Tyger Auto TG-LX3C82458

Tyger Auto LanderX Running Board Instruction Manual

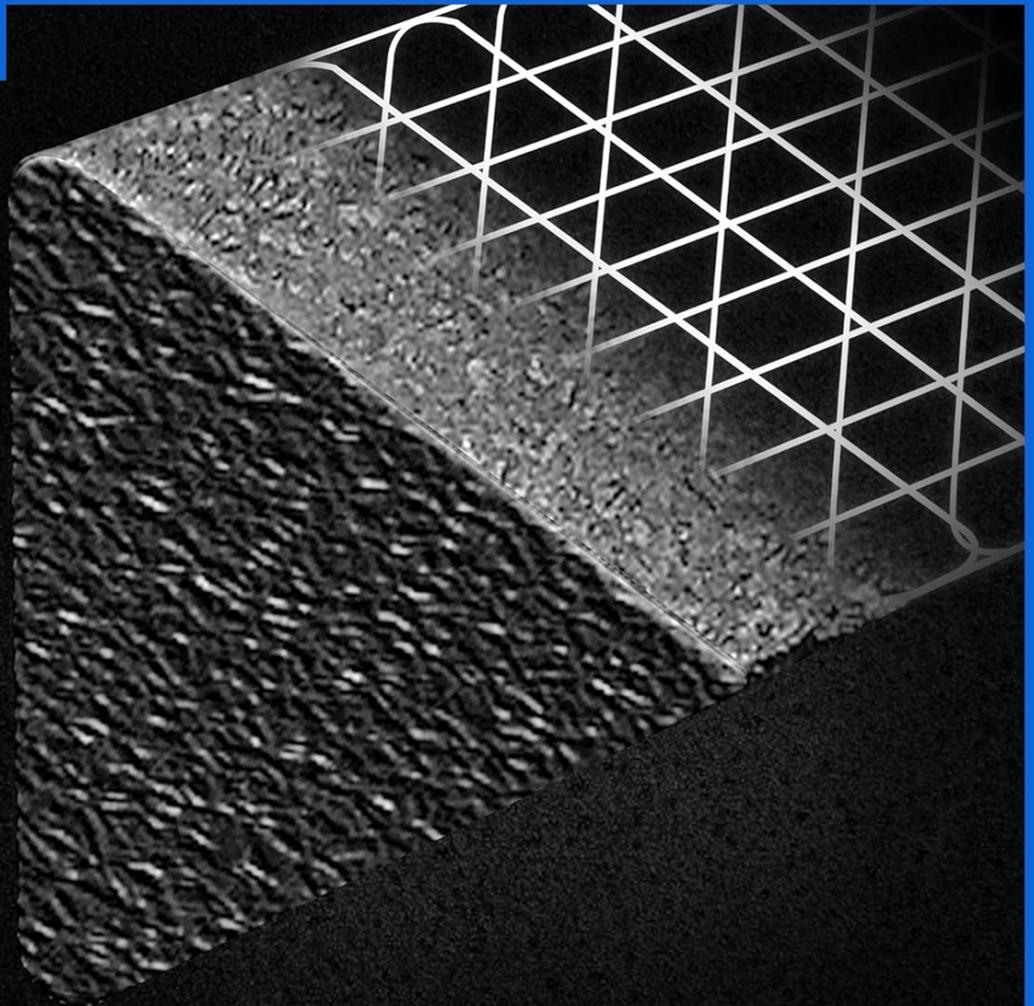

Model: TG-LX3C82458

PRODUCT OVERVIEW

The Tyger Auto LanderX Running Boards are designed for 2019-2025 Chevy Silverado / GMC Sierra 1500 and 2020-2025 2500 3500HD Double Cab models. These running boards feature a unique triangular carbon steel tubing design with a textured black finish, offering both durability and enhanced ground clearance. They provide an extra-wide 5-inch drop step for effortless entry and exit from your vehicle.

Pre-Installation Checklist

- Ensure all parts and hardware are accounted for as per the included parts list.
- Confirm your truck is a Double Cab model. Refer to the image below for visual confirmation.

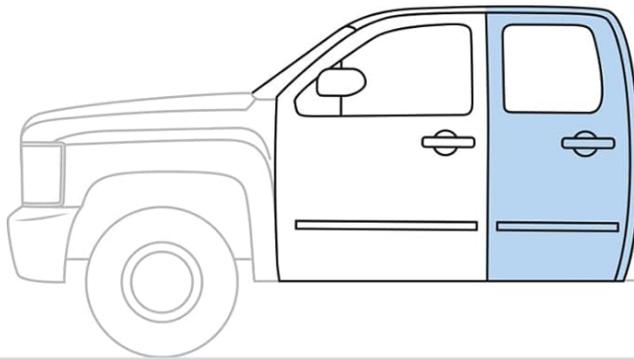

CONFIRM YOUR TRUCK IS A DOUBLE CAB

(**Still Unclear?** Verify cab size with your dealership.)

