

SAMSUNG VCA-SABC95/AA

SAMSUNG Jet Slim LED Brush User Manual

Model: VCA-SABC95/AA

INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your SAMSUNG Jet Slim LED Brush (Model: VCA-SABC95/AA). Please read this manual thoroughly before using the product to ensure safe and efficient operation.

PRODUCT OVERVIEW

The SAMSUNG Jet Slim LED Brush is an advanced attachment designed for SAMSUNG Jet Stick Vacuums. It is engineered to effectively pick up fine dust and debris from various floor types, including carpets and hard floors. Key features include:

- **LED Lighting:** Integrated LED lights illuminate dark areas, making hidden dust and dirt visible for thorough cleaning.
- **Anti-Tangle Roller:** A specially designed roller minimizes hair entanglement, simplifying maintenance and ensuring consistent performance.
- **Versatile Cleaning:** Efficiently cleans both fine dust and larger debris on various floor surfaces.
- **Compatibility:** Designed for use with Bespoke Jet AI, Bespoke Jet, Jet 90, Jet 75, and Jet 60 series vacuum cleaners.

SETUP

Follow these steps to properly attach the Slim LED Brush to your SAMSUNG Jet Stick Vacuum:

1. **Ensure Power Off:** Before attaching or detaching any accessories, ensure your SAMSUNG Jet Stick Vacuum is turned off and disconnected from its power source.
2. **Align the Brush:** Hold the Slim LED Brush and align its connector with the connection point at the end of your vacuum's extension pipe or directly to the main body if applicable.
3. **Secure Attachment:** Push the brush firmly onto the connection point until you hear a click, indicating it is securely locked in place. Gently pull on the brush to confirm it is properly attached and will not detach during use.
4. **Verify Compatibility:** This brush is compatible with Bespoke Jet AI, Bespoke Jet, Jet 90, Jet 75, and Jet 60 series vacuums. Attempting to attach it to incompatible models may result in damage.

OPERATING INSTRUCTIONS

Once the Slim LED Brush is securely attached, you can begin cleaning. The LED light feature will activate automatically when the vacuum is in operation.

- **Power On:** Turn on your SAMSUNG Jet Stick Vacuum. The LED lights on the Slim LED Brush will illuminate, highlighting dust and debris on the floor surface.
- **Cleaning Technique:** Move the vacuum slowly and steadily across the floor. The LED illumination will help you identify areas that require more attention, especially in dimly lit spaces or under furniture.
- **Floor Types:** The brush is designed for effective cleaning on both hard floors and carpets. Adjust

your vacuum's power setting as needed for optimal performance on different surfaces.

- **Anti-Tangle Feature:** The anti-tangle roller is designed to reduce hair wrapping. If you notice a decrease in performance, refer to the Maintenance section for cleaning instructions.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Slim LED Brush.

Cleaning the Brush Roller

1. **Power Off and Detach:** Always turn off and detach the brush from the vacuum before performing any maintenance.
2. **Access the Roller:** Locate the release mechanism for the brush roller, usually a latch or button on the side of the brush head. Follow your vacuum's specific instructions for removing the roller.
3. **Remove Debris:** Carefully remove any tangled hair, threads, or large debris from the roller using scissors or a brush cleaning tool. The anti-tangle design helps, but occasional manual cleaning is still recommended.
4. **Wipe Down:** Use a soft, damp cloth to wipe down the roller and the inside of the brush head. Ensure all parts are completely dry before reassembling.
5. **Reassemble:** Insert the clean roller back into the brush head and secure it until it clicks into place.

Cleaning the LED Area

- Gently wipe the LED light area with a dry, soft cloth to remove any dust or dirt that might obstruct the light. Do not use abrasive cleaners or excessive moisture.

TROUBLESHOOTING

If you encounter issues with your Slim LED Brush, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
LED lights are not illuminating.	Vacuum not powered on; loose connection; obstructed sensor.	Ensure the vacuum is powered on. Check if the brush is securely attached. Clean any dust or debris from the LED area.
Brush roller is not spinning or spinning slowly.	Hair or debris tangled in the roller; obstruction; brush not properly attached.	Turn off the vacuum and detach the brush. Remove any tangled hair or obstructions from the roller (refer to Maintenance). Reattach the brush securely.
Reduced suction when using the brush.	Brush head clogged; vacuum filter needs cleaning; vacuum dustbin full.	Check the brush head for large obstructions. Clean or replace your vacuum's filter. Empty the vacuum's dustbin.
Brush detaches during use.	Improper attachment; worn connection point.	Ensure the brush is pushed firmly onto the vacuum's pipe until it clicks. If the issue persists, inspect the connection points for wear or damage.

If the problem persists after attempting these solutions, please contact SAMSUNG customer support for further assistance.

SPECIFICATIONS

Feature	Detail
Brand	SAMSUNG
Model Name	SAMSUNG Jet Slim LED Brush for Jet Stick Vacuums, VCA-SABC95/AA
