QANYEGN QANYEGNodc9ms63ix

Lawn Mower Double Shoulder Carrier Instruction Manual

Brand: QANYEGN

Model: QANYEGNodc9ms63ix

INTRODUCTION

This professional double shoulder strap is designed to provide comfort and support when operating various large and heavy trimmers and brush cutters. It effectively distributes the weight of your equipment across your shoulders and back, reducing strain and fatigue during extended use. Made from durable plastic and polyester, this carrier is flexible, convenient, and built for long-lasting performance in outdoor yard work.

SETUP AND ADJUSTMENT

Proper setup of your QANYEGN Double Shoulder Carrier is crucial for comfort and effective weight distribution. Follow these steps to prepare your harness for use:

1. **Unpack the Harness:** Carefully remove all components from the packaging. You should have the main harness assembly with shoulder pads and the attachment plate with a hook.
2. **Don the Harness:** Put on the harness like a backpack. Ensure the shoulder pads rest comfortably on your shoulders.
3. **Adjust Shoulder Straps:** Use the adjustable buckles on the shoulder straps to tighten or loosen the harness until it fits snugly but comfortably. The harness should feel secure without restricting movement. The shoulder pads are designed with impact-softening material for enhanced comfort.
4. **Adjust Waist/Chest Strap (if applicable):** If your model includes a waist or chest strap, fasten it and adjust for additional stability.
5. **Attach Trimmer:** Locate the attachment hook on the lower part of the harness. Securely attach your trimmer or brush cutter to this hook. Ensure the connection is firm before operation.

Trimmer harness strap

Made of plastic and polyester , durable flexible and convenient.

OPERATING INSTRUCTIONS

Once the harness is properly adjusted and your equipment is attached, you are ready to begin your work. The double shoulder design is specifically engineered to distribute the weight of heavy trimmers, reducing strain on your hands, wrists, and lower back.

- **Maintain Balance:** While operating, ensure your body remains balanced. The harness will help support the weight, allowing you to focus on controlling the trimmer.
- **Ergonomic Use:** Allow the harness to bear the majority of the equipment's weight. This enables a more upright posture and reduces the need to hunch over, leading to a more relaxed and comfortable weeding or trimming experience.
- **Regular Breaks:** Even with the harness, it is advisable to take regular breaks during long periods of operation to prevent fatigue.

Double standard shoulder design, greatly distribute your heavy trimmer weight of you shoulder and back.

MAINTENANCE

To ensure the longevity and continued performance of your QANYEGN Double Shoulder Carrier, follow these simple maintenance guidelines:

- **Cleaning:** After each use, especially if exposed to dirt or moisture, wipe down the harness with a damp cloth. For stubborn dirt, a mild soap solution can be used. Rinse thoroughly and allow to air dry completely before storage. Do not machine wash or tumble dry.
- **Inspection:** Periodically inspect all straps, buckles, and the attachment hook for signs of wear, fraying, or damage. Ensure all stitching is intact.
- **Storage:** Store the harness in a cool, dry place away from direct sunlight and extreme temperatures. Avoid storing it in a compressed state for extended periods to maintain the integrity of the padding.

TROUBLESHOOTING

If you encounter any issues with your QANYEGN Double Shoulder Carrier, consider the following:

- **Discomfort During Use:**
 - *Solution:* Re-adjust the shoulder and waist straps. Ensure the harness is snug but not overly tight. The weight should be evenly distributed across both shoulders and your back. Check that the shoulder pads are positioned correctly.
- **Trimmer Feels Unstable:**
 - *Solution:* Verify that the trimmer is securely attached to the hook. Ensure the hook is fully engaged and locked (if applicable). Check for any obstructions that might prevent a stable connection.
- **Harness Slipping:**
 - *Solution:* Tighten all adjustable straps. The harness should not move excessively during operation. If straps are worn or damaged, consider replacement.

For issues not covered here, please refer to the Warranty and Support section.

SPECIFICATIONS

Detailed specifications for the QANYEGN Double Shoulder Carrier:

Feature	Detail
Manufacturer	QANYEGN
Part Number / Model	QANYEGNodc9ms63ix
Item Weight	1.52 pounds
Product Dimensions	0.39 x 0.39 x 0.39 inches (Note: These dimensions appear to be placeholder/incorrect for a harness, refer to image for visual scale)
Material	Plastic and Polyester
Item Package Quantity	1
First Available	November 28, 2023

Image: Dimensional diagram of the harness, indicating measurements such as 40cm/15.75in, 32cm/12.60in, 19cm/7.48in, and 33cm/12.99in.
