Viribus Viribus

Viribus Bike Bicycle Accessory User Manual

Model: Viribus

Introduction

Thank you for choosing the Viribus Bike Bicycle Accessory. This manual provides essential information for the safe and efficient use, assembly, maintenance, and troubleshooting of your new bicycle accessory. Please read this manual thoroughly before use and retain it for future reference.

Safety Guidelines

- Always wear a helmet when riding.
- Ensure all components are securely fastened before each ride.
- Check brakes and tires regularly for proper function and inflation.
- Adhere to local traffic laws and regulations.
- Avoid riding in adverse weather conditions or on unsafe terrain.

Setup and Assembly

Assembly is required for this product. Please follow the detailed instructions below. For visual guidance, refer to the assembly video if available on the product page or manufacturer's website.

1. **Unpacking:** Carefully remove all components from the packaging. Verify all parts are present against the included parts list.

2. **Handlebar Installation:** Attach the handlebars to the stem, ensuring they are centered and tightened securely.
3. **Wheel Attachment:** Install the front wheel, making sure the quick release or axle nuts are properly secured.
4. **Pedal Installation:** Identify left (L) and right (R) pedals. Thread them into the crank arms. Note that the left pedal has a reverse thread. Tighten firmly.
5. **Seat Post Adjustment:** Insert the seat post into the frame and adjust the height to a comfortable riding position. Secure with the quick release or bolt.
6. **Brake Adjustment:** Ensure brake levers are easily accessible and brakes engage smoothly and effectively. Adjust cable tension as needed.
7. **Tire Inflation:** Inflate tires to the recommended pressure indicated on the tire sidewall. The included pump can be used for this purpose.

Operating Instructions

The Viribus Bike Bicycle Accessory is designed for ease of use. Follow these guidelines for optimal performance.

- **Starting:** Mount the bicycle and begin pedaling. The power source is manual winding, meaning your pedaling effort propels the bike.
- **Braking:** This bicycle features a rim brake system. Gently squeeze both brake levers simultaneously to slow down and stop. Apply more pressure for quicker stops.
- **Gear Shifting:** This model features a Derailleur drivetrain with a Down Tube gear shifter. To change gears, operate the shifter located on the down tube. Shift to a lower gear for uphill climbs and a higher gear for flat or downhill riding.
- **Steering:** Maintain a firm but relaxed grip on the handlebars. Lean slightly into turns and use the handlebars to guide the front wheel.

Maintenance

Regular maintenance ensures the longevity and safe operation of your Viribus bicycle accessory.

- **Tire Pressure:** Check tire pressure before each ride using the included pump. Maintain pressure within the recommended range.
- **Chain Lubrication:** Lubricate the chain every few weeks, or more often if riding in wet or dusty conditions. This prevents rust and ensures smooth gear changes.
- **Brake Inspection:** Regularly inspect brake pads for wear and replace them when necessary. Ensure brake cables are not frayed and are properly tensioned.

- **Bolt and Nut Check:** Periodically check all bolts and nuts for tightness, especially on critical components like wheels, handlebars, and seat post.
- **Cleaning:** Clean the bicycle regularly with mild soap and water. Avoid high-pressure washing directly on bearings or electrical components (if applicable).

Troubleshooting

Problem	Possible Cause	Solution
Tires losing air quickly	Puncture, valve issue, or improper inflation.	Inspect for punctures and repair/replace tube. Check valve stem for leaks. Ensure proper inflation.
Brakes feel spongy or ineffective	Loose cable, worn brake pads, or misaligned calipers.	Adjust brake cable tension. Replace worn brake pads. Realign brake calipers.
Gears not shifting smoothly	Dirty/dry chain, misaligned derailleur, or stretched cable.	Clean and lubricate chain. Adjust derailleur limits and cable tension. Consult a bike mechanic if issues persist.
Squeaking or grinding noises	Lack of lubrication, loose components, or worn bearings.	Lubricate moving parts (chain, pedals). Tighten loose bolts. Inspect bearings for wear.

Specifications

Brand: Viribus

Model Name: Viribus

Bike Type: Road Bike, Childrens Bike Accessory

Age Range (Description): Adult

Suspension Type: Rigid

Included Components: Pump

Brake Style: Rim Brake

Power Source: Manual Winding

Assembly Required: Yes

Bicycle Gear Shifter Type: Down Tube

Bicycle Drivetrain Type: Derailleur

Skill Level: Beginner

UPC: 850059281062

ASIN: B0CPLS9Q19

Date First Available: December 6, 2023

Warranty and Support

Viribus is committed to providing excellent customer service and support for your product.

- **Official Warranty:** This product comes with a Limited Warranty.
- **Return Policy:** Enjoy a 30-day return policy for quality issues.
- **Warranty Coverage:** A 12-month warranty is provided for manufacturing defects.
- **Technical Support:** Lifetime technical support is available to assist you with any product-related inquiries or issues.
