5. OPERATING INSTRUCTIONS

5.1 Basic Usage

Once connected, the keyboard functions as a standard QWERTY layout keyboard. Simply begin typing. The blue mechanical switches provide tactile feedback with each key press.

5.2 Lighting Control

The keyboard features an icy blue backlight with multiple lighting modes. Use the Function (Fn) key in combination

with other keys to adjust the lighting effects:

- **Fn + ` (tilde key):** Switch between different lighting effects/modes.
- **Fn + [{:** Decrease the brightness of the backlight.
- **Fn +] }:** Increase the brightness of the backlight.
- **Fn + ; :::** Slow down the light effect speed.
- **Fn + ' ":** Speed up the light effect.

5.3 Multimedia Functions

The keyboard supports multimedia functions. Specific key combinations for these functions are typically printed on the keycaps or can be accessed via the Fn key. Refer to the keycap legends for multimedia controls such as volume adjustment, play/pause, and track skipping.

6. MAINTENANCE

To ensure the longevity and optimal performance of your keyboard, follow these maintenance guidelines:

- **Cleaning:** Regularly clean the keyboard with a soft, dry cloth. For deeper cleaning, use compressed air to remove dust and debris from between the keycaps. For stubborn dirt, a slightly damp cloth with a mild

cleaning solution can be used, ensuring no liquid enters the keyboard.

- **Avoid Liquids:** Do not spill liquids on the keyboard. While it supports waterproof functionality, excessive liquid exposure can still cause damage.
- **Storage:** Store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the keyboard or subjecting it to strong impacts.

7. TROUBLESHOOTING

If you encounter issues with your keyboard, refer to the following common troubleshooting steps:

- **Keyboard Not Responding:**
 - Ensure the USB cable is securely connected to both the keyboard and the computer.
 - Try connecting the keyboard to a different USB port on your computer.
 - Test the keyboard on another computer to determine if the issue is with the keyboard or the computer's port/drivers.
- **Backlight Not Working:**
 - Check if the backlight is turned off or set to minimum brightness using the Fn key combinations (Fn + ` for mode, Fn + [for brightness).
 - Ensure the keyboard is properly powered via the USB connection.
- **Keys Not Registering:**
 - Clean the affected key(s) to remove any debris that might be obstructing the switch.
 - If the issue persists, contact customer support.
