

Safariland 6004-25-2

Safariland Drop Flex Adapter with Single Strap Leg Shroud
Instruction Manual

Model: 6004-25-2

INTRODUCTION

The Safariland Drop Flex Adapter with Single Strap Leg Shroud is designed to provide a secure and comfortable platform for carrying a holster on the thigh. This system lowers the holster position, allowing for easier access and improved comfort, especially when wearing body armor or other gear. Constructed from durable SafariLaminate material, it ensures reliability and longevity in various conditions.

SETUP AND INSTALLATION

Follow these steps to properly install your Safariland Drop Flex Adapter and Leg Shroud:

- 1. Attach to Belt:** Slide the top attachment of the Drop Flex Adapter onto your duty belt. Ensure it is positioned comfortably on your hip, allowing the shroud to rest on your thigh.
- 2. Secure Holster:** Align the mounting holes on your Safariland holster with the corresponding holes on the Drop Flex Adapter. Use the provided hardware (screws and nuts) to securely fasten the holster to the adapter. Ensure all connections are tight.
- 3. Adjust Leg Strap:** Wrap the single leg strap around your thigh. Adjust the strap for a snug fit that prevents excessive movement without being overly restrictive. The silicone strips on the strap help prevent slippage. Secure the buckle.

The Drop Flex Adapter is designed for efficient and secure firearm retention and access:

- **Drawing the Firearm:** Engage the holster's retention mechanism as per its specific instructions (e.g., thumb release for ALS holsters). With a firm grip, draw the firearm smoothly upwards and outwards. The lowered position and leg strap help maintain holster stability during the draw.
- **Re-holstering:** Guide the firearm back into the holster until the retention mechanism engages. Ensure the firearm is fully seated and secured before releasing your grip.
- **Comfort and Stability:** The single leg strap, combined with the belt attachment, provides a stable platform that moves with your body, reducing shifting and discomfort during active use.

MAINTENANCE

To ensure the longevity and proper function of your Drop Flex Adapter:

- **Cleaning:** Wipe down the polymer plastic components with a damp cloth to remove dirt and debris. For stubborn grime, a mild soap solution can be used, followed by a rinse with clean water and thorough drying.
- **Strap Care:** Inspect the leg strap regularly for fraying or damage. Clean the strap with mild soap and water if needed, and allow it to air dry completely.
- **Hardware Inspection:** Periodically check all screws and fasteners to ensure they are tight. Re-tighten as necessary to maintain a secure connection between the adapter, holster, and belt attachment.
- **Storage:** Store the adapter and holster in a clean, dry environment away from extreme temperatures and direct sunlight.

TROUBLESHOOTING

If you encounter issues with your Drop Flex Adapter, consider the following:

- **Holster Feels Loose:** Ensure all mounting screws attaching the holster to the adapter are fully tightened. Check for any play in the belt attachment or leg strap.
- **Discomfort on Thigh:** Adjust the leg strap tension. It should be snug enough to prevent movement but not so tight as to restrict circulation or cause discomfort. Reposition the adapter on your belt for optimal alignment with your thigh.
- **Adapter Shifting:** Verify that the belt attachment is securely fastened to your duty belt and that the leg strap is properly tightened. The silicone strips on the leg strap are designed to minimize shifting.
- **Difficulty Drawing/Re-holstering:** Ensure your holster is correctly mounted and that its retention mechanism is functioning as intended. Practice drawing and re-holstering to become familiar with the system.

SPECIFICATIONS

Brand	Safariland
Model Number	6004-25-2
Material	Polymer Plastic
Color	Black
Size	One Size
Mounting Type	Thigh Mount
Item Weight	0.1 Pounds
Included Components	Product (Drop Flex Adapter with Single Strap Leg Shroud)
