## PAPIFEED MAOER-Gray-3

# PAPIFEED Smart Automatic Pet Feeder with Camera User Manual

Model: MAOER-Gray-3

## PRODUCT OVERVIEW

The PAPIFEED Smart Automatic Pet Feeder with integrated camera provides a convenient solution for pet feeding and monitoring. This device allows you to schedule feedings, monitor your pet remotely, and interact through two-way audio, ensuring your pet is well-cared for even when you are away.

Image: The PAPIFEED Smart Automatic Pet Feeder (right) and the external 1080P HD camera (left), with a smartphone displaying a live feed of a cat eating from the feeder. This setup provides comprehensive remote pet care.

## KEY FEATURES

- **Integrated Feeding and Monitoring:** Connects to 2.4G WiFi for simultaneous remote feeding and live video monitoring.
- **High-Definition Camera:** Features a 1080P HD camera with 350° horizontal and 110° vertical rotation, enhanced IR night vision for clear viewing in low light.
- **Two-Way Audio Communication:** Enables real-time voice calls to interact with your pet or family. Supports 2.4 GHz and 5 GHz WiFi/Bluetooth.
- **Smart Alerts:** Motion detection triggers push notifications to your mobile device, keeping you informed of your pet's activities.
- **Flexible Storage Options:** Supports local storage via Micro SD card (up to 128GB, not included) and secure cloud storage for video recordings.

- **Food Compatibility:** Designed to dispense kibbles with a diameter of 5-12mm (0.2-0.5 inches), suitable for various dry food types including freeze-dried and multi-pieced dry food.
- **Dual Power Supply:** Operates via power cord and includes a battery backup option to ensure continuous feeding during power outages.

## SETUP GUIDE

### 1. Unboxing and Component Check

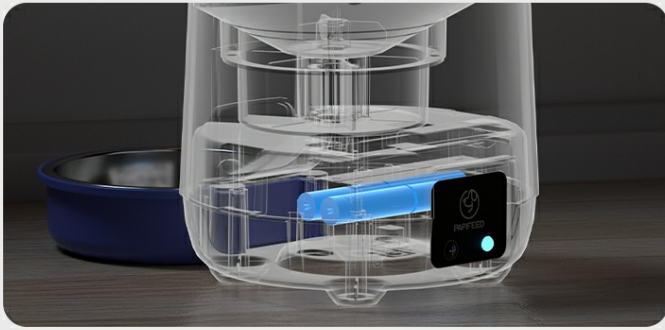

Carefully remove all components from the packaging. Ensure you have the automatic pet feeder unit, the external camera, power adapter, and user manual. Inspect for any damage.

### 2. Powering the Feeder and Camera

- Connect the power adapter to the feeder and plug it into a wall outlet.
- For battery backup, install appropriate batteries (not included) in the designated compartment at the bottom of the feeder. This ensures operation during power outages.
- Connect the camera to its power source.

# Dual Power Supply

Feed Your Pet on Time Even If Power Outage

## Battery Power Supply:

Backup power for home power outage

## Power Cord Supply:

Keeps the feeder working continuously and stably

Image: Illustration of the dual power supply system, showing both the battery power supply for backup during outages and the power cord supply for continuous operation.

## 3. App Installation and Device Pairing

1. Download the PAPIFEED app from your smartphone's app store (iOS or Android).
2. Register an account and log in.
3. Follow the in-app instructions to add the feeder and camera. Ensure your smartphone is connected to a 2.4G WiFi network during the pairing process. The camera also supports 5G WiFi after initial setup.
4. The app will guide you through connecting both devices to your home WiFi network.

