Accutime POK4405

Accutime Pokémon Pikachu POK4405 LED Watch User Manual

MODEL: POK4405

BRAND: ACCUTIME

1. Introduction

Welcome to the user manual for your new Accutime Pokémon Pikachu POK4405 LED Watch. This watch features a bright Pokémon digital display, a silver plastic case, a vibrant red LED display, and a fun Pokémon printed silicone strap with a traditional buckle closure. It is designed for ease of use and comes presented in official Pokémon packaging.

2. Setup

2.1 Initial Activation

Upon receiving your watch, you may need to remove a small plastic tab from the crown or button area. This tab prevents battery drainage during shipping. Gently pull and remove this tab to activate the watch's battery.

2.2 Setting the Time

1. Press the button on the side of the watch once to display the current time.
2. Press and hold the button for approximately 3 seconds until the hour digits begin to flash.
3. While the hour digits are flashing, press the button repeatedly to advance the hour. The time will cycle through AM/PM.

4. Once the correct hour is set, press and hold the button again for approximately 3 seconds until the minute digits begin to flash.
5. While the minute digits are flashing, press the button repeatedly to advance the minutes.
6. After setting the minutes, press and hold the button one last time for approximately 3 seconds to confirm the time and exit the setting mode. The display will stop flashing.

The watch is powered by 1 Lithium-ion battery, which is included.

3. Operating Instructions

3.1 Checking the Time

To view the time, simply press the button located on the side of the watch. The LED display will illuminate for a few seconds, showing the current time, then turn off automatically to conserve battery life.

3.2 Adjusting Time (if needed)

If the time needs to be adjusted after initial setup, follow the steps outlined in Section 2.2 'Setting the Time'.

4. Maintenance

4.1 Cleaning Your Watch

To clean your watch, gently wipe the watch face and strap with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish or the silicone strap.

4.2 Battery Care

The watch uses a Lithium-ion battery. If the display becomes dim or unresponsive, it may be time to replace the battery. Battery replacement should ideally be performed by a qualified technician to ensure proper sealing and functionality.

4.3 General Care

- Avoid exposing the watch to extreme temperatures (hot or cold) or direct sunlight for prolonged periods.
- While the watch is designed for daily wear, avoid submerging it in water or exposing it to excessive moisture unless specified as water-resistant.
- Protect the watch from strong impacts or drops, which could damage the internal components or the display.

5. Troubleshooting

5.1 Display Not Lighting Up

- Ensure the plastic battery tab has been completely removed.
- Press the side button firmly. If still no display, the battery may be depleted and require replacement.

5.2 Incorrect Time Display

- Follow the steps in Section 2.2 'Setting the Time' to re-adjust the time.
- If the time consistently loses accuracy, the battery may be low or require professional inspection.

6. Specifications
