WHAT'S IN THE BOX

Verify that all items are present in the packaging:

- Acer Nitro 70 N70-130-UR13 Gaming Desktop
- Keyboard
- Mouse
- Power Cord

SETUP INSTRUCTIONS

1. **Unpacking:** Carefully remove the desktop and all accessories from the packaging. Retain the packaging for future transport or service needs.

2. **Placement:** Place the desktop on a stable, flat surface with adequate ventilation around all sides. Avoid placing it in direct sunlight or near heat sources.

3. **Connect Peripherals:**
   - Connect your monitor(s) to the graphics card ports (HDMI, DisplayPort) on the rear of the desktop.
   - Connect the included keyboard and mouse to available USB ports.
   - Connect any other peripherals such as speakers, headphones, or external drives.

4. **Power Connection:** Connect the power cord to the desktop's power input and then to a grounded electrical outlet.

5. **First Power On:** Press the power button located on the top of the desktop. The system will boot into Windows 11 Home. Follow the on-screen instructions for initial setup.

OPERATING INSTRUCTIONS

Power On/Off

- **To Power On:** Press the power button on the top of the desktop.
- **To Shut Down:** Click the Start button in Windows, then select Power > Shut down.
- **To Restart:** Click the Start button in Windows, then select Power > Restart.
- **To Sleep:** Click the Start button in Windows, then select Power > Sleep.

Using NitroSense

The NitroSense utility application allows you to monitor system performance, adjust fan speeds, and customize

settings for optimal gaming and computing experience.

- **Launch NitroSense:** Locate the NitroSense icon in your Windows Start menu or desktop and click to open.
- **Monitor Performance:** View real-time CPU and GPU temperatures, usage, and fan speeds.
- **Adjust Fan Settings:** Customize fan profiles (e.g., Auto, Max) to manage cooling performance.

MAINTENANCE

Regular maintenance helps ensure optimal performance and extends the lifespan of your desktop.

- **Keep it Clean:** Regularly clean the exterior of the desktop with a soft, dry cloth. Use compressed air to clear dust from vents and fans to maintain proper airflow. Ensure the system is powered off and unplugged before cleaning.
- **Software Updates:** Keep your operating system (Windows 11) and drivers (especially graphics drivers) updated to the latest versions for security and performance improvements.
- **Backup Data:** Periodically back up important files to an external drive or cloud storage to prevent data loss.
- **Avoid Obstructions:** Ensure that the desktop's ventilation openings are not blocked by objects or placed in enclosed spaces.

TROUBLESHOOTING

This section addresses common issues you might encounter with your desktop.

No Power / System Not Turning On:

- Check if the power cord is securely connected to both the desktop and the electrical outlet.
- Ensure the power outlet is functional by testing it with another device.
- If using a power strip or surge protector, ensure it is switched on and working.

No Display on Monitor:

- Verify that the monitor is powered on and its video cable is securely connected to the graphics card ports on the desktop.
- Ensure the correct input source is selected on your monitor.
- Try connecting the monitor to a different video port on the graphics card, if available.

System Running Slowly:

- Close unnecessary applications running in the background.
- Check for and install any pending Windows updates or driver updates.
- Ensure there is sufficient free space on your primary drive (SSD).
- Run a system scan for malware or viruses.

Overheating:

- Ensure the desktop's vents are clear of obstructions and dust.
- Use the NitroSense application to monitor temperatures and adjust fan speeds.
- Ensure the desktop is placed in a well-ventilated area.

SPECIFICATIONS
