1. **Unpack and Identify Parts:** Lay out all components and hardware. Refer to the parts list in your product packaging to identify each piece.
2. **Assemble Headboard and Footboard:** Attach the vertical supports to the decorative top and bottom sections of the headboard and footboard using the provided hardware.
3. **Connect Side Rails:** Attach the side rails to the assembled headboard and footboard using the designated bolts and nuts. Ensure all connections are secure.
4. **Install Center Support Legs and Beam:** Attach the center support legs to the main center beam, then secure the center beam to the bed frame structure. This provides crucial stability.

Your IDEALHOUSE Queen Platform Bed Frame is designed for ease of use and functionality.

- **Mattress Placement:** This bed frame features sturdy metal slats that eliminate the need for a box spring. Simply place your queen-size mattress directly onto the slats.
