MAINTENANCE

To ensure the longevity and appearance of your iPormis bed frame, follow these maintenance guidelines:

- **Fabric Care:** The upholstered parts of the bed frame should be dry cleaned only. Avoid using liquid cleaners or harsh chemicals, as these may damage the fabric.
- **Frame Cleaning:** Wipe metal and wood components with a soft, damp cloth. Avoid abrasive cleaners.
- **Drawer Maintenance:** Periodically check the wheels on the storage drawers for any debris and clean as needed to ensure smooth operation.
- **Hardware Check:** Regularly inspect all screws and bolts to ensure they remain tight. Re-tighten if necessary to maintain stability.

TROUBLESHOOTING

Noise Reduction

If you experience any creaking or noise from the bed frame, ensure all connections are securely tightened. The integrated EVA sponge is designed to minimize noise, but loose connections can still cause sounds. Re-check all bolts and screws.

Drawer Operation

If storage drawers are difficult to open or close, check for obstructions under the bed or in the wheel tracks. Ensure the drawers are properly aligned with the frame. If the drawers do not lock securely, verify that the locking mechanism is free of debris and engaging correctly.

Charging Station Issues

If the charging station is not functioning, ensure the bed frame is properly plugged into a working wall outlet. Check all cable connections to the charging ports. If issues persist, contact customer support.
