SETUP AND ASSEMBLY

The Virubi Bathroom Vanity is designed for user-friendly assembly. Please follow these general guidelines. Refer to the included assembly manual for specific step-by-step instructions, diagrams, and hardware identification.

- 1. Unpack Components:** Carefully unpack all parts and hardware. Verify that all components listed in the packing list are present and undamaged.
- 2. Prepare Workspace:** Choose a clean, flat, and spacious area for assembly. Lay down a protective sheet to prevent scratches.
- 3. Identify Parts:** Match each part to the corresponding label or number in the assembly manual.
- 4. Assemble Frame:** Begin by assembling the main frame of the vanity according to the diagrams. Ensure all connections are secure.
- 5. Install Drawers and Door:** Follow instructions for installing drawer slides, assembling drawers, and attaching the cabinet door with its soft-close hinges.
- 6. Install Sink Top:** Carefully place the ceramic sink top onto the vanity base. Secure it as instructed, typically using silicone sealant (not included) or mounting clips.
- 7. Plumbing Connections:** Connect the faucet (not included) and drain assembly (included with sink) to your home's water supply and drainage system. Ensure all connections are watertight. *Note: Professional plumbing installation is recommended if you are unfamiliar with these procedures.*
- 8. Leveling:** Adjust the vanity's feet to ensure it is level and stable on the floor.

Important Plumbing Note: Due to the internal drawer and shelf configuration, plumbing connections are best routed from the right side of the vanity. The drain pipe will occupy space within the cabinet, potentially affecting shelf usability. Consider your existing plumbing setup before installation.

OPERATING INSTRUCTIONS

Your Virubi Bathroom Vanity is designed for functional and convenient use.

- Drawers:** The two full-size drawers and the tip-out drawer operate on smooth runners. Pull gently to open and push to close. The soft-close mechanism will engage to prevent slamming.
- Cabinet Door:** The cabinet door opens to reveal an adjustable shelf and a door-mounted organizer. The soft-close hinges ensure quiet operation.
- Adjustable Shelf:** The internal shelf can be repositioned to accommodate items of various heights. Refer to the assembly manual for instructions on adjusting shelf height.

MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your Virubi Bathroom Vanity.

- **Cleaning the Vanity:** Wipe the vanity surfaces with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or solvents, as these can damage the painted finish.
- **Cleaning the Ceramic Sink:** The ceramic sink is designed to be easy to clean. Use mild soap and water with a soft sponge or cloth. Rinse thoroughly and dry to prevent water spots. Avoid abrasive pads or cleaners that could scratch the glossy surface.
- **Spills:** Immediately wipe up any water spills or splashes on the vanity surface to prevent water damage, especially around seams and edges.
- **Hardware:** Periodically check and tighten any loose screws on handles, hinges, or drawer slides.
- **Avoid Excessive Weight:** Do not exceed the stated weight limit of 300 pounds for the vanity top. Distribute

weight evenly within drawers and cabinets.

TROUBLESHOOTING

This section addresses common issues you might encounter with your vanity.

Problem	Possible Cause	Solution
Drawers or Door Not Closing Smoothly	Misaligned hinges or drawer slides; obstruction.	Check for obstructions. Adjust hinge screws or drawer slide mounts as per assembly manual. Ensure the vanity is level.
Water Leaks from Sink/Faucet	Loose plumbing connections; improper sealant application.	Tighten all water supply and drain connections. Reapply plumber's putty or silicone sealant if necessary. Consult a professional plumber if leaks persist.
Vanity Wobbles	Uneven floor; feet not properly adjusted.	Adjust the leveling feet at the bottom of the vanity until it is stable.
Scratches or Dents on Surface	Impact from sharp objects; abrasive cleaning.	Use touch-up paint (if available from manufacturer) for minor scratches. Avoid placing heavy or sharp objects directly on the surface without protection.
