Haccah LE004

Haccah Candle Making Kit with Wax Melter

MODEL: LE004 - INSTRUCTION MANUAL

Introduction

This manual provides detailed instructions for the safe and effective use of your Haccah Candle Making Kit, Model LE004. Designed for both beginners and experienced crafters, this kit includes all necessary components to create custom scented candles. Please read all instructions carefully before beginning your candle making process.

Image: A family engaged in candle making, illustrating the kit's ease of use for various ages.

Safety Information

- **Heat Hazard:** The electric stove and melted wax will be extremely hot. Always use caution and wear appropriate protective gear, such as heat-resistant gloves.
- **Fire Hazard:** Never leave the electric stove or melting wax unattended. Keep flammable materials away from the heat source and open flames.
- **Ventilation:** Ensure adequate ventilation in your workspace to disperse fumes from melting wax and essential oils.
- **Children and Pets:** Keep all components of the kit, especially hot items and essential oils, out of reach of children and pets. Adult supervision is required if children are participating.
- **Electrical Safety:** Do not immerse the electric stove in water. Ensure the power cord is not damaged and is kept away from hot surfaces.
- **Dried Flowers:** If using dried flowers, place them away from the wick to prevent them from catching fire. Use

sparingly (2-3 pieces per candle).

Package Contents

Verify that all items listed below are present in your Haccab Candle Making Kit:

Package Contains

1*Black electric stove

1*Metal pouring pot

1*Spoon

1 *Thermometer

18*Candle Jar

30 *Candle wicks

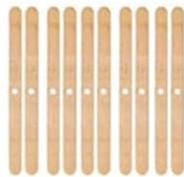

9*Beeswax

24 *Warning labels

9*Aromatherapy
(Rose,Eucalyptus, Lemon,Orange,
Mint,Jasmine, Apple Cinnamon,
Lavender,Tea Tree)

10* Wick clips

1* Rubber pads

20 *Dye block

4* Dried flowers
(lavender, jasmine,
rose, chrysanthemum)

1*Small scissors

20*Sticker

1*Silicone anti
scalding pad

Image: An organized display of all items included in the kit, such as the electric stove, pouring pot, wax, wicks, and scents.

- 1 x Black Electric Stove
- 1 x Metal Pouring Pot
- 1 x Spoon
- 1 x Thermometer
- 18 x Candle Tins
- 30 x Candle Wicks
- 9 x Bags of Beeswax (3.0 lbs total)

- 24 x Warning Labels
- 9 x Essential Oil Scents (Rose, Eucalyptus, Lemon, Orange, Mint, Jasmine, Apple Cinnamon, Lavender, Tea Tree)
- 10 x Wick Clips
- 1 x Rubber Pad
- 20 x Dye Blocks
- 4 x Dried Flowers (Lavender, Jasmine, Rose, Chrysanthemum)
- 1 x Small Scissors
- 20 x Stickers
- 1 x Silicone Anti-Scalding Pad

Setup

1. **Prepare Workspace:** Choose a clean, flat, and heat-resistant surface for your candle making. Place the silicone anti-scalding pad under the electric stove.
2. **Position Electric Stove:** Place the black electric stove on the prepared surface. Ensure it is stable and away from any flammable materials.
3. **Connect Power:** Plug the electric stove into a suitable power outlet. Do not turn it on yet.
4. **Prepare Pouring Pot:** Ensure the metal pouring pot is clean and dry before use.

Operating Instructions: Candle Making Process

Follow these steps to create your custom scented candles:

