3. SETUP INSTRUCTIONS

Water Dental Flosser Setup

- Charge the Device:** Before first use, fully charge the water flosser using the provided USB cable. The charging indicator will show status.
- Fill the Reservoir:** Open the wide mouth reservoir and fill it with lukewarm water. Close the reservoir securely.
- Attach Nozzle:** Select your desired nozzle and insert it firmly into the hole on the top of the flosser handle until it clicks into place.

More Convenient And Effective Than Floss

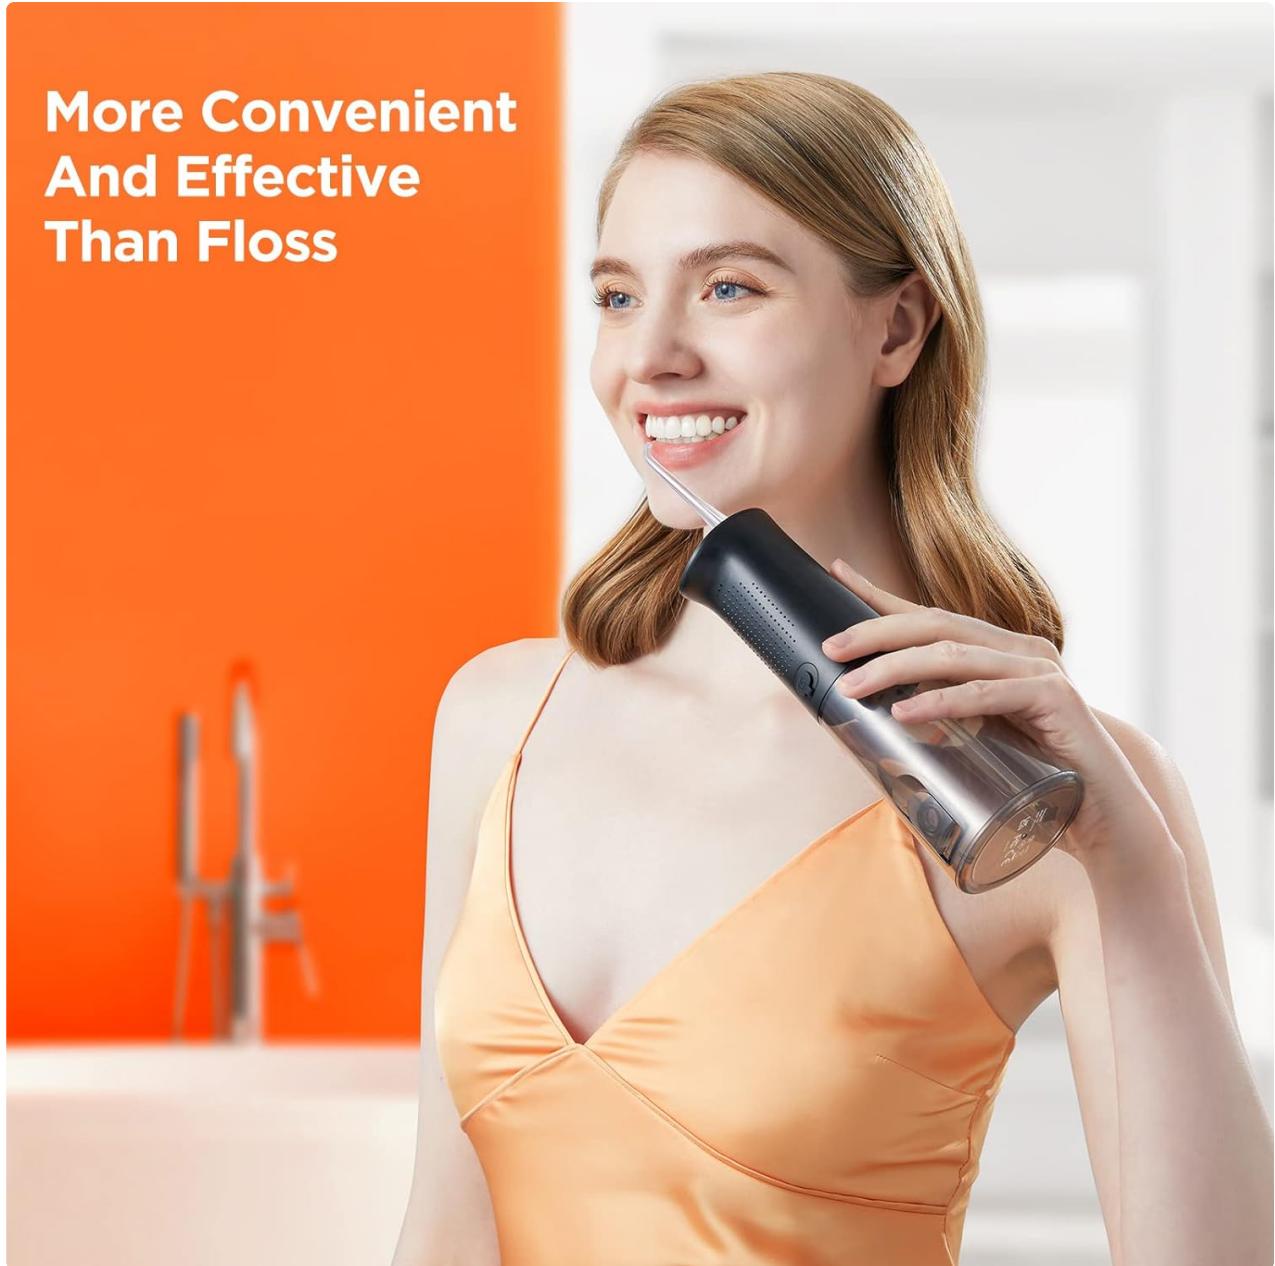

Image: A hand cleaning the wide-mouth reservoir of the Bitvae water flosser under running water with a brush, highlighting its easy-to-clean design.

Electric Toothbrush Setup

- Charge the Device:** Fully charge the toothbrush using the provided USB cable before initial use.
- Attach Brush Head:** Align the brush head with the metal shaft on the toothbrush handle and push down firmly until it is securely in place.

4. OPERATING INSTRUCTIONS

Using the Water Dental Flosser

- Power On:** Press the power button to turn on the flosser.
- Select Mode:** Press the mode button to cycle through the available cleaning modes (e.g., Clean, Soft, Pulse).
- Flossing Technique:** Lean over a sink, place the nozzle tip in your mouth, and aim the water stream at

the gumline at a 90-degree angle. Move along the gumline, pausing briefly between teeth.

4. **Power Off:** Press the power button again to turn off the flosser.

Image: A woman smiling and holding the Bitvae water flosser to her mouth, demonstrating its use.

Using the R2 Electric Toothbrush

1. **Apply Toothpaste:** Apply a small amount of toothpaste to the brush head.
2. **Power On:** Press the power button to turn on the toothbrush.
3. **Select Mode:** Press the mode button to cycle through the 5 available modes: Clean, Sensitive, White, Gum Care, and Tongue.
4. **Brushing Technique:** Place the brush head against your teeth at a slight angle towards the gumline. Move the brush slowly from tooth to tooth, allowing the rotating head to clean each surface.
5. **Smart Timer:** The toothbrush features a 2-minute smart timer to ensure you brush for the dentist-recommended time, with a 30-second reminder to move to the next quadrant of your mouth.
