USB Power Supply
The display stays on.
ATTENTION: USB cord included and no plug

4*AA

Battery Backup Power Supply (Not Included)

1. For saving energy, pressing top can light up display for 20s.
2. Alarm still works and save all the setting in case of power outages.

Figure 2: Included items and power options. Note: 4 AA batteries are required for backup but are not included.

SETUP

1. **Power Connection:** Connect the provided USB Type-C power cable to the DC 5V port on the back of the alarm clock. Plug the power adapter into a standard electrical outlet. The display will light up.

2. **Battery Backup (Optional but Recommended):** For uninterrupted operation and to save settings during power outages, install 4 AA batteries (not included) into the battery compartment on the back of the clock. This ensures the alarm still functions and settings are retained if main power is lost. The display can be lit for 20 seconds by touching the top when on battery backup.

3. **Initial Time Setting:** The clock may display a default time. Proceed to the "Operating Instructions" section to set the correct time and alarm.

OPERATING INSTRUCTIONS

The Peakeep Digital Alarm Clock features intuitive controls located on the back panel. Refer to Figure 3 for button locations.

1. Setting Time

- Press and hold the **TIME SET** button for 2 seconds to enter time setting mode. The hour digits will flash.
- Use the **+** or **-** buttons to adjust the hour.
- Press **TIME SET** again to move to minute setting. The minute digits will flash.
- Use the **+** or **-** buttons to adjust the minutes.
- Press **TIME SET** once more to confirm and exit time setting mode.

2. Setting Alarm

- Press and hold the **ALARM SET** button for 2 seconds to enter alarm setting mode. The alarm hour digits will flash.
- Use the **+** or **-** buttons to adjust the alarm hour.
- Press **ALARM SET** again to move to alarm minute setting. The alarm minute digits will flash.

- Use the **+** or **-** buttons to adjust the alarm minutes.
- Press **ALARM SET** once more to confirm and exit alarm setting mode.
- To turn the alarm ON/OFF, simply press the **ON**/**OFF** button. A bell icon will appear on the display when the alarm is active.

3. Adjusting Brightness (Dimmer)

- Press the **DIMMER** button repeatedly to cycle through 6 adjustable brightness levels (L05, L04, L03, L02, L01, OFF).
- Select the brightness level that best suits your environment and preference.

Figure 4: Adjustable brightness levels for optimal viewing.

