Lazellz 5304484121

Lazellz Range Hood Grease Filter User Manual

Model: 5304484121

INTRODUCTION

This manual provides essential information for the Lazellz Range Hood Grease Filter, model 5304484121. This filter is designed to capture airborne grease particles, contributing to cleaner kitchen air and protecting your range hood's internal components. It is compatible with Frigidaire range hoods requiring part number 5304484121, including models such as FHP C3660LSA and FHP C4260LSA.

What's Included: One (1) Range Grease Filter.

An image showing the Lazellz Range Hood Grease Filter (model 5304484121) positioned beside a modern stainless steel range hood, illustrating its intended use.

SETUP AND INSTALLATION

This grease filter is a replacement part and does not come with its own installation instructions. For precise installation guidance, please refer to the user manual provided with your specific range hood appliance. Typically, grease filters are installed by aligning them with the filter slots and securing them with latches or clips.

Ensure the range hood is powered off before attempting to remove or install any filters.

OPERATING PRINCIPLES

The grease filter functions as a primary component of your range hood's ventilation system. When the range hood is operating, air containing cooking fumes and grease particles is drawn through the filter. The multi-layered metal mesh design effectively traps these grease particles, preventing them from entering the

exhaust ductwork and recirculating into your kitchen. This process helps maintain air quality and prolongs the life of your range hood.

MAINTENANCE

Regular cleaning of the grease filter is essential for maintaining optimal performance and airflow. A clogged filter can reduce the effectiveness of your range hood and may pose a fire hazard.

Cleaning Instructions:

1. **Power Off:** Ensure your range hood is completely turned off and disconnected from power before removing the filter.
2. **Remove Filter:** Locate the release latches or clips on the filter and carefully disengage them to remove the filter from the range hood.
3. **Clean:** Wash the filter with warm, soapy water. For stubborn grease, a degreasing agent can be used. Alternatively, some metal grease filters are dishwasher safe; consult your range hood's manual to confirm if this method is suitable for your filter type.
4. **Rinse and Dry:** Rinse the filter thoroughly to remove all soap residue. Allow the filter to air dry completely before reinstallation to prevent moisture buildup.
5. **Reinstall:** Carefully reinsert the dry filter into the range hood, ensuring it is securely latched into place.

Frequency: Cleaning frequency depends on cooking habits. For average use, cleaning once a month is recommended. For heavy cooking, more frequent cleaning may be necessary.

TROUBLESHOOTING

If you experience issues with your range hood's filtration after installing this grease filter, consider the following:

- **Reduced Airflow:** If the range hood's suction power seems diminished, check if the filter is clean. A buildup of grease can significantly restrict airflow. Clean the filter as per the maintenance instructions.
- **Filter Does Not Fit:** Verify that the model number of the filter (5304484121) matches the required part number for your specific range hood. Refer to your appliance's original user manual for compatible part numbers and dimensions.
- **Unusual Noises:** Ensure the filter is properly seated and securely latched. A loose filter can vibrate and cause noise during operation.

SPECIFICATIONS

Feature	Detail
Brand	Lazellz
Model Number	5304484121
Compatible Devices	Frigidaire Range Hoods requiring part 5304484121 (e.g., FHP C3660LSA, FHP C4260LSA)
Product Dimensions (L x W x Th)	19.68" x 7.87" x 0.36" (Approximately 19-11/16 x 7-7/8 Inches)
Material	Metal

Feature	Detail
Included Components	1 Grease Filter
UPC	810151529257
