That process includes the estimation of emissions from materials, production, distribution, and end-of-life management.

This product's estimated carbon footprint:

2319 kgCO2e +/- 1134 kgCO2e

Estimated impact by lifecycle stage with breakdown by component:

For environmental footprinting, ViewSonic utilizes Product Attribute to Impact algorithm (PAIA). Developed by the Massachusetts Institute of Technology (MIT), PAIA is a standardized life cycle assessment (LCA) tool that examines the greenhouse gas emissions released throughout the lifecycle of a product to calculate the product carbon footprint.
