4. SETUP AND INSTALLATION

The BODEGA Model YC-150E is designed for both under-counter built-in and freestanding installation. Proper ventilation is crucial for optimal performance.

4.1 Unpacking

1. Carefully remove all packaging materials, including the base and any internal packing.
2. Inspect the appliance for any shipping damage. Report any damage to your dealer immediately.
3. Retain the packaging materials for future transport or storage.

4.2 Placement

1. Place the refrigerator on a flat, stable surface capable of supporting its weight when fully loaded.
2. Ensure adequate clearance for ventilation. For built-in installation, refer to the dimensions provided in the

specifications section.

3. Avoid placing the appliance in direct sunlight or near heat sources (e.g., ovens, radiators).
4. This unit is suitable for outdoor use due to its weatherproof design, but ensure it is placed on a level surface and protected from extreme weather conditions.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your BODEGA beverage refrigerator.

6.1 Cleaning the Interior

1. Unplug the appliance before cleaning.
2. Clean the interior with a soft cloth, warm water, and a mild detergent.
3. Wipe dry thoroughly to prevent water spots or mildew.
4. The activated carbon filter helps maintain freshness; replace it periodically as needed.

6.2 Cleaning the Exterior

1. Wipe the stainless steel exterior with a soft cloth and a stainless steel cleaner.
2. Avoid abrasive cleaners or scouring pads that could scratch the surface.

- Regularly clean the front ventilation grille to ensure proper airflow.

6.3 Defrosting

This appliance features an automatic defrost system, minimizing the need for manual defrosting.

7. TROUBLESHOOTING

Before contacting customer service, please refer to the following common issues and their solutions:

Problem	Possible Cause	Solution
Appliance does not operate.	No power supply; power cord unplugged; circuit breaker tripped.	Check power connection; reset circuit breaker.
Temperature is not cold enough.	Door not closed properly; excessive door openings; warm items added; poor ventilation; unit in direct sunlight.	Ensure door is sealed; reduce door openings; allow time for new items to cool; ensure proper clearance; relocate unit.
Appliance is noisy.	Unit not level; vibrating against wall/cabinet; normal compressor operation.	Adjust leveling feet; move unit away from contact points; compressor noise is normal.
Door panel came unglued.	Adhesive failure due to environmental factors or manufacturing defect.	Contact BODEGA customer support for assistance or warranty claim.
