MAINTENANCE

Proper care and maintenance will extend the life of your remote control.

- **Battery Replacement:** Replace batteries when the remote's response becomes sluggish or stops working. Always replace both batteries at the same time with new AAA batteries. Do not mix old and new batteries, or different types of batteries.
- **Cleaning:** Use a soft, dry cloth to clean the remote control. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Avoid using harsh chemicals or abrasive cleaners, as these can damage the remote's surface or internal components.
- **Storage:** If the remote will not be used for an extended period, remove the batteries to prevent leakage, which can cause damage. Store the remote in a cool, dry place away from direct sunlight and extreme temperatures.
