Setup Guide

1. Physical Placement

Optimal placement of your sound system components is crucial for an immersive audio experience. Position the soundbar centrally below your television. The wireless subwoofer can be placed anywhere in the room, ideally near a wall or corner for enhanced bass. The two surround speakers should be placed behind your listening position, equidistant from the center, and connected to the subwoofer using the provided 20-foot RCA cables.

2. Connections

The Poseidon D60 offers multiple connectivity options. HDMI-eARC is recommended for the highest quality audio transmission.

- **HDMI-eARC Connection:** Connect one end of the included HDMI cable to your TV's HDMI (eARC/ARC) port and

the other end to the soundbar's eARC port. Ensure your TV's audio output settings are configured for HDMI ARC/eARC.

- **Optical Connection:** Use the Digital Optical Cable to connect your TV's Optical Out port to the soundbar's Optical In port.
- **Auxiliary Connection:** Use the 3.5mm to RCA Audio Cable to connect devices with a 3.5mm audio output to the soundbar.
- **Bluetooth Connection:** For wireless audio streaming from mobile devices, select Bluetooth input on the soundbar and pair with your device.

Step 2 shows inserting the other end into the soundbar's eARC port. Step 3 shows pressing the EQ button on the remote to select eARC mode. Below the diagram, text provides guidance on TV audio settings.

3. Power On

Connect the power adaptors to the soundbar and subwoofer, then plug them into a power outlet. The soundbar and subwoofer will automatically pair. Power on the soundbar using the remote control or the power button on the unit.

Operating Instructions

1. Basic Controls

The soundbar can be controlled using the included remote control or the touch-sensitive buttons on the top panel of the soundbar. Controls include Power, Input Selection, Volume Up/Down, and EQ Mode selection.

2. Sound Modes

The Poseidon D60 features three optimized sound modes to enhance your listening experience for different content types. Press the EQ button on the remote control to cycle through these modes:

- **Movie Mode:** Enhances background sound and cinematic effects for an immersive movie-watching experience.
- **Dialogue Mode:** Strengthens human voices for clearer dialogue, making it easier to follow conversations in TV shows or news.
- **Music Mode:** Provides a balanced audio profile for music playback, with surround speakers playing music as the main bar for a higher volume and richer sound.

Key Features

- **True 5.1 Immersive Surround Sound:** The system features a soundbar with three main channels, a wireless subwoofer, and two wired surround speakers to deliver a comprehensive and immersive audio experience.
- **Dolby Atmos Technology:** Experience breathtaking 3D surround sound that precisely pinpoints audio sources,

creating a greater sense of direction, space, and depth. This advanced decoding technology provides a more immersive soundscape than standard Dolby Digital.

Maintenance

To ensure the longevity and optimal performance of your ULTIMEA Poseidon D60 system, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the soundbar, subwoofer, and surround speakers. Avoid

using liquid cleaners, aerosols, or abrasive materials, as they may damage the finish or internal components.

- **Ventilation:** Ensure that the soundbar and subwoofer have adequate ventilation. Do not block any ventilation openings.
- **Environment:** Keep the system away from direct sunlight, heat sources, excessive dust, moisture, and strong magnetic fields.
- **Cables:** Periodically check all cable connections to ensure they are secure and free from damage.

Troubleshooting

If you encounter issues with your ULTIMEA Poseidon D60, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No sound from soundbar	Incorrect input selected; Cables not connected properly; TV audio settings incorrect; Soundbar muted or volume too low.	Ensure the correct input source (HDMI, Optical, Bluetooth) is selected. Check all cable connections. Verify TV audio output is set to external speakers (e.g., PCM for Optical, ARC/eARC for HDMI). Increase soundbar volume.
No sound from subwoofer/surround speakers	Subwoofer not paired; Surround speakers not connected to subwoofer; Volume levels too low.	Ensure the subwoofer is powered on and paired with the soundbar (indicator light should be solid). Check the RCA cable connections from surround speakers to the subwoofer. Adjust the bass and surround levels using the remote control.
Remote control not working	Batteries depleted or incorrectly inserted; Obstruction between remote and soundbar; Remote out of range.	Replace batteries with new AAA batteries, ensuring correct polarity. Remove any obstructions. Ensure you are within the effective range of the remote control.
Bluetooth connection issues	Device not in pairing mode; Soundbar not in Bluetooth mode; Interference.	Ensure the soundbar is set to Bluetooth input. Put your device in Bluetooth pairing mode. Move closer to the soundbar and away from other wireless devices that may cause interference.
