Nania ALPHIX

Nania ALPHIX i-Size Booster Seat Instruction Manual

Model: ALPHIX (2149110257A)

1. Introduction

Thank you for choosing the Nania ALPHIX i-Size Booster Seat. This manual provides essential information for the correct installation, safe use, and maintenance of your booster seat. Please read these instructions carefully before use and keep them in a safe place for future reference. This booster seat is designed for children with a height between 126 cm and 150 cm, typically from 8 to 12 years old, and a maximum weight of 40 kg.

2. Safety Information

- **i-Size R129 Standard:** This booster seat is approved according to the latest i-Size R129 safety standard, ensuring high safety performance.
- **Forward-Facing Use Only:** The ALPHIX booster seat must always be installed in a forward-facing position in the vehicle.
- **Vehicle Seat Belt:** Always secure your child using the vehicle's 3-point seat belt. The booster seat itself does not have an integrated harness.
- **Isofix System:** The Isofix connectors provide a secure and stable attachment to your vehicle's Isofix anchor points, reducing the risk of incorrect installation.
- **Child Height and Weight:** Use this booster seat only for children within the specified height range of 126 cm to 150 cm and a maximum weight of 40 kg.
- **Accident Replacement:** If the booster seat has been involved in an accident, even a minor one, it must be replaced immediately as its structural integrity may be compromised.
- **Supervision:** Never leave a child unattended in the booster seat.

3. Product Features

- **i-Size R129 Approval:** Complies with the latest European safety regulations.
- **Isofix Fixations:** For quick, secure, and stable installation in compatible vehicles.

- **Integrated Armrests:** Provides additional comfort for the child during travel.
- **EPP Material Shell:** Constructed with lightweight and sturdy Expanded Polypropylene (EPP) for enhanced impact absorption.
- **Made in France:** Designed, manufactured, and tested in France.

EPP Material: The booster seat features a lightweight and sturdy EPP shell for enhanced safety and durability.

Made in France: This product is manufactured and tested in France.

4. Setup and Installation

The Nania ALPHIX booster seat is designed for easy and secure installation using the Isofix system and the vehicle's 3-point seat belt.

1. **Prepare the Booster Seat:** Ensure the Isofix connectors are fully extended from the base of the booster seat. You may need to press a release button to extend them.
2. **Locate Isofix Anchor Points:** Identify the Isofix anchor points in your vehicle's rear seat. These are typically located between the seat back and the seat cushion and may be marked with an Isofix symbol.
3. **Attach Isofix Connectors:** Align the booster seat's Isofix connectors with the vehicle's anchor points. Push the booster seat firmly until the connectors click securely into place. Indicators on the connectors should turn green to confirm correct attachment.
4. **Push Firmly:** Once attached, push the booster seat firmly against the vehicle's seat back to ensure a tight fit.
5. **Place the Child:** Seat your child in the booster seat.
6. **Secure with Vehicle Belt:** Route the vehicle's 3-point seat belt across your child and through the designated guides on the booster seat. The lap belt should sit low across the child's hips, and the shoulder belt should rest across the center of the child's shoulder and chest, away from the neck. Ensure the belt is not twisted and is pulled taut.

Isofix Connectors Extended: Ensure the Isofix connectors are fully extended before installation.

Isofix Attachment: Push the connectors until they click into the vehicle's anchor points.

Child Secured: Always use the vehicle's 3-point seat belt, ensuring it is correctly positioned.

5. Operating Instructions

Once the booster seat is correctly installed and the child is seated, ensure the following for every journey:

- **Belt Positioning:** The lap portion of the vehicle's 3-point seat belt must pass low over the child's pelvis, not over the stomach. The diagonal shoulder portion of the belt must pass over the child's shoulder and chest, not across the neck or off the shoulder.
- **Belt Tension:** The seat belt must be pulled taut, with no slack.
- **Child Comfort:** Ensure the child is comfortable and the armrests are not obstructing the belt path.
- **Regular Checks:** Periodically check that the booster seat remains securely attached to the Isofix anchor points and that the vehicle's seat belt is correctly positioned and tensioned.

6. Maintenance

- **Cleaning:** The booster seat cover can typically be removed for cleaning. Refer to the care label on the fabric for specific washing instructions. For the plastic parts, wipe clean with a damp cloth and mild soap. Do not use harsh chemicals or abrasive cleaners.
- **Inspection:** Regularly inspect the booster seat for any signs of wear, damage, or loose parts. If any damage is found, discontinue use and contact customer support.

- **Storage:** When not in use, store the booster seat in a cool, dry place away from direct sunlight.

7. Specifications

Feature	Specification
Model	ALPHIX (2149110257A)
Brand	Nania
Approval Standard	i-Size R129
