myCozyLite M1805

myCozyLite Red LED Night Light

MODEL: M1805

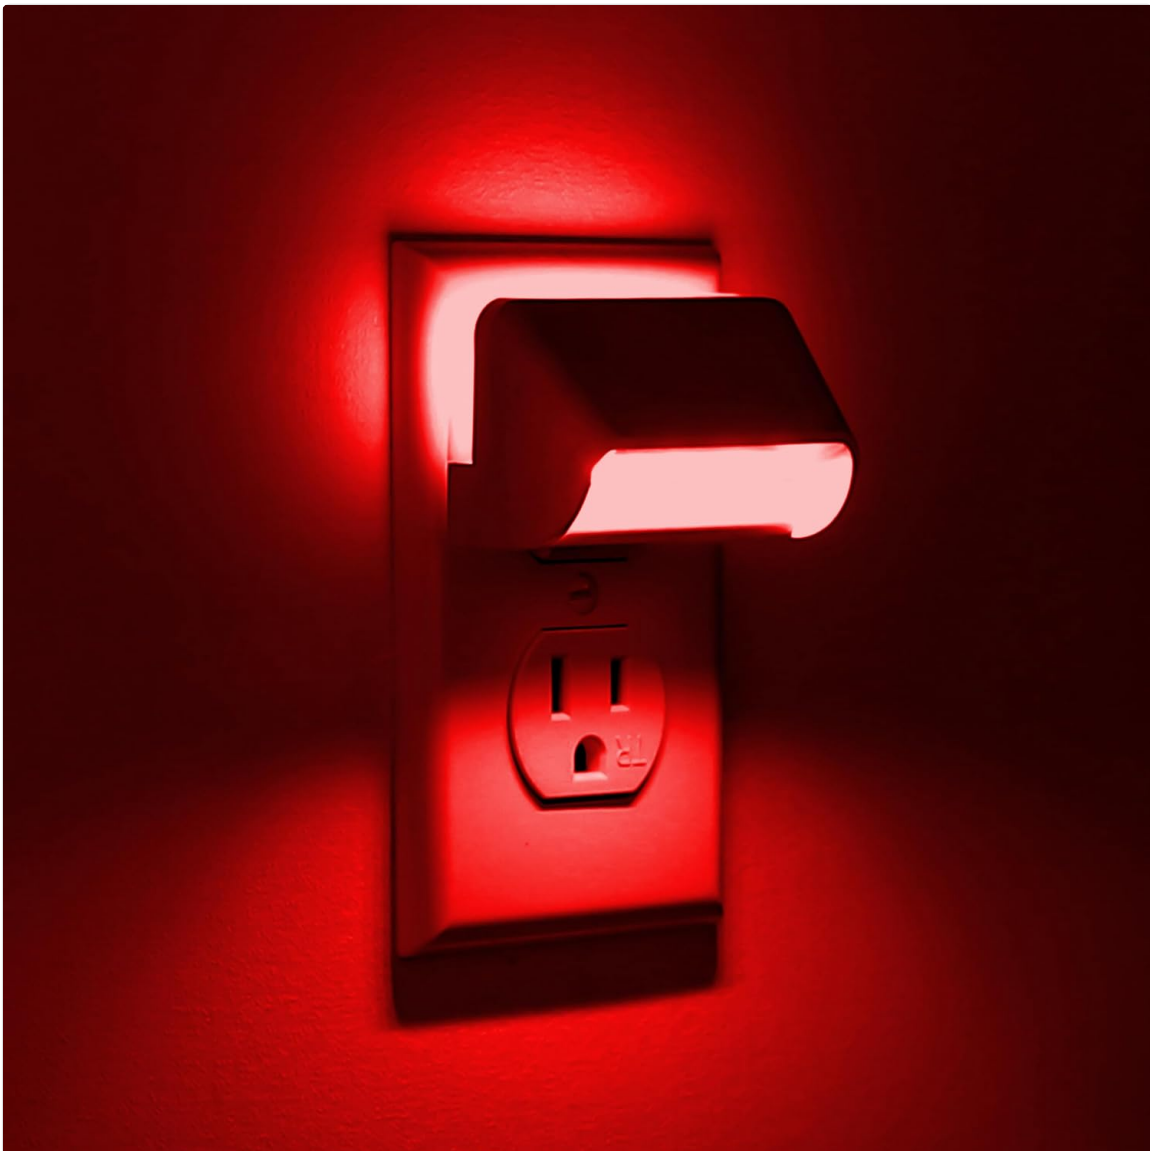

Image: The myCozyLite Red LED Night Light, shown plugged into a standard wall outlet, illuminating the surrounding area with a gentle red light.

Introduction

The myCozyLite Red LED Night Light is designed to provide subtle illumination in various indoor spaces. It features a dusk-to-dawn sensor for automatic operation and offers two distinct lighting modes to suit different needs. This manual provides instructions for setup, operation, maintenance, and troubleshooting.

- **Dusk-to-Dawn Sensor:** Automatically activates in low light and deactivates in bright conditions.
- **Dual Lighting Modes:** Offers both a brighter 'Dual Light Mode' and a softer 'Night Light Mode'.
- **Energy Efficient:** Designed for low power consumption.
- **Compact Design:** Plugs into a standard wall outlet, leaving the second socket accessible.
- **Red Light Output:** Non-glaring red light, suitable for maintaining sleep quality.

Setup

1. **Unpack:** Carefully remove the night light from its packaging.
2. **Select Location:** Choose a standard 110V AC wall outlet in your desired location (e.g., bedroom, bathroom, kitchen, hallway, stairway). Ensure the area around the sensor is not obstructed to allow for proper light detection.
3. **Plug In:** Insert the night light directly into the wall outlet. The compact design ensures that the adjacent outlet remains fully accessible for other devices.

Operating Instructions

The myCozyLite Red LED Night Light features a smart dusk-to-dawn sensor and a switch button to select between two lighting modes.

Automatic Operation (Dusk-to-Dawn Sensor)

The night light is equipped with a light sensor that automatically detects ambient light levels. It will turn on when the surrounding area is dark and turn off when sufficient light is present.

Lighting Modes

Use the switch button located on the device to toggle between the two available lighting modes:

