7. MAINTENANCE

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage the wood grain laminate finish. For glass, use a standard glass cleaner.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Retighten as necessary.
- **Spills:** Clean up spills immediately to prevent staining or damage to the finish.

8. TROUBLESHOOTING

- **Wobbly Cabinet:** Ensure the cabinet is placed on a level surface. Check that all assembly hardware is securely tightened. If necessary, adjust the non-marking foot pads to stabilize the unit.
- **Doors Not Aligning:** The soft-close hinges are often adjustable. Refer to the hinge manufacturer's instructions (if provided) or consult a professional for minor adjustments to ensure proper door alignment.
- **Drawers Sticking:** Ensure the drawer slides are clean and free of debris. Check that the drawers were assembled correctly and are not overloaded.