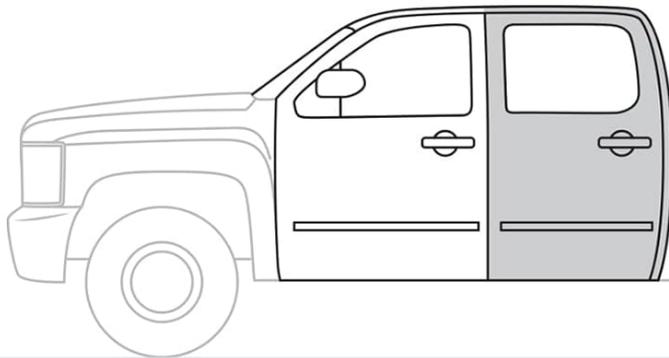

**EXTENDED

Step-by-Step Installation

1. **Identify Installation Locations:** Head under the vehicle to locate the four installation points along the backside of the rocker panel. These are typically pre-drilled holes.
2. **Install Brackets:** Attach the mounting brackets to the identified locations. Ensure you use the correct hardware as specified in the instruction manual, as different vehicle fitments may have slight variations.

Heavy-Duty Steel Brackets

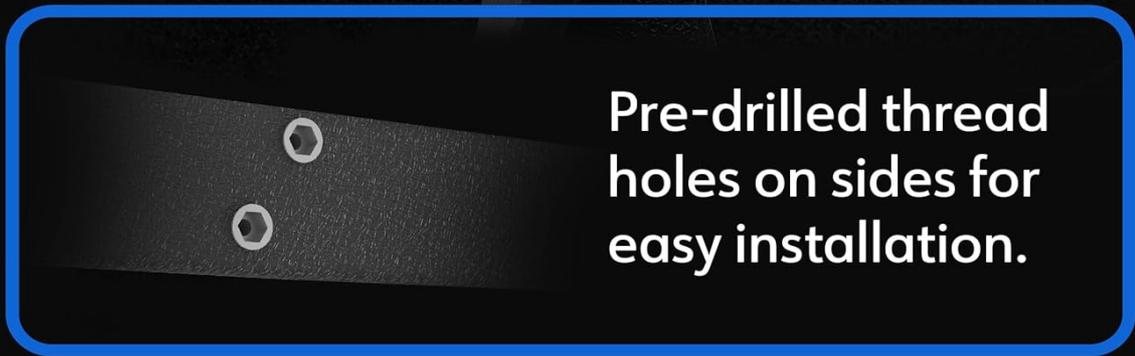

Image: A hand attaching a heavy-duty steel bracket to the vehicle's frame, demonstrating the secure bolt-on process.

- 3. Mount Running Boards:** Once all brackets are securely installed, lift the LanderX tube and align it with the brackets. Use the provided combo bolts to mount the running board to the brackets. Identify the correct side (Left/Driver or Right/Passenger) by checking the 'L' or 'R' marking on the underside of each running board.
- 4. Adjust and Tighten:** Before fully tightening all hardware, adjust the running board to your desired position. Once satisfied with the alignment and fit, securely tighten all bolts. Repeat the process for the other side of the vehicle.

OPERATING INSTRUCTIONS

The Tyger Auto LanderX Running Boards are designed for ease of use and durability. Simply step onto the 5-inch wide step surface to assist with entering or exiting your vehicle. The triangular tubing design provides robust support and stability.

5 Inch Drop

For effortless entry & exit to the vehicle

MAINTENANCE

To ensure the longevity and appearance of your LanderX Running Boards, regular maintenance is recommended:

- **Cleaning:** Wash the running boards regularly with mild soap and water to remove dirt, salt, and road grime. Rinse thoroughly and dry to prevent water spots.
- **Inspection:** Periodically inspect all mounting hardware for tightness. Re-tighten any loose bolts to maintain structural integrity.
- **Finish Care:** The dual-stage E-coating powder textured black finish is designed for improved rust and corrosion resistance. Avoid using abrasive cleaners or harsh chemicals that could damage the finish.

WHY TYGER?

BETTER RUST RESISTANCE

Image: Cross-section diagram illustrating the multi-layer coating process for enhanced rust resistance, including pre-treatment, E-coating, and textured black powder coat.

TROUBLESHOOTING

If you encounter any issues with your LanderX Running Boards, consider the following:

- **Loose Fit:** Check all mounting bolts and ensure they are tightened to the recommended torque specifications.
- **Unusual Noises:** Inspect for any loose components or contact points between the running board and the vehicle frame.
- **Corrosion/Damage:** While designed for durability, extreme conditions can cause wear. Address any signs of damage promptly to prevent further issues.

If problems persist, please contact Tyger Auto customer support.

SPECIFICATIONS

Brand	Tyger Auto
Model	Tyger LanderX (TG-LX3C82458)
Material	Carbon Steel
Exterior Finish	Powder E-Coating (Textured Black)
Item Dimensions (L x W x H)	78.15 x 6.38 x 5.08 inches
Item Weight	43 Pounds
Weight Limit	500 lbs
UPC	816239029152
