For Toyota Camry 2015-2017 Models

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Dasaita HA5473 10.2-inch QLED Touchscreen Car Radio. Designed specifically for Toyota Camry models from 2015 to 2017, this unit integrates advanced features such as Wireless CarPlay, Android Auto, Android 13 OS, 4G LTE/5G WiFi, and GPS navigation. Please read this manual thoroughly before installation and use to ensure proper functionality and safety.

2. PRODUCT OVERVIEW

The Dasaita HA5473 car radio offers a significant upgrade to your vehicle's infotainment system. It features a 10.2-inch QLED display with 1280x720 resolution, providing clear visuals and responsive touch control. Powered by a Qualcomm Snapdragon 665 octa-core processor with 6GB RAM and 64GB ROM, it ensures smooth performance for multiple applications. The unit supports seamless integration with existing factory features, including steering wheel controls, backup camera, parking sensors, and OEM USB/AUX ports, while also displaying real-time vehicle data like door status and AC information.

6. TROUBLESHOOTING

6.1 Backup Camera Not Working

If your factory backup camera is not displaying an image, showing a yellow warning symbol, or experiencing signal issues, consider the following:

- **Check RCA Connections:** Ensure that the two yellow RCA video wires, specifically those not labeled for a front camera, are correctly connected. Sometimes, these need to be connected together or to the correct 'CAM IN' input.
- **Verify Wiring Harness:** Confirm that the camera input cable from the vehicle's wiring harness is properly connected to the head unit.
- **Power Cycle:** Disconnect the vehicle's battery for approximately 10 minutes, then reconnect it. This can sometimes resolve minor software glitches affecting camera detection.
- **Consult Wiring Diagram:** Refer to the provided wiring diagram for specific instructions on connecting the factory reverse camera. Some setups may require switching specific plugs (e.g., switch No. 4 to No. 4-1 white plug, and the yellow plug may need to be exchanged).
