# User Manual: Ymimi Replacement Filters for Shark Navigator Lift-Away XL Vacuum

Model: XFF350

Brand: Ymimi

## Introduction

This manual provides instructions for the installation, maintenance, and care of your Ymimi replacement filters, designed for Shark Navigator Lift-Away XL Multisurface Upright Vacuum models CU512, CU500, CU510, and CU520 series. Regular filter replacement and cleaning are essential for maintaining optimal vacuum performance and air quality.

## Package Contents

Your package includes the following components:

- 2 HEPA Filters
- 4 Foam Filters
- 4 Felt Filters

Image: Contents of the Ymimi replacement filter package, showing two rectangular HEPA filters and multiple sets of round foam and felt filters.

## Compatibility

These replacement filters are specifically designed to be compatible with the following Shark Navigator Lift-Away XL Multisurface Upright Vacuum Cleaner models:

- CU512
- CU500
- CU510
- CU520 Series

Image: Visual representation of the filters alongside images of compatible Shark vacuum models (CU510, CU512, CU530), indicating proper fit.

## Installation

Follow these steps to install the replacement filters in your Shark Navigator Lift-Away XL vacuum:

1. **Power Off:** Ensure your vacuum cleaner is unplugged from the power outlet before attempting any maintenance or installation.
2. **Locate Filter Compartments:** Refer to your Shark vacuum's original user manual to identify the locations of the HEPA filter and the foam/felt filter compartments. Typically, the foam and felt filters are located beneath the dust cup, and the HEPA filter is located at the bottom of the vacuum.
3. **Remove Old Filters:** Carefully remove the old HEPA filter, foam filter, and felt filter. Dispose of them properly.
4. **Insert New Filters:**
    - Place the new felt filter first, followed by the new foam filter, into their designated compartment. Ensure they are seated correctly.
    - Insert the new HEPA filter into its compartment, ensuring it clicks into place or is securely fitted.
5. **Reassemble:** Reattach any covers or dust cups that were removed during the process.

## Maintenance and Cleaning

To ensure optimal performance and longevity of your filters, regular cleaning is recommended.

### Cleaning Foam and Felt Filters

1. **Remove Filters:** Carefully remove the foam and felt filters from your vacuum.
2. **Rinse:** Rinse the filters under running water until the water runs clear.
3. **Squeeze:** Gently squeeze out excess water.
4. **Air Dry:** Allow the filters to air dry completely for at least 24 hours before reinserting them into the vacuum. Do not use a dryer or heat source.

Image: A foam filter being rinsed under a faucet in a sink, demonstrating the washable nature of the filters.

### HEPA Filter

The HEPA filter is generally not washable. Tap off loose dirt over a trash can. If heavily soiled, it should be replaced.

### Replacement Frequency

For optimum performance, vacuum filters should be replaced every 3-6 months, depending on usage. The foam and felt filters are reusable and do not expire, but should be replaced if they show signs of wear or damage.

## Troubleshooting

If you experience issues after replacing your filters, consider the following:

- **Reduced Suction:** Ensure all filters are correctly installed and fully dry. Check for any blockages in the vacuum hose or brush roll.
- **Unusual Odor:** Ensure filters are completely dry before reinstallation. Damp filters can cause odors.
- **Filter Not Fitting:** Verify that your vacuum model is listed as compatible. These filters are designed for Shark Navigator Lift-Away XL models CU512, CU500, CU510, CU520 Series.

## Specifications

**Product Specifications**

| Feature | Detail |
|---|---|
| Brand | Ymimi |
| Model Number | XFF350 |
| Compatible Devices | Shark Navigator Lift-Away XL Multisurface Upright Vacuum (CU512, CU500, CU510, CU520 Series) |
| Material Type | Foam, Felt, HEPA media |
