Naturehike Cloud-Up Base 2 Person Tent

Naturehike Cloud-Up Base 2 Person Tent Instruction Manual

1. PRODUCT OVERVIEW

The Naturehike Cloud-Up Base 2 Person Tent is designed for ultralight backpacking, camping, and hiking. This upgraded version features enhanced ventilation and a larger door for improved comfort and accessibility. It is constructed from durable 210T polyester with a waterproof coating, offering reliable protection against various weather conditions.

Key features include a double-layer design for optimal airflow, a high-density B3 mesh inner tent for ventilation and insect protection, and a robust 7001 aluminum pole structure for stability. The tent also comes with a footprint for added ground protection.

2. SETUP INSTRUCTIONS

Follow these steps to set up your Naturehike Cloud-Up Base 2 Person Tent. The tent is designed for quick and easy assembly, even for a single person.

- 1. Unpack Components:** Lay out the footprint, inner tent, tent fly, tent poles, stakes, and guy lines from the carry bag.
- 2. Assemble Poles:** Connect the aluminum pole sections to form the main tent frame. The poles are designed to snap together easily.
- 3. Lay Out Footprint and Inner Tent:** Spread the footprint on your chosen campsite. Place the inner tent on top of the footprint, aligning the corners.
- 4. Attach Inner Tent to Poles:** Insert the ends of the assembled poles into the grommets or clips at the corners of the inner tent. Secure the inner tent to the poles using the clips along the pole structure.
- 5. Drape Rain Fly:** Drape the tent fly over the inner tent, ensuring the doors and ventilation windows align. Attach the fly to the tent poles and secure it to the corners of the footprint or inner tent using the buckles or straps.

6. **Stake Down Tent:** Use the provided stakes to secure the tent corners and guy lines to the ground. This enhances stability, especially in windy conditions.
7. **Adjust Guy Lines:** Tighten the guy lines as needed to ensure the tent is taut and stable.

