## H2ofloss HF-P11 black

# H2ofloss Cordless Water Flosser User Manual

**MODEL: HF-P11 BLACK**

**Brand: H2ofloss**

## Introduction

---

Thank you for choosing the H2ofloss Cordless Water Flosser. This professional dental oral irrigator is designed to provide a convenient and effective solution for your daily oral hygiene. With its portable and rechargeable design, 300ML water tank, and IPX7 waterproof rating, it is suitable for both home and travel use. This manual will guide you through the proper setup, operation, and maintenance of your device to ensure optimal performance and a healthier smile.

## Safety Information

---

Please read all safety instructions before using the H2ofloss Water Flosser. Failure to follow these instructions may result in injury or damage to the product.

- For first-time users, always begin with the **LOWEST** mode to allow your gums to adjust to the water pressure.
- Do not aim the water jet directly at your throat or eyes when operating the device.
- Keep the device out of reach of children.
- Do not disassemble or attempt to repair the device yourself. Contact customer support for assistance.
- Ensure the charging port is dry before connecting the charging cable.

## Package Contents

---

Verify that all items are present in your package:

- H2ofloss Cordless Water Flosser Unit
- Standard Jet Tips (2)
- Periodontal Tip (1)
- Orthodontic Tip (1)
- Tongue Cleaner Tip (1)
- USB Type-C Charging Cable
- Portable Storage Bag

## Product Overview

---

Familiarize yourself with the components of your H2ofloss Water Flosser:

Image: A detailed diagram highlighting key components of the H2ofloss Water Flosser, including the ON/OFF button, Mode button, Indicating lights, Charging port, 300ml Water Tank, and 360° Rotatable Tip.

- **ON/OFF Button:** Powers the device on or off.
- **Mode Button:** Cycles through the 5 different flossing modes.
- **Indicating Lights:** Display the currently selected mode and battery level.
- **Charging Port:** Type-C port for recharging the device.
- **Anti-slip Design:** Textured grip for secure handling.
- **300ml Water Tank:** Detachable reservoir for water or mouthwash.
- **Water Entrance:** Opening for filling the water tank.
- **Tip Release Button:** Press to remove or change the nozzle tip.
- **360° Rotatable Tip:** Allows for easy access to all areas of the mouth.

## Setup

### 1. Charging the Device

Before first use, fully charge the water flosser. A full charge takes approximately 5 hours and provides up to 21-30 days of use, thanks to its 2500mAh battery.

- Connect the provided USB Type-C charging cable to the charging port on the device.
- Plug the other end of the USB cable into a 5V 1A adapter (not included), power bank, PC, or car charger.
- The charging indicator lights will illuminate during charging and turn off when fully charged.
- Ensure the protective lid is closed after charging to maintain the IPX7 waterproof rating.

Image: The H2ofloss Water Flosser connected to a power adapter via its Type-C charging cable, illustrating the charging process.

## 2. Filling the Water Tank

The device features a 300ML detachable water tank for easy filling and cleaning.

- Open the water tank lid.
- Fill the tank with lukewarm water. You may also add mouthwash if desired.
- Close the water tank lid securely to prevent leaks.

### 3. Attaching the Nozzle Tip

Select the appropriate nozzle tip for your needs.

- Insert the desired nozzle tip into the hole at the top of the flosser unit until it clicks into place.
- The tip can be rotated 360° for optimal cleaning angles.

## Operating Instructions

---

### 1. Selecting a Flossing Mode

The H2ofloss Water Flosser offers 5 distinct flossing modes to cater to various oral care needs:

# 5 SETTINGS OF WATER PRESSURE

Deep clean and message the gum

**Super High**  
140 psi

Remove 99% food residue

**Strong**  
110 psi

Daily Cleaning

**Medium**  
90 psi

Beginner

**Soft**  
60 psi

Sensitive teeth

**Low**  
40 psi

Image: A visual representation of the five water pressure settings available on the H2ofloss Water Flosser, ranging from Low (40 psi) to Super High (140 psi).

| Mode       | Pressure (psi) | Recommended Use                       |
|------------|----------------|---------------------------------------|
| Low        | 40             | Sensitive teeth, first-time users     |
| Soft       | 60             | Beginner users                        |
| Medium     | 90             | Daily cleaning                        |
| Strong     | 110            | Effective removal of 99% food residue |
| Super High | 140            | Deep cleaning and gum massage         |

Press the **Mode** button repeatedly to cycle through the settings until you reach your desired pressure.

