Ymimi 1239FT60

Ymimi Replacement Filters for Shark Navigator Upright Vacuums

Compatible with Models ZU100, NV181, ZU55, NV150, NV151, NV250, ZU51, ZU102, ZU60, ZU62, ZU62C - Part #1239FT60

Introduction

This manual provides instructions for the installation and maintenance of Ymimi replacement foam and felt filters, designed for various Shark Navigator Zero-M Self-Cleaning Brushroll Pet Pro Upright Vacuum models. Regular filter replacement is essential for maintaining optimal vacuum performance and air quality.
These filters are compatible with the following Shark Navigator models**ZU100, NV181, ZU55, NV150, NV151, NV250, NV255, ZU51, ZU60, ZU62, ZU62C, ZU102**.

Package Contents

Your package includes:

- 4 x Foam Filters
- 4 x Felt Filters

Image: Four white rectangular foam and felt vacuum filters, as included in the package.

Installation Instructions

Follow these steps to replace the filters in your Shark Navigator vacuum:

1. **Power Off and Unplug:** Ensure your vacuum cleaner is turned off and unplugged from the power outlet before beginning any maintenance.
2. **Access Filter Compartment:** Refer to your Shark vacuum's user manual for specific instructions on how to open the filter compartment. Typically, this involves removing the dust cup.
3. **Remove Old Filters:** Carefully remove the old foam and felt filters from their designated slots. Note their orientation for correct placement of the new filters.

4. **Insert New Filters:** Place the new felt filter first, followed by the foam filter, ensuring they fit snugly into the compartment. The rough side of the felt filter should typically face upwards.
5. **Reassemble:** Close the filter compartment and reattach the dust cup securely.

Maintenance

For optimal performance, it is recommended to replace your vacuum filters every 3-6 months, depending on usage. The foam and felt filters are washable and reusable. To clean them:

1. Remove filters from the vacuum.
2. Rinse the filters under running water until the water runs clear.
3. Squeeze out excess water and allow filters to air dry completely for at least 24 hours before reinserting them into the vacuum. Do not use a dryer or heat to dry.

Troubleshooting

If you experience reduced suction or unusual odors after replacing filters:

- **Check Filter Placement:** Ensure both foam and felt filters are correctly seated in their compartments.
- **Verify Dryness:** If filters were recently washed, confirm they are completely dry before use. Damp filters can hinder performance and cause odors.
- **Inspect Other Components:** Check for blockages in the hose, brushroll, or dust cup.
- **Consider HEPA Filter:** If your vacuum uses a HEPA filter (not included in this specific product), ensure it is also clean or replaced as needed according to your vacuum's manual.

Warranty and Support

For any product-related inquiries or if you encounter issues with compatibility or quality, please contact the manufacturer directly. They are committed to providing customer satisfaction and will assist you within 24 hours.
