- **Shark Rotator Lift-Away ADV DuoClean PowerFins Upright Vacuum:** LA455, LA502, LA502NP, LA500WM, UV850

This product serves as an alternative spare part replacement for original part numbers 1483FC2000 / #1483FC2000.

SETUP AND INSTALLATION

Replacing your vacuum's brushroll is a straightforward process. Ensure the vacuum cleaner is unplugged from the power outlet before proceeding with any installation or maintenance.

1. **Prepare the Vacuum:** Lay your Shark vacuum cleaner down on a flat surface, exposing the brushroll housing.
2. **Remove Old Brushroll:** Locate the existing brushroll. Depending on your specific Shark model, there may be latches or screws securing it. Carefully unlatch or unscrew to release the old brushroll.
3. **Clean Housing (Optional but Recommended):** While the brushroll is removed, take the opportunity to clean any accumulated debris, hair, or dust from the brushroll housing area.
4. **Install New Brushroll:** Align the new Qwick brushroll with the designated slots in the vacuum's head. Gently snap or slide it into place until it is securely seated. Ensure the ends are properly engaged with the vacuum's drive mechanism.
5. **Secure Brushroll:** Re-secure any latches or screws that were removed in step 2.
6. **Test:** Once installed, plug in the vacuum and briefly turn it on to ensure the new brushroll spins freely and correctly.

EASY TO INSTALL

Simply remove your
used roller brush &
install the new one.

It's suggested you
replace your brushroll
every 6-12 months

**Compatible with Shark* Lift-Away* vacuums
Models # AZ2002*, AZ2000*, AZ2000W*, LA502***

OPERATING CONSIDERATIONS

Once installed, the Qwick brushroll operates as an integral part of your vacuum cleaner's cleaning system. No special operation is required beyond the normal use of your vacuum. The microfiber soft sweeper design is intended for effective debris pickup on

various floor types.

MAINTENANCE

Regular maintenance of your brushroll ensures optimal performance and extends its lifespan.

- **Cleaning:** The Qwick brushroll is washable. Periodically remove the brushroll from the vacuum and clean any tangled hair, threads, or debris. You can rinse it under lukewarm water. Ensure it is completely dry before re-installing it into the vacuum to prevent damage or mold growth.
- **Inspection:** Regularly inspect the brushroll for signs of wear, damage, or excessive accumulation of debris that cannot be easily removed. Check the ends of the brushroll for any blockages or damage to the bearings.
- **Replacement Schedule:** It is suggested to replace your brushroll every 6-12 months, depending on usage frequency and household conditions (e.g., presence of pets, long hair). Timely replacement helps maintain cleaning efficiency.

TROUBLESHOOTING

If you encounter issues with your Qwick brushroll, consider the following common solutions:

Problem	Possible Cause	Solution
Brushroll not spinning	<ul style="list-style-type: none">• Hair or debris tangled around the brushroll or its ends.• Brushroll not properly seated.• Damaged brushroll end/bearing.	<ul style="list-style-type: none">• Unplug vacuum, remove brushroll, and thoroughly clean all debris.• Ensure brushroll is correctly installed and latched.• Inspect the brushroll ends for stripping or damage. If damaged, replacement may be necessary.
Reduced cleaning performance	<ul style="list-style-type: none">• Worn-out brushroll.• Brushroll not clean.	<ul style="list-style-type: none">• Replace the brushroll if it shows significant wear (e.g., flattened bristles).• Clean the brushroll as per maintenance instructions.
Unusual noise from brushroll area	<ul style="list-style-type: none">• Debris caught in the brushroll mechanism.• Damaged brushroll or vacuum part.	<ul style="list-style-type: none">• Unplug vacuum and inspect for any foreign objects.• If noise persists after cleaning, the brushroll or a vacuum component may be damaged and require replacement or professional inspection.
