LOVMOR 2 Tier Pull Out Cabinet Organizer Instruction Manual

Model: S-433222X-WH-DF | Brand: LOVMOR

INTRODUCTION

This manual provides comprehensive instructions for the assembly, installation, and maintenance of your LOVMOR 2 Tier Pull Out Cabinet Organizer. Designed to maximize storage space and improve accessibility within your kitchen, bathroom, laundry, or pantry cabinets, this organizer features smooth-gliding shelves and an adjustable design. Please read these instructions carefully before beginning installation to ensure proper setup and long-term performance.

PRODUCT OVERVIEW

The LOVMOR 2 Tier Pull Out Cabinet Organizer is engineered for efficiency and durability. Key features include:

- **Dimensions:** 31½"W x 21½"D x 15"H. Designed to fit cabinet openings of 32" or larger.
- **Upgraded Handle Design:** Features high-end oak solid wood handles for enhanced pull-out comfort.
- **Independent Sliding Shelves:** Both shelves can be pulled out independently, each supporting up to 50 lbs.
- **Adjustable Shelf Heights:** The lower shelf offers two adjustable heights, and the upper shelf offers three, accommodating various pots, pans, and containers.
- **Sturdy & Smooth Operation:** Manufactured with a ball bearing system for smooth, solid, and sturdy sliding.
- **Space Optimization:** Increases storage capacity and visibility, reducing clutter and making items easily retrievable.

SPECIFICATIONS

Feature	Detail
---------	--------

Product Dimensions (D x W x H)	21.5"D x 31.5"W x 15"H
Material	Wood (handle), Metal (frame)
Color	2 Tier (Silver frame with wooden handles)
Weight Capacity per Shelf	50 lbs
Number of Shelves	2
Item Weight	29.8 pounds
Model Number	S-433222X-WH-DF
UPC	737694982359

SETUP AND INSTALLATION

Assembly and installation are designed to be straightforward. Please follow these steps carefully. A screw gun is the only tool required.

Required Tools:

- Screw Gun (or Phillips head screwdriver)

Installation Steps:

1. **Prepare the Cabinet:** Ensure your cabinet opening measures at least 32" in width and 21.5" in depth. The minimum height required is 15". Clear the cabinet interior of any obstructions.

Figure 3: Recommended cabinet dimensions for proper fit. Measure your cabinet before purchase.

2. **Assemble the Base Frame:** Attach the side rails to the base frame using the provided screws. Ensure the ball bearing system is pulled out to reveal the screw holes for secure fastening.

Figure 4: Detail of the smooth ball bearing slide system.

3. **Install Mounting Template:** Use the provided mounting template to mark the screw and pilot hole locations (6 places) on the cabinet floor. Pre-drill holes using a 2.5mm drill bit.
4. **Secure the Base Frame:** Place the assembled base frame into the cabinet, aligning it with the pre-drilled holes. Secure the frame to the cabinet floor using the provided screws.

5. **Attach Side Supports:** Fasten the vertical side supports to the cabinet walls using the appropriate screws. Ensure they are level and securely attached.
6. **Install Shelves:** Slide the two wire baskets onto the installed side supports. The lower shelf has two adjustable heights, and the upper shelf has three. Choose the desired height for each shelf before fully securing them. Ensure the side hooks for the baskets are facing upwards.

Pull the top or bottom open separately

Figure 5: Adjustable height options for customizing shelf spacing.

7. **Final Check:** Test both shelves to ensure they slide smoothly and independently. Verify all screws are tightened.

OPERATING INSTRUCTIONS

Using your LOVMOR Pull Out Cabinet Organizer is simple and designed for convenience:

- **Accessing Items:** Gently pull the desired shelf forward using the wooden handle. The smooth ball bearing slides will allow the shelf to extend fully, providing easy access to items stored at the back of your cabinet.
- **Independent Operation:** Each of the two shelves operates independently. You can pull out the top shelf, the bottom shelf, or both simultaneously as needed.
- **Loading Capacity:** Each shelf is designed to hold up to 50 lbs. Distribute weight evenly to ensure optimal performance and longevity of the slides.
- **Returning Shelves:** Push the shelf back into the cabinet until it is fully recessed. Ensure no items are obstructing the path of the shelf or the cabinet door.

Make your cabinets look tidier

Figure 6: The organizer helps transform cluttered cabinets into tidy, accessible storage spaces.

MAINTENANCE

To ensure the longevity and smooth operation of your LOVMOR Pull Out Cabinet Organizer, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame and wooden handles with a soft, damp cloth. For stubborn stains, a mild soap solution can be used, followed by drying thoroughly. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Lubrication:** Periodically check the ball bearing slides for smooth operation. If you notice any stiffness or resistance, a small amount of silicone-based lubricant can be applied to the slide mechanisms.
- **Tighten Fasteners:** Over time, screws may loosen due to regular use. Periodically check all screws and tighten them as needed to maintain stability.
- **Weight Distribution:** Always distribute items evenly across the shelves and avoid exceeding the 50 lbs weight capacity per shelf. Overloading can strain the slides and frame.

TROUBLESHOOTING

If you encounter any issues with your cabinet organizer, refer to the following common solutions:

- **Shelves not sliding smoothly:**
 - Check for obstructions: Ensure no items are blocking the slide mechanism or the path of the shelves.
 - Clean the slides: Dust or debris can accumulate. Clean the slides thoroughly with a damp cloth.
 - Lubricate: Apply a silicone-based lubricant to the ball bearing slides.
 - Check alignment: Verify that the side supports and base frame are installed level and parallel.
- **Organizer feels unstable or wobbly:**

- Tighten all screws: Ensure all screws securing the frame to the cabinet floor and the side supports to the cabinet walls are fully tightened.
- Verify installation: Confirm that the unit is properly anchored to the back of the cabinet, as this is crucial for stability, especially when pulling out heavy loads.

- **Organizer does not fit cabinet despite stated dimensions:**

- Re-measure cabinet opening: Carefully measure the interior width, depth, and height of your cabinet, paying attention to any internal hinges or obstructions. The stated product width refers to the organizer itself, and the cabinet opening must be slightly larger to accommodate the slides and installation. For example, a 7.5" wide organizer may fit in a cabinet under 9" width, not necessarily exactly 9".
- Consider cabinet door clearance: If your cabinet doors have large handles or are on a 90-degree inside corner, ensure there is enough clearance for the organizer to pull out without scratching or hitting the door. You may need a narrower model in such cases.

- **Shelves are difficult to adjust height:**

- Ensure baskets are empty: Remove all items from the shelves before attempting to adjust their height.
- Align correctly: Make sure the shelf hooks are properly aligned with the desired slots on the vertical supports.

WARRANTY AND SUPPORT

LOVMOR stands behind the quality of its products. For specific warranty information or if you require further assistance with your 2 Tier Pull Out Cabinet Organizer, please contact LOVMOR customer support through the retailer where you purchased the product or visit the official LOVMOR website. Please have your model number (S-433222X-WH-DF) and purchase details ready when contacting support.
