GAOMON RAP1

GAOMON Full Size Rattan Platform Bed Frame with LED Light Headboard User Manual

Model: RAP1

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before assembly and use. Retain this manual for future reference.

- **Weight Capacity:** Do not exceed a total weight of 800 pounds on the bed frame. Exceeding this limit may cause structural damage and potential injury.
- **Assembly:** Follow assembly instructions carefully to ensure stability and safety. Incorrect assembly can lead to instability.
- **Mattress Compatibility:** Use compatible mattress types to prevent instability. Ensure the mattress fits securely within the frame.
- **Floor Protection:** The bed frame includes rubber non-slip pads under the legs to protect your floor from scratches. Ensure these pads are in place during and after assembly.
- **LED Lights:** Handle LED light components with care. Do not expose to excessive moisture.
- **Children and Pets:** Keep small parts away from children and pets during assembly to prevent choking hazards.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

- Headboard (with integrated LED Light)
- Footboard
- Side Rails
- Steel Slats
- Center Support Bars
- Support Legs
- Assembly Hardware (screws, bolts, washers, Allen wrench)

- LED Light Remote Control
- Instruction Manual

SETUP AND ASSEMBLY

Assembly typically takes approximately 45 minutes for two adults. Ensure you have adequate space and all tools provided.

- 1. Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface to prevent scratches.
- 2. Attach Side Rails to Headboard:** Connect the side rails to the headboard using the provided hardware. Ensure all connections are secure but do not fully tighten screws until the frame is fully assembled.
- 3. Attach Side Rails to Footboard:** Connect the other end of the side rails to the footboard. Again, ensure connections are secure.

- 4. Install Center Support Bars and Legs:** Attach the center support bars and their corresponding legs to the main frame. These provide crucial support for the mattress.
- 5. Place Slats:** Lay the steel slats across the frame. The slats are designed to provide direct support for your mattress without the need for a box spring.
- 6. Secure Slats:** Secure the slats to the frame using the designated fasteners. This prevents movement and noise.
- 7. Final Tightening:** Once all components are in place, systematically tighten all screws and bolts. Do not overtighten.
- 8. Connect LED Lights:** Plug in the LED light power adapter to a suitable power outlet.

OPERATING THE LED LIGHT HEADBOARD

The integrated RGB LED light strip in the headboard offers various lighting options to enhance your bedroom ambiance.

Features:

- **Multiple Colors:** Access over 60,000 color options.
- **Mode Switch:** Cycle through various lighting modes and effects.
- **Brightness Adjustable:** Adjust the intensity of the light to your preference.
- **Time Schedule:** Program the lights to turn on or off at specific times.
- **Mic Mode:** Lights can react to sound and music detected by the built-in microphone.
- **Music Mode:** Lights synchronize with music playback.

Control Methods:

- **Remote Control:** Use the provided remote to adjust colors, modes, and brightness.
- **App Control:** Download the compatible mobile application to control the LED lights via your smartphone. Refer to the LED light manual for app download instructions.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your bed frame.

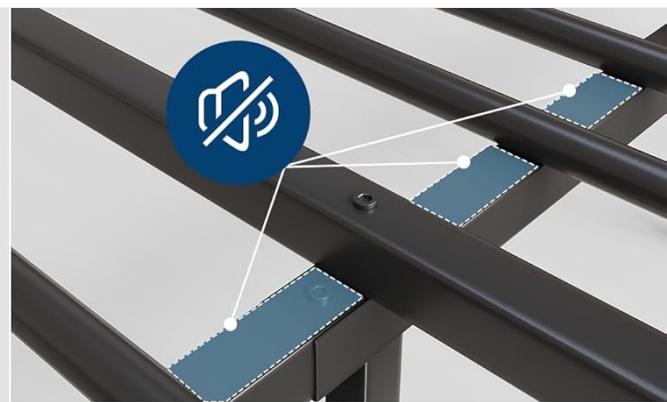

- Cleaning:** Wipe the metal frame with a soft, damp cloth. For the rattan sections, use a soft brush or cloth to remove dust. Avoid harsh chemicals or abrasive cleaners.
- Tighten Fasteners:** Periodically check and tighten all screws and bolts to maintain stability and prevent squeaking. This is recommended every 3-6 months.
- Inspect Slats:** Ensure all slats are properly seated and undamaged. Replace any broken slats immediately.
- LED Lights:** Keep the LED light strip clean and free from dust. If the lights malfunction, check the power connection and remote control battery.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose fasteners; friction between metal parts.	Tighten all screws and bolts. The frame includes noise-free strips to minimize friction; ensure they are correctly placed.
Mattress is sliding.	Mattress not properly seated; lack of anti-slip features.	Ensure the mattress is centered. The bed frame features an anti-slip design to prevent mattress movement.
LED lights are not working.	Power connection issue; remote control battery dead; LED strip damage.	Check if the power adapter is securely plugged in. Replace the remote control battery. If issues persist, contact customer support.
Bed frame feels unstable.	Incomplete or incorrect assembly; loose connections.	Review assembly instructions and ensure all components are correctly installed and all fasteners are tightened. Do not exceed the 800lb weight capacity.

NOISE FREE STRIPS

No squeak and friction noise for a quiet slipping and shifting

ISQUEAK RESISTANT

Add three screws to reinforce the headboard to prevent any wobbling