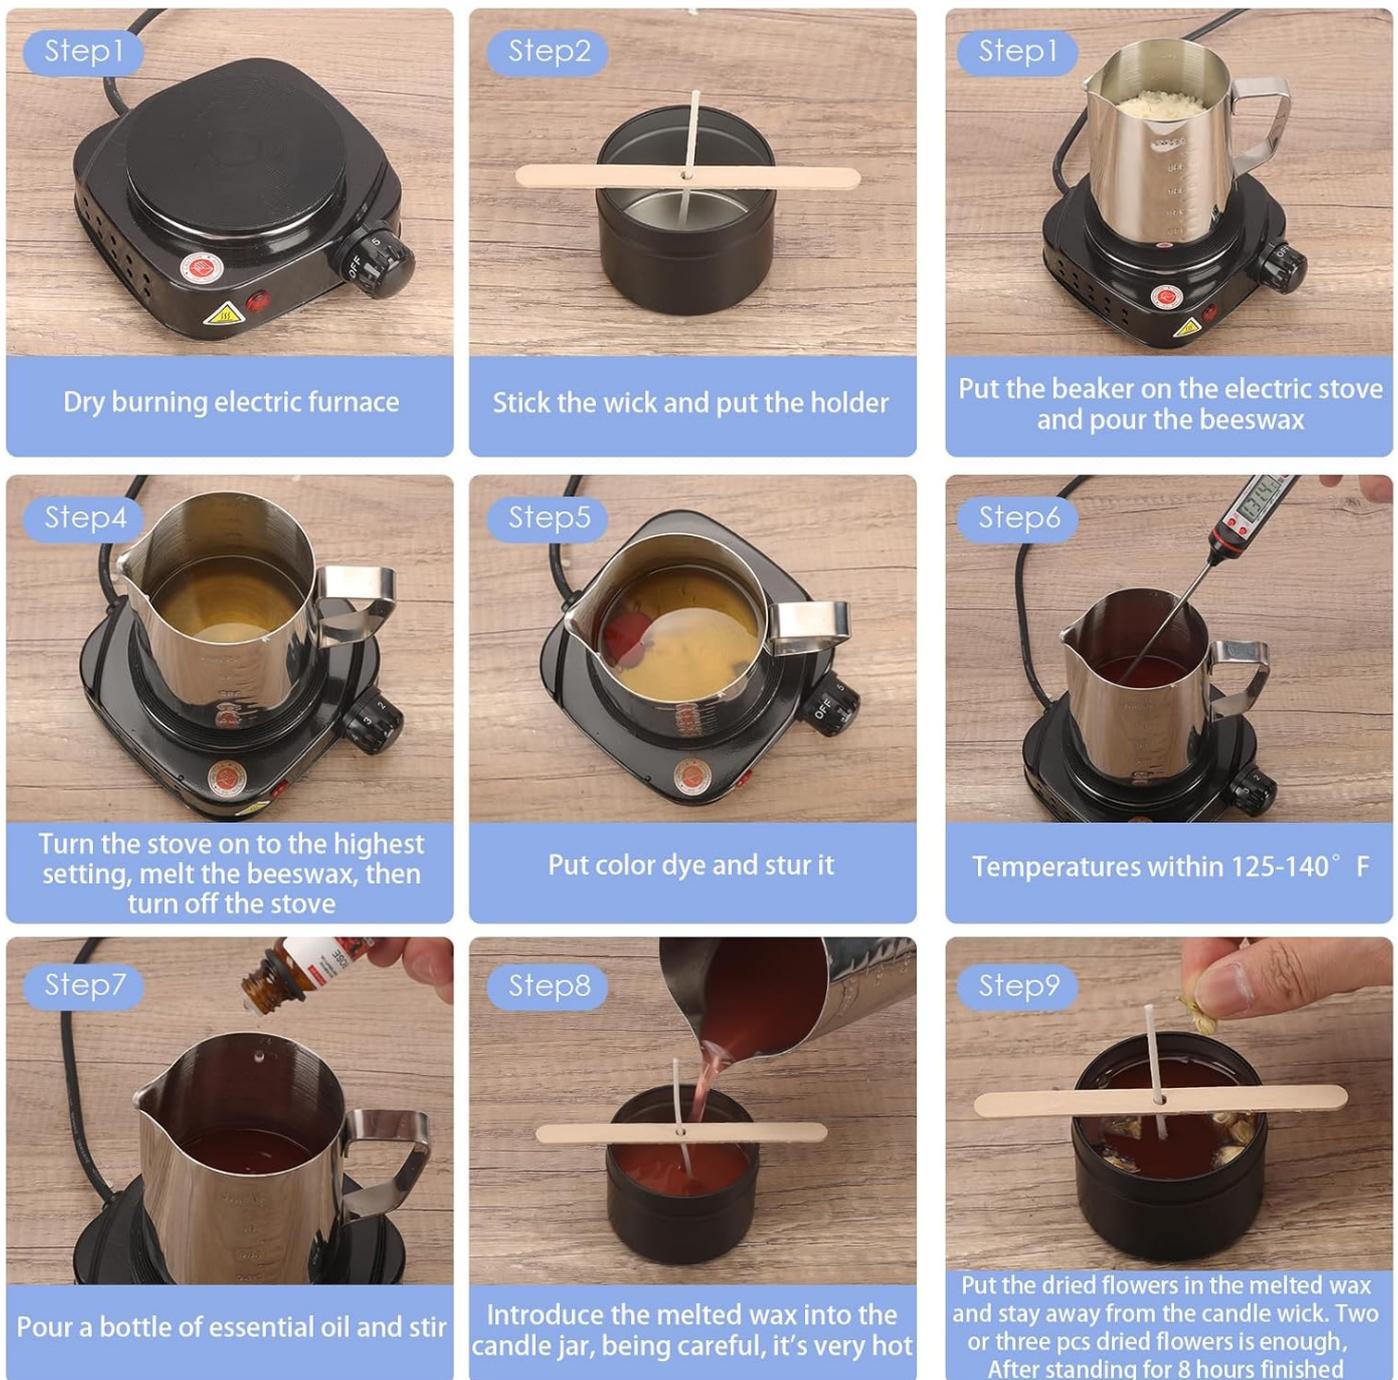

Image: A step-by-step visual guide demonstrating the candle making process.

