Geeni GN-CW072-277

Geeni Smart WiFi Baby Monitor Camera with Clock User Manual

Brand: Geeni | Model: GN-CW072-277

1. Product Overview

The Geeni Smart WiFi Baby Monitor Camera with Clock is a versatile device designed for home security and baby monitoring. It features 1080p HD video, two-way audio, a built-in temperature sensor, lullabies, white noise, and a customizable nightlight. The device integrates seamlessly with the Geeni app and is compatible with Google Home and Amazon Alexa for convenient voice control.

2. What's in the Box

- 1x Geeni Smart Clock Camera
- 1x Power Cord
- 1x User Manual

3. Setup Guide

Follow these steps to set up your Geeni Smart Clock Camera:

1. **Download the Geeni App:** Scan the QR code below or search for "Geeni" in your device's App Store (iOS) or Google Play Store (Android). The Geeni app controls all smart products and requires no additional hub.

Image: QR code for downloading the Geeni app, which is essential for controlling the smart clock camera.

2. **Plug In:** Connect the provided power cord to the camera and plug it into a power source. The device will power on and display its initial settings.
3. **Connect to Wi-Fi:** Open the Geeni app and follow the on-screen instructions to connect your camera to your home Wi-Fi network. Ensure your Wi-Fi is 2.4GHz for optimal compatibility.
4. **Registration:** Register an account on the Geeni app using your email address and create a password. You may need to input a verification code sent to your email.

Note: Some users have reported initial difficulties with Wi-Fi connection. Ensure your Wi-Fi network is stable and follow the app's prompts carefully. If issues persist, try restarting the camera and your router.

4. Operating Instructions

4.1. Live View and Remote Monitoring

Access the live 1080p HD video feed from your camera anytime, anywhere using the Geeni app on your smartphone. This allows you to monitor your baby or home remotely.

