Rowenta Green Silence Car Kit Bagged Vacuum Cleaner

Model: RO6164EA

1. INTRODUCTION AND SAFETY INFORMATION

Thank you for choosing the Rowenta Green Silence Car Kit Bagged Vacuum Cleaner. This manual provides essential information for the safe and efficient use of your appliance. Please read all instructions carefully before operating the vacuum cleaner and retain this manual for future reference.

Important Safety Instructions:

- Always ensure the voltage indicated on the appliance corresponds to your mains voltage before connecting.
- Do not use the appliance if the power cord or plug is damaged. Contact an authorized service center for repair.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Do not vacuum liquids, hot ashes, sharp objects, or flammable/explosive substances.
- Unplug the appliance from the mains socket before cleaning or performing any maintenance.
- Never immerse the appliance in water or any other liquid.

2. PRODUCT OVERVIEW

The Rowenta Green Silence Car Kit is a powerful and efficient bagged canister vacuum cleaner designed for thorough cleaning of various surfaces, including hard floors and carpets, with specialized tools for car interiors.

Key Components:

- Main Unit (Canister)
- Flexible Hose
- Telescopic Tube

- Floor Nozzle
- Dust Bag (pre-installed or to be installed)
- HEPA Filter
- Accessory Kit (various nozzles and brushes for specialized cleaning, including car interiors)

Note: No relevant product images were provided for this vacuum cleaner. Therefore, no images are embedded in this manual.

3. SETUP

1. **Unpack the Appliance:** Carefully remove all components from the packaging.
2. **Attach the Hose:** Insert the flexible hose into the suction inlet on the main unit until it clicks into place.
3. **Assemble the Tubes:** Connect the telescopic tube to the handle of the flexible hose. Adjust the length of the telescopic tube by pressing the release button and sliding it to the desired position.
4. **Attach the Floor Nozzle:** Connect the floor nozzle to the end of the telescopic tube. Ensure it is securely fitted.
5. **Check Dust Bag:** Open the dust bag compartment and ensure a dust bag is correctly installed. Replace if full or damaged.
6. **Connect Power:** Unwind the power cord and plug it into a suitable electrical outlet.

4. OPERATING INSTRUCTIONS

1. **Power On/Off:** Press the On/Off button (often a foot pedal or a touch control on the main unit) to start or stop the vacuum cleaner.
2. **Adjust Suction Power:** This model features 3 power levels. Use the touch controls on the main unit or handle (if applicable) to select the appropriate suction power for your cleaning task. Lower power for delicate surfaces, higher power for heavily soiled areas.
3. **Surface Cleaning:**
 - **Hard Floors:** Use the floor nozzle with brushes extended (if adjustable) for optimal cleaning without scratching.
 - **Carpets:** Retract the brushes on the floor nozzle (if adjustable) for better suction on carpets.
4. **Using Accessories:** Disconnect the floor nozzle and attach the desired accessory from the car kit directly to the telescopic tube or hose handle. Use the crevice tool for tight spaces, the upholstery brush for fabric surfaces, and other specialized tools for car interiors.
5. **After Use:** Turn off the vacuum cleaner and unplug it from the mains. Press the cord rewind button (if available) to retract the power cord.

5. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your vacuum cleaner.

Dust Bag Replacement:

Replace the dust bag when the dust bag indicator shows it is full, or when suction power noticeably decreases. Always use genuine Rowenta replacement bags.

1. Unplug the vacuum cleaner.

2. Open the dust bag compartment.
3. Carefully remove the full dust bag, ensuring the opening is sealed to prevent dust leakage.
4. Insert a new dust bag, making sure it is correctly positioned in the holder.
5. Close the dust bag compartment securely.

HEPA Filter Cleaning/Replacement:

The HEPA filter should be cleaned periodically (e.g., every 6 months) and replaced annually, or more frequently depending on usage.

1. Unplug the vacuum cleaner.
2. Locate the HEPA filter compartment (refer to your appliance diagram if unsure).
3. Remove the HEPA filter.
4. Tap the filter gently over a waste bin to remove loose dust. Do not wash the HEPA filter unless specified as washable.
5. If the filter is washable, rinse it under cold running water without rubbing. Allow it to air dry completely for at least 24 hours before reinserting.
6. Replace the filter if it is heavily soiled or damaged.
7. Reinsert the clean/new HEPA filter and close the compartment.

General Cleaning:

- Wipe the exterior of the vacuum cleaner with a soft, damp cloth. Do not use abrasive cleaners.
- Check the floor nozzle and accessories for any blockages or tangled hair and remove them.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Vacuum cleaner does not start.	No power supply.	Check if the plug is securely inserted into the outlet. Check the circuit breaker.
Poor suction power.	Dust bag is full.	Replace the dust bag.
	Filter is clogged.	Clean or replace the HEPA filter.
	Hose, tube, or nozzle is blocked.	Check and remove any blockages.
Unusual noise during operation.	Foreign object in the fan or motor.	Immediately turn off and unplug. Inspect for foreign objects. If noise persists, contact service.
