

## FOFNON B0CPDV3MX7

# FOFNON Cat Water Fountain User Manual

Model: B0CPDV3MX7

## INTRODUCTION

Thank you for choosing the FOFNON Cat Water Fountain. This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your new pet water fountain. Designed to encourage increased water intake for your pets, this 3.2L stainless steel fountain offers a continuous flow of filtered water, promoting better hydration and health.

# Living Water

Enjoy without leaving your home

## PRODUCT OVERVIEW AND COMPONENTS

The FOFNON Cat Water Fountain is constructed from durable stainless steel and features a multi-stage filtration system to ensure clean and fresh water for your pets. Familiarize yourself with the main components:

- **Stainless Steel Basin:** The main water reservoir, made from food-grade 304 stainless steel for hygiene and durability.
- **Water Spout/Faucet:** Provides the flowing water stream, attracting pets.
- **Water Pump:** Circulates water through the filtration system and up to the spout.

- **Filter Tray:** Holds the carbon filter and sponge filter.
- **Carbon Filter:** Filters out dust, debris, and softens water.
- **Sponge Filter:** Catches floating hairs and larger particles, protecting the pump.
- **Water Level Window:** A transparent window on the side of the basin to easily monitor the water level.
- **Power Adapter:** Connects the pump to an electrical outlet.

## SETUP

Follow these steps for the initial setup of your FOFNON Cat Water Fountain:

1. **Unpack Components:** Carefully remove all components from the packaging. Inspect for any damage.
2. **Rinse Components:** Rinse the stainless steel basin, water spout, and filter tray thoroughly with clean water. Do not use soap on the filters.
3. **Prepare Filters:**

- Rinse the carbon filter under running water for a few minutes to remove any loose carbon dust.
  - Rinse the sponge filter.
4. **Assemble Pump:** Ensure the small sponge filter is attached to the pump intake.
  5. **Place Pump:** Place the water pump securely at the bottom of the stainless steel basin. Ensure the power cord is routed through the designated groove to prevent pinching.
  6. **Install Filter Tray:** Place the filter tray over the pump, ensuring it sits correctly.
  7. **Insert Filters:** Place the carbon filter into the designated slot in the filter tray.
  8. **Fill with Water:** Fill the stainless steel basin with clean water up to the MAX fill line, or at least above the minimum water level indicator. The 3.2L capacity allows for extended use.
  9. **Attach Spout:** Securely attach the water spout to the pump outlet.
  10. **Connect Power:** Connect the power adapter to the fountain's power cord, then plug the adapter into a standard electrical outlet. The fountain should begin operating.

## OPERATING INSTRUCTIONS

---

Using your FOFNON Cat Water Fountain is straightforward:

- **Continuous Operation:** The fountain is designed for continuous operation when plugged in. It provides a constant flow of fresh, filtered water.
- **Water Level Monitoring:** Regularly check the water level through the transparent water level window on the side of the basin. Refill water when it drops below the minimum level to ensure proper pump function and prevent dry running. The 3.2L capacity typically lasts 8-12 days for an adult cat.
- **Quiet Operation:** The fountain operates at a low noise level (approximately 30 dB), ensuring it does not disturb your household activities or your pet.

# Water Level Window

Clear view of remaining water

# Super Quiet

Won't disturb your work

Image: The FOFNON Cat Water Fountain operating quietly in a home environment, demonstrating its low noise level that won't disturb work or rest.

## MAINTENANCE

Regular maintenance is crucial for the longevity and hygiene of your FOFNON Cat Water Fountain. It is recommended to clean the fountain and replace filters as follows:

### Daily/Every Few Days:

- **Refill Water:** Top up the water level as needed, ensuring it remains above the minimum mark.
- **Quick Rinse:** If refilling, quickly rinse the basin and spout to remove any surface debris.

### Weekly Cleaning (or more frequently depending on usage and water quality):

1. **Unplug:** Always unplug the fountain from the power outlet before cleaning.
2. **Disassemble:** Disassemble all components: basin, spout, filter tray, pump, carbon filter, and sponge filter.
3. **Clean Basin and Spout:** Wash the stainless steel basin and spout with warm water and a mild, pet-safe dish soap. Rinse thoroughly to remove all soap residue.
4. **Clean Sponge Filter:** Rinse the sponge filter under running water. If it appears heavily soiled or discolored, it may need replacement.
5. **Clean Pump:**
  - Carefully open the pump casing (refer to pump instructions if needed) and remove the impeller.
  - Clean the impeller and the inside of the pump with a small brush (like a toothbrush) to remove any hair, debris, or mineral deposits. This is crucial to prevent algae buildup and ensure quiet operation.
  - Rinse all pump parts thoroughly and reassemble.
6. **Reassemble:** Reassemble all components after cleaning, ensuring the pump and filters are correctly seated.
7. **Refill:** Fill the fountain with fresh, clean water.

### Filter Replacement:

- **Carbon Filter:** Replace the carbon filter every 2-4 weeks, or more frequently if you have multiple pets or notice reduced water quality.
- **Sponge Filter:** Replace the sponge filter every 1-2 months, or when it shows signs of significant wear or clogging.
- Replacement filters can be found by searching for "B0CLGRVBMD" (filters) and "B0CLVB2WS4" (pumps) online.

## TROUBLESHOOTING

If you encounter issues with your FOFNON Cat Water Fountain, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Fountain not dispensing water / Pump not working.	<ul style="list-style-type: none"><li>◦ Not plugged in or power outage.</li><li>◦ Insufficient water level.</li><li>◦ Pump is clogged with hair or debris.</li><li>◦ Pump is faulty.</li></ul>	<ul style="list-style-type: none"><li>◦ Check power connection and outlet.</li><li>◦ Refill water to the appropriate level.</li><li>◦ Disassemble and thoroughly clean the pump (refer to Maintenance section).</li><li>◦ If cleaning does not resolve the issue, the pump may need replacement.</li></ul>

Problem	Possible Cause	Solution
Fountain is noisy.	<ul style="list-style-type: none"><li>◦ Low water level.</li><li>◦ Pump is dirty or clogged.</li><li>◦ Impeller is not seated correctly.</li></ul>	<ul style="list-style-type: none"><li>◦ Add water to the fountain.</li><li>◦ Clean the pump and impeller thoroughly.</li><li>◦ Ensure the impeller is properly reassembled inside the pump.</li></ul>
Water flow is weak.	<ul style="list-style-type: none"><li>◦ Clogged filter.</li><li>◦ Dirty pump.</li><li>◦ Low water level.</li></ul>	<ul style="list-style-type: none"><li>◦ Replace the carbon filter.</li><li>◦ Clean the pump and sponge filter.</li><li>◦ Refill water.</li></ul>
Water tastes or smells bad.	<ul style="list-style-type: none"><li>◦ Filter needs replacement.</li><li>◦ Fountain needs thorough cleaning.</li></ul>	<ul style="list-style-type: none"><li>◦ Replace the carbon filter.</li><li>◦ Perform a deep clean of all fountain components, especially the basin and pump.</li></ul>