1. **Prepare Candle Tins:** Place a wick in the center of each candle tin. Use a wick clip to hold the wick upright and centered. Secure the wick to the bottom of the tin with a wick sticker.
2. **Melt the Wax:** Pour the desired amount of beeswax into the metal pouring pot. Place the pouring pot onto the electric stove. Turn the stove to the highest setting.
3. **Monitor Temperature:** Insert the thermometer into the wax. Allow the wax to melt completely, stirring occasionally with the spoon. The ideal pouring temperature for soy wax is typically between 125-140°F (51-60°C). Once the wax reaches this temperature, turn off the electric stove.
4. **Add Dye (Optional):** If desired, add a dye block to the melted wax and stir thoroughly until the color is evenly distributed and the dye is fully dissolved.
5. **Add Essential Oil:** Once the wax has cooled slightly to around 125-140°F (51-60°C), add one bottle of your chosen essential oil scent. Stir gently for at least 2 minutes to ensure the oil is fully incorporated into the wax. Adding scent at a lower temperature helps preserve the fragrance.
6. **Pour Wax:** Carefully pour the scented, colored wax into the prepared candle tins. Ensure the wicks remain

centered.

- Add Dried Flowers (Optional):** If you wish to add dried flowers, gently place 2-3 pieces onto the surface of the wax, ensuring they are positioned away from the wick. This prevents them from catching fire during burning.
- Curing:** Allow the candles to cool and harden completely for at least 8 hours, or preferably 24-48 hours, at room temperature. This process, known as curing, helps the wax and fragrance bind, resulting in a stronger scent throw when burned.
- Trim Wicks:** Before lighting your candle for the first time, use the small scissors to trim the wick to approximately 1/4 inch (6mm) in length. This promotes a clean, even burn.

Image: Two finished candles adorned with dried flowers, alongside decorative heart-shaped wax melts.

Maintenance

- **Cleaning the Pouring Pot:** After use, allow any remaining wax in the pouring pot to cool and solidify. Gently scrape out the hardened wax. Wipe the interior with a paper towel to remove residue. For a deeper clean, you can use warm, soapy water, ensuring the pot is completely dry before next use.
- **Cleaning the Electric Stove:** Ensure the electric stove is unplugged and completely cool before cleaning. Wipe the surface with a damp cloth. Do not use abrasive cleaners or immerse the stove in water.
- **Storage:** Store all kit components in a cool, dry place away from direct sunlight to preserve the quality of the wax and essential oils.

Troubleshooting

- **Wax not melting evenly or slowly:** Ensure the pouring pot is centered on the electric stove. The stove operates at

500 watts for quick melting (3-5 minutes). If melting is slow, verify the stove is plugged in correctly and functioning.

- **Weak scent throw:** Ensure essential oils are added at the recommended temperature (125-140°F) and stirred thoroughly for at least 2 minutes. Adding scent at too high a temperature can cause it to evaporate.
- **Wick tunneling (wax left on edges):** Ensure the wick is centered and trimmed to 1/4 inch before each burn. Allow the candle to burn long enough on its first use for the wax pool to reach the edges of the tin.
- **Hot plate legs melting:** Always place the electric stove on a heat-resistant surface, such as the provided silicone anti-scalding pad, to prevent damage to surfaces or the stove itself.
- **Essential oil bottles leaking:** Before use, check that all essential oil bottle caps are securely tightened. If leakage occurs, contact customer support.

Specifications

Brand	Haccah
Model Name	Candle Making Kits
Item Model Number	LE004
Size	3.0lbs With Wax Melter
Electric Stove Power	500 Watts
Wax Type	100% Natural Beeswax
Number of Pieces	20 (main components)
Product Dimensions	3 x 3 x 3 inches (packaging)
Item Weight	16.52 pounds

Warranty and Support

Haccah is committed to ensuring your satisfaction with our products. Every kit is carefully inspected and packed to meet quality standards.