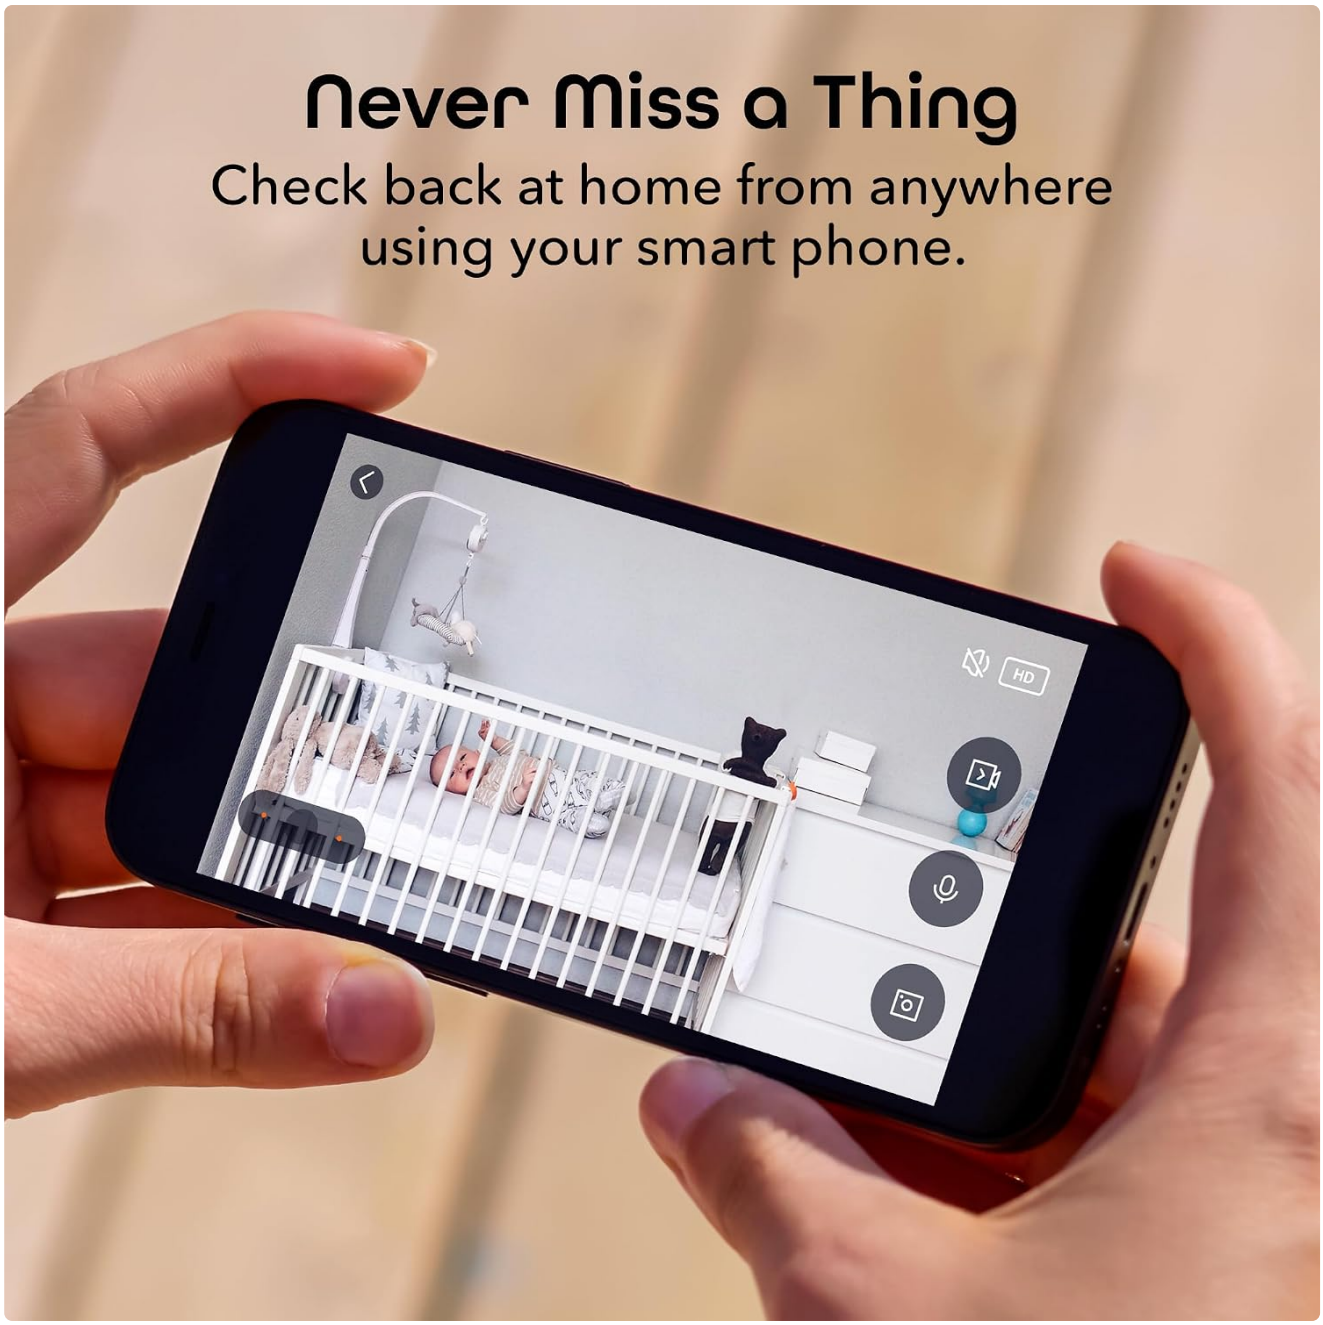

Image: A smartphone held in hands, showing the live video feed from the camera, allowing users to check on their home from anywhere.

4.2. Two-Way Audio and Lullabies

Use the two-way audio feature to communicate with your baby or other family members. The app also includes a selection of 6 lullabies and a white noise setting to help soothe your baby to sleep.

Image: A baby sleeping peacefully in a crib, with musical notes and sound waves overlaid, representing the lullabies and white noise features of the camera.

4.3. Temperature Monitoring and Smart Clock

The built-in temperature sensor displays the current room temperature on the clock face and can send notifications to your phone if the temperature goes too hot or too cold. The smart clock automatically syncs time and date to your phone.

4.4. Motion and Cry Detection

Receive instant alerts on your phone for detected sound or motion. This feature helps you stay informed about your baby's activity.

4.5. Smart Nightlight

The integrated nightlight can be scheduled or controlled remotely via the Geeni app, providing a soft glow for comfort.

4.6. Voice Control Integration

The camera is compatible with Google Home and Amazon Alexa. You can use voice commands to view the camera feed on compatible smart displays, for example, "Alexa, show me the baby room camera."

Image: A tablet displaying the live camera feed of a baby in a crib, with "Voice Control" text and logos for "works with Google Home" and "works with Alexa" indicating compatibility.

4.7. Built-in Call Button

The camera features a call button that, when pressed, can initiate an instant video call to a pre-configured device, allowing others to easily reach you.

Image: A hand pressing the call button on the Geeni Smart Clock Camera, while a smartphone screen shows an incoming video call from the camera, indicating the two-way communication feature.

5. Maintenance

To ensure optimal performance and longevity of your Geeni Smart Clock Camera, follow these general maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and exterior. Avoid abrasive cleaners or solvents.
- **Placement:** Place the camera on a stable, flat surface indoors. Avoid direct sunlight, extreme temperatures, or high humidity.
- **Software Updates:** Regularly check the Geeni app for firmware updates to ensure your device has the latest features and security enhancements.

6. Troubleshooting

If you encounter issues with your Geeni Smart Clock Camera, refer to the following common troubleshooting tips:

- **Connection Issues:** If the camera fails to connect to your Wi-Fi network or the app, ensure your Wi-Fi is 2.4GHz. Try restarting the camera by unplugging it for 30 seconds and plugging it back in. Also, restart your home router.
- **MicroSD Card Issues:** The product description states support for up to 128GB MicroSD cards. However, some users have found that the camera may only reliably support FAT32 formatted SD cards, often up to 32GB. If you experience issues with larger cards, try a 32GB FAT32 formatted card.
- **No Motion/Cry Detection:** Ensure the detection sensitivity settings are correctly configured within the Geeni app. Check for any obstructions in the camera's field of view.
- **Voice Control Not Working:** Verify that your Geeni account is properly linked to your Google Home or Amazon Alexa account in their respective apps. Ensure your voice assistant device is connected to the same Wi-Fi network as the camera.

7. Specifications

Feature	Detail
Model Number	GN-CW072-277
Indoor/Outdoor Usage	Indoor