## 2. Flossing Technique

Follow these steps for effective water flossing:

1. Fill the water tank with lukewarm water.
2. Insert the desired nozzle tip securely.

3. Press the **Mode** button to select the appropriate water pressure.
4. Lean over a sink and place the tip into your mouth, directing it at a 90° angle to your gumline.
5. Press the **ON/OFF** button to start the water flow.
6. Guide the water jet along your gumline, pausing briefly between teeth. Allow the water to flow into the sink.
7. The innovative **Gravity Ball** design ensures continuous water flossing from all angles, even when the tank is tilted.

Image: A visual guide illustrating the five steps for using the H2ofloss Water Flosser, from filling the tank to operating the device.

Image: An illustration demonstrating the H2ofloss Gravity Ball patent design, which ensures consistent water flow regardless of the device's angle.

### 3. Interchangeable Tips

The H2ofloss Water Flosser comes with multiple tips for specialized cleaning:

## Professional Water Flosser Effectively Solve 6 Oral Problems

Image: A display of the five multifunctional tips included with the H2ofloss Water Flosser: Standard, Periodontal, Orthodontic, and Tongue Tip.

- **Standard Tip:** For daily general cleaning.
- **Periodontal Tip:** Designed for cleaning around gum pockets and sensitive areas.
- **Orthodontic Tip:** Specifically designed for cleaning around braces and orthodontic appliances.
- **Tongue Tip:** For cleaning the tongue to help remove bacteria and freshen breath.

### Maintenance

---

#### 1. Cleaning the Unit

Regular cleaning ensures hygiene and extends the life of your water flosser.

- The device is IPX7 waterproof, allowing for safe use in the shower and easy rinsing under water.
- After each use, empty any remaining water from the tank.
- Detach the water tank and rinse it thoroughly with clean water.
- Wipe the exterior of the unit with a soft, damp cloth.
- Rinse the nozzle tips under running water. For deeper cleaning, tips can be soaked in a denture cleaning solution.

Image: The H2ofloss Water Flosser being rinsed under a running faucet, highlighting its IPX7 waterproof capability.

## 2. Storage

- Ensure the device is dry before storing.
- Store the water flosser and its accessories in a cool, dry place, away from direct sunlight.
- Use the provided portable storage bag for convenient and protected travel.

## Troubleshooting

---

If you encounter any issues with your H2ofloss Water Flosser, please refer to the following common problems and solutions:

- **No Power / Device Not Turning On:**
  - Check the battery level. Recharge the device if the battery is low.
  - Ensure the ON/OFF button is pressed firmly.
- **Weak Water Pressure:**
  - Verify that the water tank is sufficiently filled.
  - Check the selected mode. Switch to a higher pressure mode (e.g., Strong or Super High) if a

more powerful stream is desired.

- Ensure the nozzle tip is not clogged. Remove and rinse the tip.

- **No Water Flow:**

- Confirm the water tank is filled with water.
- Ensure the nozzle tip is securely inserted into the unit.
- Check if the gravity ball tube inside the tank is kinked or obstructed. Straighten it if necessary.

- **Charging Issues:**

- Ensure the Type-C charging cable is fully and correctly inserted into the charging port.
- Try using a different USB power source (e.g., another wall adapter, PC USB port) to rule out a faulty power source.
- Make sure the charging port is dry before connecting the cable.

If the problem persists after trying these steps, please contact H2ofloss customer support for further assistance.
