Fudajo 64710

Fudajo 2-in-1 Pet Stroller

INSTRUCTION MANUAL

Model: 64710

Brand: Fudajo

Introduction

This manual provides detailed instructions for the assembly, operation, and maintenance of your Fudajo 2-in-1 Pet Stroller. Designed for small to medium dogs and cats up to 20 kg (44 lbs), this versatile stroller offers a comfortable and secure way to transport your pet during walks, errands, or vet visits. Its foldable design and detachable carrier ensure convenience and flexibility for various situations.

Safety Information

- **Maximum Load Capacity:** Do not exceed the maximum weight of 20 kg (44 lbs). Overloading can compromise stability and safety.
- Always secure your pet inside the carrier using a harness or leash attachment point to prevent them from jumping out.
- Ensure all locking mechanisms are fully engaged before placing your pet in the stroller or moving it.
- Do not leave pets unattended in the stroller, especially on inclines or near traffic.
- Avoid using the stroller on excessively steep inclines or highly uneven terrain that could cause it to tip over.
- Regularly inspect the stroller for any signs of wear, damage, or loose parts before each use.

Package Contents

Please check that all components are present in your package:

- Stroller Frame

- Detachable Pet Carrier
- Front Wheels (2)
- Rear Wheels (2)
- Bottom Storage Basket
- Instruction Manual (this document)

Setup

1. **Unfolding the Frame:** Carefully unfold the stroller frame until it fully extends and locks into place. Listen for a click sound to confirm it's secure.
2. **Attaching the Wheels:** Insert the front wheels into their designated slots at the front of the frame. Repeat for the rear wheels. Ensure all wheels are firmly attached and rotate freely.
3. **Installing the Bottom Storage Basket:** Attach the storage basket to the hooks or clips located on the lower part of the stroller frame.
4. **Mounting the Pet Carrier:** Align the detachable pet carrier with the attachment points on the stroller frame. Press down firmly until it clicks securely into place.

Operating Instructions

Using the Stroller:

- Placing Your Pet:** Open the front mesh cover of the carrier using the zipper. Gently place your pet inside and secure them using the internal leash clip if desired. Close the zipper completely.
- Ventilation and Sun Protection:** The carrier features breathable mesh on the front and rear for optimal ventilation. The opaque top provides protection from direct sunlight.
- Maneuvering:** The durable EVA rubberized wheels are suitable for various surfaces, including paved roads, forest paths, and field trails. The front wheels can swivel for easy turning or be locked for straight-line travel (refer to image below for wheel lock).

4. **Braking:** Engage the rear wheel brakes when stopping or parking the stroller to prevent accidental movement.

Detaching the Carrier:

1. Locate the release mechanisms on both sides of the carrier where it connects to the frame.
2. Press or slide the release buttons/levers simultaneously and lift the carrier upwards to detach it from the frame.
3. The detached carrier can be used for manual transport or as a pet seat in a vehicle.

Folding the Stroller:

1. First, remove the pet carrier from the frame.
2. Locate the folding mechanism on the stroller frame (typically near the handle or base).
3. Activate the mechanism and fold the frame compactly for convenient storage or transport.

Image: Close-up showing the mechanism to lock or unlock the swivel function of the front wheels.

Maintenance

- **Cleaning Fabric:** The fabric parts of the carrier can be spot cleaned with a damp cloth and a mild, pet-safe detergent. Allow to air dry completely before reassembly or storage. Do not machine wash.
- **Cleaning Frame:** Wipe the metal frame with a damp cloth to remove dirt and dust. Avoid using abrasive cleaners or solvents that could damage the finish.

- Wheel Care:** Periodically check the wheels for any accumulated debris (e.g., hair, dirt) and remove it. Ensure the wheels spin freely. If they become stiff or squeaky, a small amount of silicone-based lubricant can be applied to the axles.
- Storage:** When not in use, store the stroller in a dry, cool place away from direct sunlight to prevent material degradation.

Troubleshooting

Problem	Possible Cause	Solution
Stroller does not fold/unfold easily.	Locking mechanisms are engaged or frame is misaligned.	Ensure all locks are disengaged. Gently wiggle the frame to align components. Do not force the mechanism.
Wheels are stiff or squeaky.	Debris in axles or lack of lubrication.	Clean wheels and axles thoroughly. Apply a small amount of silicone-based lubricant to the moving parts if needed.
Carrier does not attach securely to frame.	Improper alignment or debris in attachment points.	Ensure carrier is correctly oriented and attachment points are clear of obstructions. Press firmly until it clicks into place.

Specifications

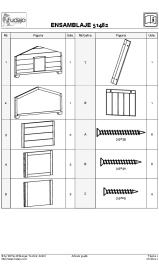

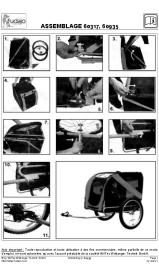

Feature	Detail
Model Number	64710
Color	Black
Material	Ethylene-Vinyl Acetate (EVA) wheels, Plastic frame
Product Dimensions (L x W x H)	76 x 52 x 99.5 cm (approx. 29.9 x 20.5 x 39.2 inches)
Item Weight	7.02 kg (approx. 15.48 lbs)
Maximum Recommended Weight	20 kg (approx. 44 lbs)
Carrier Dimensions (L x W x H)	Approx. 580 x 380 x 570 mm (22.8 x 15 x 22.4 inches)
Recommended Age Range	All life stages
Usage Area	Outdoor