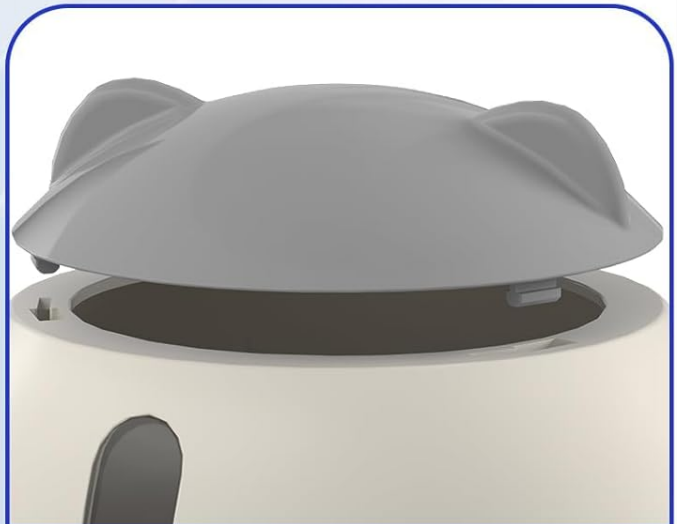

## OPERATING INSTRUCTIONS

### 1. Filling the Food Tank

Open the secure twist-lock lid on top of the feeder. Pour dry pet food (kibble size 5-12mm) into the tank. The visual food tank allows you to monitor the food level easily.

**Visual Food Tank, Always Catch the Situation of the Rest of the Kibbles**

**Secure Twist-Lock Lid to Ensure the freshness**

**Non-slip Rubbers Prevent Your Pet from Knocking Over**

**the Optimal Freshness Capacity of 3L Enough for a Cat to Eat for 1-2 Weeks (Take 3-5KG cats as an example)**

Image: A composite image showing key features of the feeder: a visual food tank to check kibble levels, a secure twist-lock lid for freshness, non-slip rubber feet for stability, and an illustration of the 3L capacity suitable for 1-2 weeks of feeding for a cat.

## **2. Scheduling Feedings via App**

Use the PAPIFEED app to set up customized feeding schedules. You can specify meal times and portion sizes according to your pet's needs. The app also provides daily feeding records.

## **3. Manual Feeding**

You can manually dispense food remotely through the app. Additionally, a manual feeding button is located on the feeder itself to dispense one portion instantly.

### Manual Feeding

Feed One Portion by Press the Button

### Non-slip Rubbers

Stable Placed and Not Easily Being Tipped Over

Image: A composite image showing the visual food tank, the manual feeding button on the feeder, and the non-slip rubber feet on the base, ensuring stability and ease of use.

## 4. Using the Camera for Monitoring

- Access the live video feed through the PAPIFEED app.
- Control the camera's pan (350°) and tilt (110°) movements remotely to view different areas of your home.
- Utilize the two-way voice call feature to speak to your pet or listen to their sounds.
- Review recorded footage from your Micro SD card or cloud storage.

### Multi-Angle Viewing

Place the Camera Anywhere, Witness Every Corner of Your Home!

Image: An illustration demonstrating the camera's multi-angle viewing capabilities (350° pan, 110° tilt), showing the camera placed in a room and a smartphone displaying a live view of a cat.

## MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygiene of your pet feeder. The feeder is designed for easy disassembly.

- **Detachable Components:** The food bowl and food tank are easily removable for cleaning.
- **Cleaning Instructions:** Hand wash the removable components with mild soap and water. Rinse thoroughly and allow to air dry completely before reassembling.
- **Important Note:** The main feeder base, which contains electronic components, is **not washable**. Do not immerse the base in water or expose it to excessive moisture.

- **Stainless Steel Bowl:** The included stainless steel feeding bowl is durable and easy to clean.

# Easy to Remove and Washable

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Feeder not dispensing food.	Food tank empty; kibble size too large; food jammed; power issue.	Refill food tank. Ensure kibble is 5-12mm. Check for obstructions and clear them. Verify power connection and battery backup.
Camera offline or unable to connect.	WiFi signal weak or incorrect; camera not powered; app issue.	Ensure camera is powered. Check WiFi signal strength and router. Re-pair the camera with the app if necessary. Confirm connection to 2.4G WiFi for initial setup.
App notifications not received.	App permissions not granted; notification settings disabled.	Check your phone's app settings to ensure notifications are enabled for the PAPIFEED app. Verify notification settings within the app itself.
Two-way audio not working.	Microphone/speaker blocked; app permissions; internet connection.	Ensure no obstructions on camera's microphone/speaker. Grant microphone access to the app. Check internet connection stability.

## SPECIFICATIONS