UPGRADED CLOUD UP SERIES

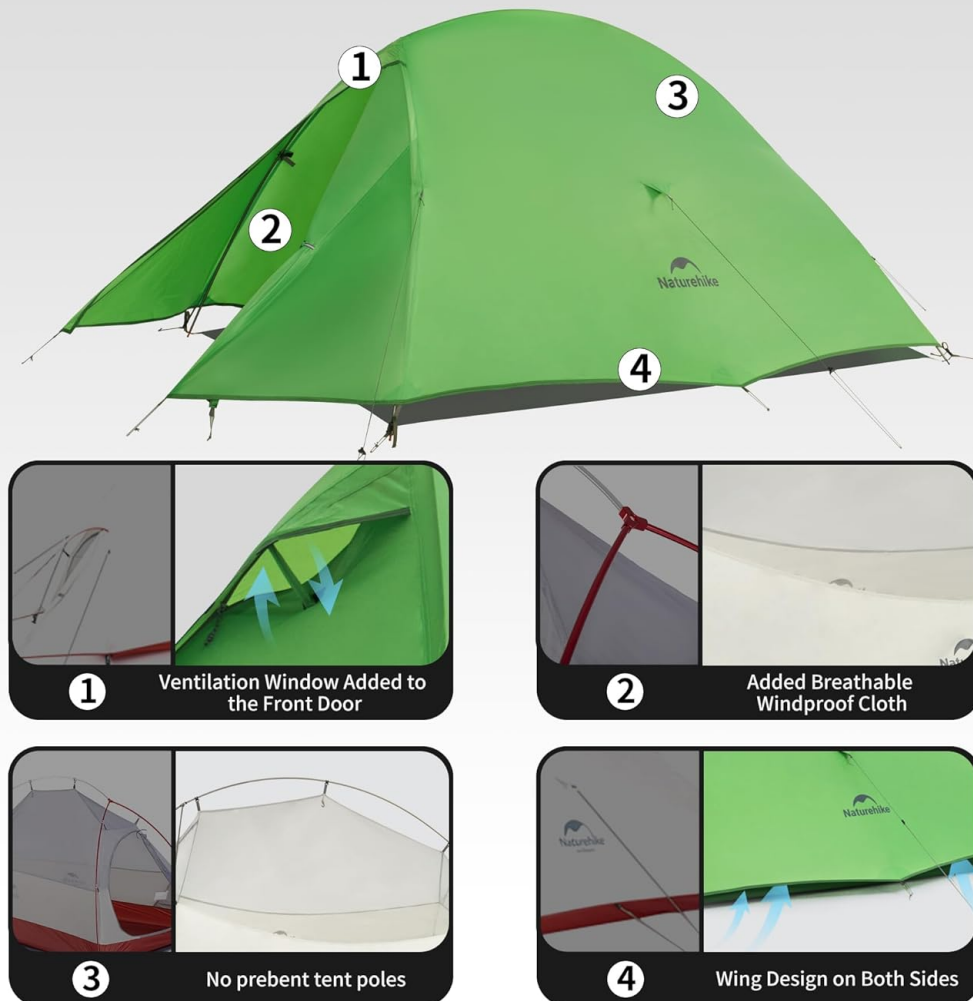

Image: Diagram illustrating the upgraded features of the Cloud-Up Base series, including a ventilation window, breathable windproof cloth, and wing design for improved airflow.

DOUBLE LAYER FREE STANDING TENT

The rainfly can be used separately as a sun shelter (**footprint is included**)

High density mesh wall provides good ventilation and anti-mosquito

3. OPERATING INSTRUCTIONS

Ventilation

The Cloud-Up Base tent features multiple ventilation windows to ensure good airflow and minimize condensation. Utilize the ventilation window above the front door and the wing design on both sides to create cross-ventilation. Keep these open when weather permits to maintain a comfortable interior climate.

Image: Close-up view of the tent's multiple ventilation windows, designed to provide excellent airflow and prevent condensation.

Door and Vestibule Use

The tent features a larger and taller front door for easier entry and exit. The front vestibule provides ample space to store gear such as shoes, backpacks, and cooking equipment, keeping the inner tent clean and dry. In bad weather, the vestibule allows for cooking without leaving the tent.

UPGRADED LARGER AND TALLER DOOR

Easier to get in and out of the tent

The photograph shows a person wearing a tan cap and a grey t-shirt sitting cross-legged inside a green tent. They are holding an open book. To their right, a small cooking pot sits on a stove. The tent is pitched on a rocky, grassy hillside under a clear blue sky.

The diagram consists of two line drawings of a tent. The left drawing shows a person sitting inside the tent with a dashed horizontal line indicating the height of the tent's peak. Below it is a black box with the text 'Cloud up'. The right drawing shows a person sitting inside the tent with a dashed horizontal line indicating the height of the tent's peak, which is lower than in the first drawing. Below it is a black box with the text 'Cloud up Base'.

Image: A person comfortably seated inside the tent, highlighting the upgraded larger and taller door for easy access.

LARGE STORAGE ROOM OF FRONT DOOR

The front door is designed with vestibule, to put your shoes, backpack, and other camping gears

Image: The tent's front vestibule area, demonstrating its capacity for storing camping gear like shoes and a backpack.

Versatile Configurations

The Cloud-Up Base tent offers three ways to build: as a complete double-layer tent for all weather, using only the rain fly and footprint as a sun shelter, or using only the inner tent for stargazing on clear nights.

Image: Visual representation of the three tent configurations: full tent, rainfly with footprint, and inner tent only.

4. MAINTENANCE

Proper care and maintenance will extend the life of your tent.

- **Cleaning:** Hand wash the tent with mild soap and water. Do not use harsh detergents or bleach. Avoid machine washing.
- **Drying:** Always ensure the tent is completely dry before packing it away to prevent mildew and odor. Hang it in a shaded, well-ventilated area.
- **Storage:** Store the tent in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid compressing it too tightly for long periods.
- **Pole Care:** Inspect tent poles for any damage or bends after each use. Clean any dirt from the pole sections.
- **Zipper Care:** Keep zippers clean and free of debris. Lubricate with a zipper lubricant if they become stiff.

5. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Condensation Inside Tent:** Ensure proper ventilation by opening the door and ventilation windows. Choose a campsite that allows for good airflow.
- **Tent Not Stable:** Make sure all stakes are firmly in the ground and guy lines are properly tensioned. In very windy conditions, consider adding extra guy lines or using heavier stakes.
- **Water Leaks:** While the tent is waterproof, prolonged heavy rain or improper setup can sometimes lead to leaks. Check that the rain fly is correctly positioned and taut, and that all seams are sealed.
- **Difficulty Assembling Poles:** Ensure all pole sections are fully connected. If a pole is bent, it may need to be replaced.

6. SPECIFICATIONS

| Feature | Detail |
|--------------------------------|--|
| Brand | Naturehike |
| Model Name | Naturehike Cloud up Base 2 Person Backpacking Tent |
| Occupancy | 2 Person |
| Seasons | 3 Season |
| Product Dimensions (L x W x H) | 82.7" x 51.2" x 41.3" |
