KEY FEATURES

1080P Front and Rear Camera System

Designed for comprehensive protection, the S-Drive display is equipped with a 1080p Full HD front camera that records the road ahead and a Full HD rear backup camera for confident parking and reversing. This dual-channel system allows you to stream and save footage for incident review or travel memories.

10" Crystal-Clear Touch Screen Display

Suitable for browsing menus, watching movies, or utilizing navigation apps.

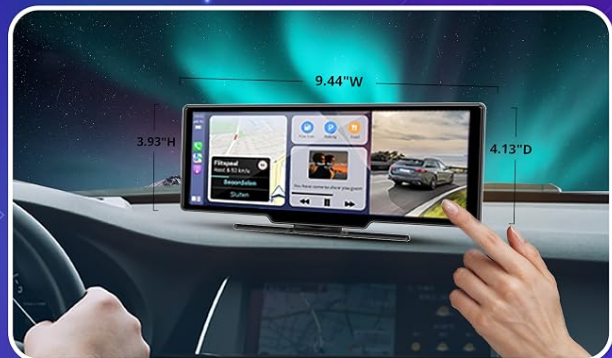

Figure 3: Integrated Front and Rear Cameras

Apple CarPlay & Android Auto Compatibility

Transform your vehicle into a smart hub with seamless access to your smartphone's features. The display interacts wirelessly via Bluetooth and WiFi, enabling quick access to navigation (Google Maps), music streaming (Spotify, Apple Music), hands-free communication, and more.

AUX & FM Transmission

Features an FM Transmitter for broadcasting audio as a radio signal, and an AUX cable for an AUX connection.

Figure 4: Wireless CarPlay and Android Auto

AUX/FM Transmission

For versatile audio output, the S-Drive Display includes an FM Transmitter to broadcast audio as a radio signal to your car's stereo, and an AUX cable for a direct wired connection. This provides flexible options for integrating audio with your vehicle's sound system.

Built-In Front Dash Cam & Rear Camera for Security

Record and save evidence for driving incidents, the S-Drive Display sports an HD front camera, and a rear backup camera to help you park and reverse with confidence.

10.26-inch HD Touch Screen Display

The large 10.26-inch HD touch screen provides crystal-clear images and responsive interaction. Its brilliant colors and fine details make browsing menus, watching videos, or utilizing navigation apps a visually engaging experience.

Free Rear Backup Camera Included

The backup view will be sent to the display when the vehicle is put into reverse, viewing all reversing details on the display along with guiding angles.

SETUP & INSTALLATION

The BlackboxMyCar S-Drive is designed for quick and hassle-free installation, often taking under 5 minutes for basic setup. No specialized expertise is required for the main unit.

Main Unit Installation

1. **Mounting:** The display unit comes with an adhesive sticker bracket for dashboard mounting. Ensure the mounting surface is clean and dry before applying.
2. **Power Connection:** Connect the unit's Type-C power interface to your car's cigarette lighter adapter using the provided cable.

Install Under 5 Minutes

It includes a Type-C Power Supply Interface that connects to your car's cigarette lighter adapter for hassle-free installation. No technical expertise required simply plug it in, and enjoy the S-Drive advantages on the go.

Figure 8: Easy Installation with Adhesive Mount

Rear Backup Camera Installation (Optional)

For automatic activation of the backup camera when reversing, you will need to connect the rear camera's power wire (short red wire) to your vehicle's reverse light wire and ground the black wire to the vehicle's frame. This may require professional installation or basic automotive wiring knowledge.

Apple CarPlay & Android Auto Compatibility

Enables full mapping data through Google Maps, hands-free messaging and calls and access to your favourite music streaming sources such as Spotify, Apple Music, and Deezer.

Installation Videos

For a visual guide on setup and installation, please refer to the following videos:

Video 1: BlackboxMyCar S-Drive 10.26" Android Auto and Apple CarPlay (Official Seller Video)

This video provides an overview of the S-Drive display's features and a brief demonstration of its capabilities.

Video 2: Perfect Unit for an Older Car (Customer Review)

This customer video demonstrates the setup and functionality of the S-Drive display, particularly useful for integrating into older vehicle models.

Connecting to Apple CarPlay / Android Auto

1. Ensure your smartphone's Bluetooth and Wi-Fi are enabled.
2. On the S-Drive display, navigate to the 'Apple CarPlay' or 'Android Auto' icon.
3. Follow the on-screen prompts to pair your phone via Bluetooth. Once paired, the system will automatically establish a Wi-Fi connection for CarPlay/Android Auto functionality.

Using the Dashcam

The integrated front dashcam continuously records footage to the included 64GB microSD card. The rear camera also records if connected.

- **Recording:** Recording typically starts automatically when the device powers on.
- **Playback:** Access recorded videos through the 'DVR' or 'Playback' option on the main menu. You can review footage directly on the 10.26-inch screen.
- **Loop Recording:** The system supports loop recording, overwriting the oldest files when the memory card is full. Important footage can be manually locked to prevent overwriting.
- **G-Sensor:** The built-in G-sensor detects sudden impacts or collisions and automatically locks the current recording to a protected folder.

Backup Camera Functionality

If the rear backup camera is installed and wired to your vehicle's reverse lights, the display will automatically switch to the rear camera view when you engage reverse gear, providing a clear view with guiding lines for safe parking.

Audio Output Options

You can output audio from the S-Drive display to your car's sound system using one of the following methods:

- **Internal Speaker:** Audio can be played directly through the S-Drive's built-in speaker.
- **AUX Connection:** Use the provided AUX cable to connect the S-Drive to your car's AUX input for higher fidelity audio.
- **FM Transmitter:** Select an unused FM frequency on the S-Drive and tune your car's radio to the same frequency to broadcast audio wirelessly.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the display screen. For stubborn smudges, a slightly damp, lint-free cloth can be used. Avoid abrasive cleaners or solvents.
- **MicroSD Card:** Periodically format the microSD card (e.g., once a month) to ensure optimal recording performance and prevent data corruption. Back up any important footage before formatting.
- **Software Updates:** Check the official BlackboxMyCar website or support channels for any available firmware updates to ensure your device has the latest features and performance improvements.

TROUBLESHOOTING

- **Device Not Powering On:** Ensure the cigarette lighter power cable is securely connected to both the device and the car's power outlet. Check if the car's power outlet is functioning.
- **CarPlay/Android Auto Not Connecting:** Verify that Bluetooth and Wi-Fi are enabled on your smartphone. Try restarting

both the S-Drive unit and your phone. Ensure the device is selected in your phone's CarPlay/Android Auto settings.

- **No Rear Camera Display:** Confirm the rear camera cable is properly connected to the main unit. If wired for automatic activation, check the connection to the reverse light and ground.
- **Poor Audio Quality (FM Transmission):** Try selecting a different FM frequency on the S-Drive that is clear and free from local radio interference. Ensure your car's radio is tuned to the exact same frequency.
- **Date and Time Issues:** If the unit loses date and time settings, ensure it is consistently connected to power when the vehicle is in use. Connecting to Apple CarPlay or Android Auto should automatically sync the time from your phone.

SPECIFICATIONS

Brand	BlackboxMyCar
Model	S-Drive 10.26"
