SETUP GUIDE

Unpacking and Initial Assembly

Carefully unpack all components from the box. Refer to the included diagram (Figure 2) for component identification. It is recommended to lay out all parts before beginning assembly.

Your browser does not support the video tag.

Video 1: AODSK electronic drum kit product introduction, demonstrating unpacking and initial setup.

Assembling the Drum Rack

Assemble the main drum rack frame according to the visual guide. Ensure all clamps and screws are securely tightened to prevent wobble during play. The sturdy frame provides a stable foundation for your drumming.

Figure 3: The drum set's compact and portable design.

Attaching Pads and Cymbals

Attach the mesh snare pad, tom-toms, hi-hat, crash, and ride cymbals to their designated positions on the rack. Adjust their height and angle for comfortable playing. The full mesh drum heads provide a realistic and responsive feel.

Full Mesh Drum Heads

Electronic Drum Set with Quiet Mesh Pads

AODSK fully mesh electronic drum kit provides drummers with the most realistic and responsive feel.

Connecting the Kick Drum and Pedals

Position the independent ultra-durable kick tower and attach the metal kick pedal. Connect the hi-hat pedal. The independent mesh kick tower pad works well with the attached high-quality metal kick pedal, restoring a real drum percussion feeling.

COMPLETE EIGHT-PIECE SET

- 1 8 " SNARE PAD
- 2 8 " TOM*3
- 3 10 " HI-HAT CYMBAL
- 4 10 " CRASH CYMBAL
- 5 10 " RIDE CYMBAL
- 6 6 " KICK DRUM
- 7 SOUND MODULE
- 8 HI-HAT PEDAL
- 9 KICK PEDAL
- 10 DRUM THRONE
- 11 DRUM STICKS
- 12 DRUM STAND

Figure 5: Independent Ultra-Durable Kick Tower.

Connecting the Trigger Module

Mount the trigger module to the rack. Connect each drum pad and cymbal to the corresponding input on the module using the provided cables. Ensure all connections are secure.

Folding and Portable

It is also very convenient to carry after folding, so you can play whenever you want.

Figure 6: Powerful Drum Module with extensive sound library.

Powering On

Connect the power adapter to the module and a power outlet. Press the power button on the module to turn on the drum set. The display will illuminate, indicating it is ready for use.

OPERATING YOUR DRUM SET

Sound Module Overview

The trigger module is the brain of your drum set, offering a vast library of sounds and customizable options. Use the intuitive controls to navigate settings and select sounds.

Selecting Drum Kits and Sounds

Navigate through 35 preset drum kits and 1 user-customizable drum kit. Access 455 electronic drum sounds and a

comprehensive GM standard sound library to suit any genre or style. Use the 'Voice' and 'KitNum' settings on the module's display to browse and select your desired sounds and kits.

Practice Features

The drum set includes 50 demo songs for practice, allowing you to play along and improve your rhythm. Adjust GM and kit volume as needed for optimal listening. A built-in metronome is available to help with timing and maintaining a steady beat during practice sessions.

Connectivity

The module features USB MIDI connectivity, enabling seamless integration with computers and other MIDI devices for recording, production, or using virtual instruments. Use the headphone jack for silent practice, allowing you to play without disturbing others. Audio input/output ports are available for connecting external audio sources (e.g., MP3 player) or sending audio to an amplifier or mixing console.

Figure 7: Rich Extension Functions for versatile connectivity.

MAINTENANCE AND CARE

Cleaning

Regularly wipe down the drum pads, cymbals, and module with a soft, dry cloth to remove dust and fingerprints. Avoid using abrasive cleaners, solvents, or excessive moisture, as these can damage the surfaces and internal components.

Pad and Cymbal Care

The mesh drum pads are designed for durability and a realistic feel. While robust, avoid excessive force or sharp objects when playing to prevent damage. Cymbals are made of high-quality silicone material; ensure they are not bent or creased during transport or storage. The choke function on crash and ride cymbals is activated by pinching the edge.

Figure 8: High-Order Drum Cymbals with choke function.

Cable Management

Keep all cables neatly organized using cable ties or wraps to prevent tangling, tripping hazards, and potential damage. Avoid sharp bends or kinks in the cables, as this can lead to internal wire breakage over time.

Storage

When not in use for extended periods, store the drum set in a dry, temperature-controlled environment away from direct sunlight or extreme temperatures. The set's foldable and portable design allows for convenient storage and transport, protecting components from dust and damage.

TROUBLESHOOTING

If you encounter any issues with your AODSK Electric Drum Set, please refer to the following common troubleshooting steps:

No Sound

- Check all cable connections between pads/cymbals and the module to ensure they are securely plugged in.
- Ensure headphones or external speakers are properly connected to the module's audio output and their volume is turned up.
- Verify the module is powered on and the master volume knob is not set to minimum.

Inconsistent Triggering

- Ensure drum pads are securely mounted to the rack and not loose.
- Check for any visible damage to the mesh heads or cymbal surfaces.
- If available, adjust sensitivity settings on the trigger module to match your playing style.

Pedal Issues

- Ensure the kick pedal and hi-hat pedal are properly connected to their respective inputs on the module.
- Check for any physical obstructions or damage to the pedal mechanisms that might prevent proper movement.

Connectivity Problems (USB/MIDI)

- Ensure correct drivers are installed on your computer if required by your operating system or software.
- Verify the USB cable connection between the module and your computer.
- Check MIDI settings on both the module and the connected software/device to ensure proper communication protocols are selected.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	AODSK
Model Name	UAED-5DS
Item Model Number	AED-500

Feature	Detail
Item Weight	40 Pounds
Product Dimensions (L x W x H)	47 x 39 x 43 inches
Body Material	Iron, Plastic, Silicone, Polymer, Metal
Material Type	Alloy Steel
Color	White
Finish Type	Powder Coated
Connector Type	USB Type A
Included Components	Drum Throne, Sticks, Headphones, Electronic Drum Kits
Manufacturer	China