- **Dual Light Mode:** In this mode, both the backlight and the main indirect guide light are active. This provides brighter illumination, making it easier to navigate and find objects in the dark. This mode is suitable for hallways, kitchens, or areas where more visibility is desired.
- **Night Light Mode:** In this mode, only the soft backlight is active, and the main indirect light is

turned off. This provides a very gentle, soothing glow that is ideal for bedrooms or nurseries, as it is designed not to disturb sleep.

Image: A visual comparison of the night light operating in 'Night Light Mode' (softer glow) and 'Dual Light Mode' (brighter glow), with an arrow indicating the mode selection switch.

Maintenance

- **Cleaning:** To clean the night light, unplug it from the wall outlet. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or abrasive materials.
- **Bulb Replacement:** The myCozyLite Red LED Night Light uses integrated LED components that do not require bulb replacement.
- **Heat Generation:** This device is designed to generate minimal heat during operation.
- **Durability:** The hidden LED beads are fully covered, making the unit unbreakable and safe for environments with children or babies.

Troubleshooting

Problem	Possible Cause	Solution
Night light does not turn on in the dark.	Insufficient darkness; sensor obstructed; not properly plugged in.	Ensure the room is sufficiently dark. Check that the light sensor is not covered. Verify the night light is securely plugged into the outlet.
Night light stays on during the day.	Sensor obstructed; insufficient ambient light.	Ensure the light sensor is not covered. Move the night light to a location with more ambient light during the day.
Light output is too bright or too dim.	Incorrect lighting mode selected.	Use the switch button to toggle between 'Dual Light Mode' (brighter) and 'Night Light Mode' (softer) to achieve desired illumination.
Light appears to flicker.	Power fluctuation; rare manufacturing defect.	Try plugging the night light into a different outlet. If flickering persists, contact customer support for assistance.