4. Adjusting Volume

- Press the **VOL+** or **VOL-** buttons to adjust the alarm volume. There are 5 levels of alarm volume.
- Choose a volume level suitable for your needs, from low for light sleepers to super loud for heavy sleepers.
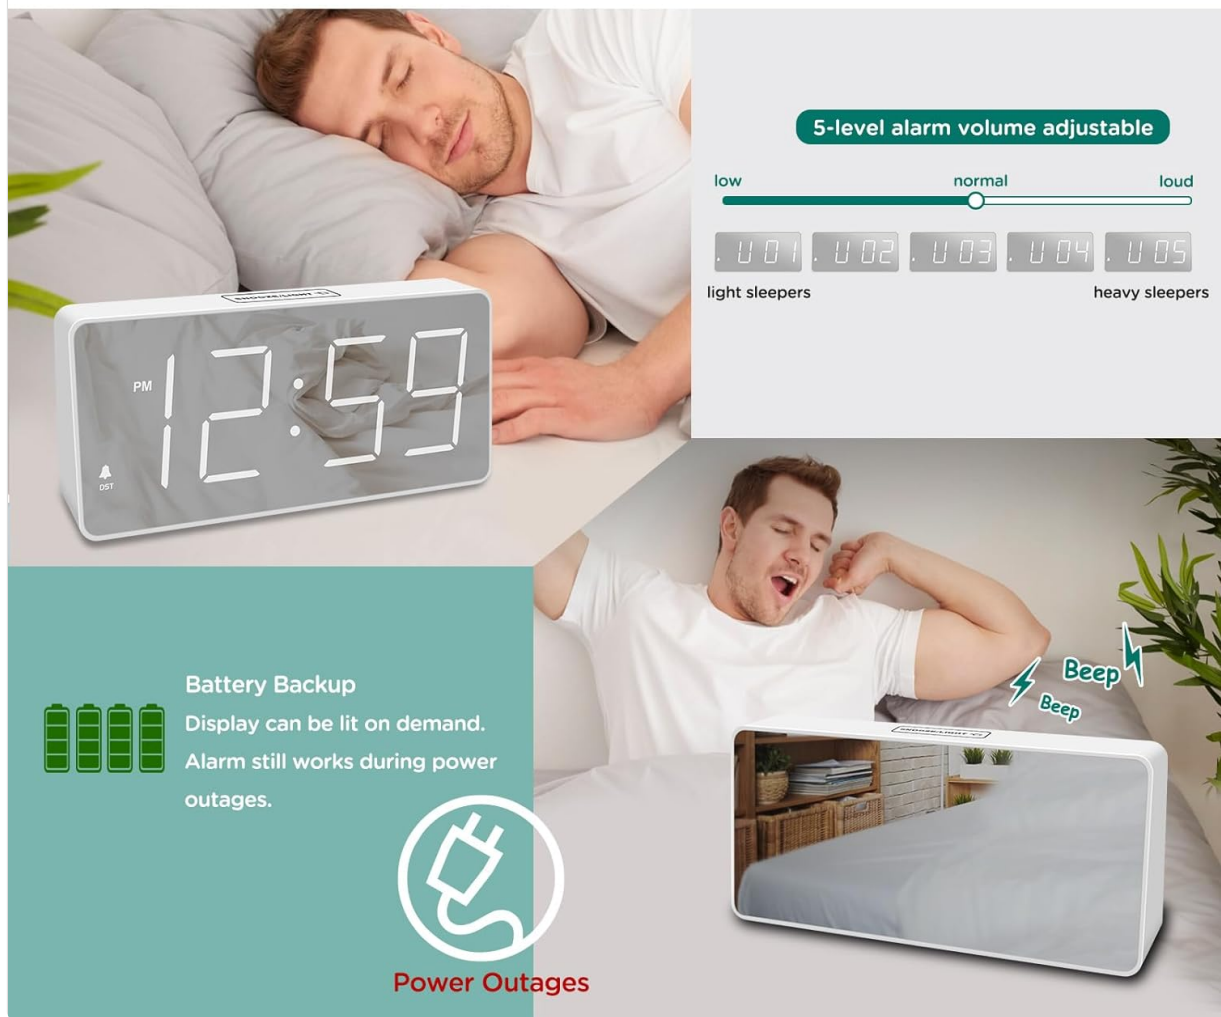

Figure 5: Five adjustable alarm volume options.

5. Snooze Function

- When the alarm sounds, press the large **SNOOZE/LIGHT** button on the top of the clock to activate the 9-minute snooze function.
- The alarm will sound again after 9 minutes.
- To stop the alarm completely, press any button on the back of the clock.

6. 12/24 Hour Format Conversion

- Press the **12/24HR** button to switch between 12-hour and 24-hour time formats.
- In 12-hour format, "AM" or "PM" indicators will be displayed.

7. Daylight Saving Time (DST) On/Off

- Press the **DST ON/OFF** button to enable or disable Daylight Saving Time.
- When DST is active, the clock will automatically adjust by one hour.

MAINTENANCE

- **Cleaning:** To clean the clock, gently wipe the surface with a soft, dry cloth. Avoid using abrasive cleaners, solvents, or strong chemicals, as these may damage the mirror finish or plastic casing.

- **Battery Replacement:** If using the battery backup feature, replace the 4 AA batteries annually or when the display no longer lights up during a power outage. Ensure correct polarity when inserting new batteries.

- **Storage:** If storing the clock for an extended period, remove the batteries to prevent leakage and potential damage. Store in a cool, dry place.

Figure 6: The mirror face can be easily cleaned with a soft cloth.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Clock display is off.	No power or power outage.	Ensure the power adapter is securely plugged in. If there's a power outage, check if backup batteries are installed. Touch the top of the clock to temporarily light up the display for 20 seconds.
Alarm does not sound.	Alarm is not set or volume is too low.	Verify the alarm is turned ON (bell icon visible). Check the alarm time setting. Increase the alarm volume using the VOL+ button.
Display is too bright/dim.	Brightness level needs adjustment.	Press the DIMMER button to cycle through the 6 brightness levels until desired brightness is achieved.

Problem	Possible Cause	Solution
Time is incorrect after power loss.	No backup batteries or batteries are depleted.	Install new 4 AA batteries for backup. Reset the time as per "Setting Time" instructions.
