SETUP

1. Battery Installation

The clock requires one D-type battery (not included). To install:

1. Locate the battery cover on the back of the clock's central column.
2. Rotate the cover counter-clockwise to open.
3. Insert one D-type battery, ensuring correct polarity (+/-).
4. Replace the battery cover and rotate clockwise to secure.

OPERATING INSTRUCTIONS

1. Setting the Time

To set the correct time:

1. Locate the time setting dial on the right side of the clock.
2. Turn the dial counter-clockwise to advance the minutes and hours.
3. Continue turning until the desired time is displayed. Note that you cannot turn the dial backward. If you pass the desired time, you must cycle through 12 hours to reach it again.

2. AM/PM Indicator

The clock features an AM/PM icon next to the hour display to help distinguish between morning and afternoon hours. This indicator changes automatically as the time progresses.

3. Reinserting Number Panels

If a number panel accidentally comes out of its groove, gently insert it back into the designated slot. Ensure it is properly seated to allow for smooth flipping.

MAINTENANCE

To keep your mooas Flip Desk Clock in optimal condition:

- Wipe the clock with a soft, dry cloth to remove dust.
- Avoid using abrasive cleaners or solvents, as these can damage the finish.
- Ensure the clock is placed on a stable, flat surface to prevent accidental falls.
- Replace the D-type battery when the clock stops functioning or time becomes inaccurate.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Clock not operating/displaying time	No battery or depleted battery.	Ensure a fresh D-type battery is correctly installed.
Time is inaccurate (running fast/slow)	Weak battery or mechanical issue.	Replace the battery. If the issue persists, contact customer support. Note that slight deviations may occur due to the mechanical nature.
Numbers not flipping smoothly	Obstructed mechanism or bent number panel.	Check for any obstructions. Ensure all number panels are correctly seated in their grooves and not bent. Avoid bending the small pins that guide the flips.

Problem	Possible Cause	Solution
Loud clicking sound	Normal operation for a mechanical flip clock.	The clicking sound is inherent to the mechanical design as the numbers flip. This is not a defect.
