Ultima Cosa UC-SM003

Ultima Cosa Sparkling Water Soda Maker User Manual

Model: UC-SM003

INTRODUCTION

Welcome to the Ultima Cosa Sparkling Water Soda Maker. This manual provides essential information for the safe and efficient operation of your new appliance. Please read it thoroughly before first use and retain it for future reference.

Image: The Ultima Cosa Sparkling Water Soda Maker, shown with its main unit, two reusable BPA-free bottles (1L and 350ml), and a 60L CO2 cylinder.

SAFETY INFORMATION

- Always use cold water for carbonation to achieve optimal results and prevent overflow.
- Do not carbonate anything other than plain water in the carbonating bottle unless specified by the manufacturer. Carbonating other liquids can cause excessive pressure and bottle rupture.
- Ensure the carbonating bottle is securely attached before operating the machine.
- Do not remove the carbonating bottle during carbonation.
- Keep the appliance away from heat sources and direct sunlight.
- Store CO2 cylinders in a cool, dry place, away from direct heat.
- Keep out of reach of children.
- Only use original Ultima Cosa carbonating bottles and CO2 cylinders.

WHAT'S INCLUDED

Your Ultima Cosa Sparkling Water Soda Maker package includes:

- 1 x Sparkling Water Soda Maker Unit
- 1 x 60L CO2 Cylinder
- 1 x 1-Liter BPA-Free Reusable Bottle
- 1 x 500ml BPA-Free Reusable Bottle
- 1 x 350ml BPA-Free Reusable Bottle

Image: All components included with the Ultima Cosa Sparkling Water Soda Maker: the main unit, a CO2 cylinder, and various sized reusable bottles.

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Install CO2 Cylinder:**

- Place the soda maker on a flat, stable surface.
- Remove the back cover of the soda maker (if applicable, based on typical soda maker designs).
- Screw the CO2 cylinder into the designated compartment until it is firmly secured. Do not overtighten.
- Replace the back cover.

3. **Prepare Bottle:** Rinse the carbonating bottle with cold water before first use.

OPERATING INSTRUCTIONS

Follow these simple steps to create your sparkling beverages:

1. **FILL:** Fill the carbonating bottle with cold water up to the indicated fill line (usually the "800ml" mark for the 1L bottle).
2. **TWIST:** Place the bottle into the soda maker's magnetic stand and twist it securely into place.

3. **PRESS:** Press the carbonation button on top of the machine for 2-3 seconds, then release. Repeat 1-2 times for desired fizziness. The automatic pressure relief valve will release excess gas.
4. **Release Pressure:** Gently press the gas relief button (if separate) or wait for the automatic pressure relief to complete.
5. **Enjoy:** Remove the carbonated bottle and pour your sparkling water. You can add fruit, juice, or syrup to create flavored drinks.

1. Put drinking water into the PET bottle up to the "800ml" mark

2. Fasten the bottle cap and put the bottle on to the magnetic stand.

3. Press 2-3 seconds. Total 1-2 times.

4. Pressure relief to hit the 1st gas slow relief mark, and turn to the 2nd gas relief mark.

5. Enjoy your DIY sparkling water made by Philips sparkling water maker.

MAINTENANCE AND CLEANING

- **Machine Cleaning:** Wipe the soda maker unit with a damp cloth. Do not immerse the unit in water.
- **Bottle Cleaning:** Wash carbonating bottles with lukewarm water and a mild dish soap. Do not wash in a dishwasher or use hot water, as this can damage the bottle.
- **Storage:** Store the soda maker in a cool, dry place when not in use.

TROUBLESHOOTING

Low Carbonation / No Fizz

- **Check CO2 Cylinder:** Ensure the CO2 cylinder is not empty and is properly installed.
- **Cold Water:** Make sure you are using very cold water. Cold water absorbs CO2 more effectively.
- **Carbonation Cycles:** Increase the number of carbonation presses (up to 3-4 times) for more fizz.
- **Bottle Seal:** Ensure the carbonating bottle is securely twisted into place to prevent gas leakage.

Water Overflow

- **Fill Line:** Do not fill the carbonating bottle above the maximum fill line.
- **Cold Water:** Always use cold water. Warm water can cause excessive foaming and overflow.

Difficulty Removing Bottle

- **Pressure Release:** Ensure all pressure has been released from the bottle before attempting to remove it. The automatic pressure relief valve should have completed its cycle.