6. **Pressure Sensor:** An integrated pressure sensor alerts you if you are brushing too hard, helping to protect your gums and teeth.

7. **Power Off:** Press the power button again to turn off the toothbrush.

5. MAINTENANCE AND CARE

Water Dental Flosser Maintenance

- **Empty and Dry Reservoir:** After each use, empty any remaining water from the reservoir and allow it to air dry to prevent mold and mildew.
- **Clean Nozzles:** Rinse nozzles under running water after each use. For deeper cleaning, soak them in a solution of 2 parts water to 1 part white vinegar for 15-30 minutes once a month.
- **Wipe Down Unit:** Wipe the exterior of the flosser with a soft, damp cloth. Do not submerge the main unit in water.

Electric Toothbrush Maintenance

- **Rinse Brush Head:** After each use, rinse the brush head thoroughly under running water while the toothbrush is still on to remove any remaining toothpaste and debris.

- **Clean Handle:** Wipe the toothbrush handle with a damp cloth. Do not use abrasive cleaners.
- **Replace Brush Heads:** It is recommended to replace brush heads every 3 months, or sooner if the bristles become frayed. The bundle includes 8 toothbrush heads, providing approximately 2 years of use.

Visible Pressure Sensor Helps Protect Gums

Image: Eight individual toothbrush heads with blue and white bristles, indicating a supply for extended use.

6. TROUBLESHOOTING

Issue	Possible Cause	Solution
Device not turning on	Low battery; Device malfunction	Ensure device is fully charged. If issue persists, contact customer support.
Weak water pressure (Flosser)	Low water level; Clogged nozzle; Air in pump	Refill reservoir. Clean nozzle. Prime pump by running flosser over a sink until water flows steadily.

Issue	Possible Cause	Solution
Toothbrush not charging	Faulty USB cable/adapter; Dirty charging port	Try a different USB cable and adapter. Clean the charging port on the toothbrush handle.
Excessive vibration/noise (Toothbrush)	Brush head not properly attached	Remove and re-attach the brush head, ensuring it is firmly seated.
