- **Laptop not turning on:** Ensure the power adapter is securely connected and the outlet is functional. Try a different outlet. If on battery, ensure it is charged.
- **Battery not charging:** Verify the power adapter is correctly plugged into both the laptop and the wall. Check for any damage to the adapter or cable.

2. Connectivity Problems

- **Wi-Fi not connecting:** Check if Wi-Fi is enabled in Windows settings. Restart your router and the laptop. Ensure you are entering the correct Wi-Fi password.
