not run.

Date/Day Not Changing Correctly

- Adjust the date/day using the first gear of the crown. Avoid adjusting the date between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism.

General Issues

If you encounter any problems while using your OLEVS watch that are not covered here, please refer to the Warranty & Support section for assistance.
