## 5. CARE AND MAINTENANCE

---

Maintaining your SHLAND Box Spring is simple due to its durable construction and easy-clean fabric cover.

- **Fabric Cover:** The high-quality, wear-resistant fabric cover can be easily removed for spot cleaning. Use a mild detergent and a damp cloth for spills or stains. Allow to air dry completely before reattaching.
- **Metal Frame:** Periodically check the metal frame for any loose connections. Tighten bolts as needed to maintain stability and prevent squeaking. Wipe the metal frame with a dry cloth to remove dust.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals on either the fabric cover or the metal frame, as this may damage the materials.

## 6. TROUBLESHOOTING

---

The SHLAND Box Spring is designed for quiet and reliable performance. If you encounter any issues, refer to the following common solutions:

- **Squeaking Noises:**

- Ensure all bolts and connections on the metal frame are securely tightened. Loose connections are the most common cause of squeaking.
- Check if the box spring is placed on an uneven surface. Adjust its position or use shims to level it.
- Verify that the mattress itself is not the source of the noise.

- **Instability/Wobbling:**

- Re-check all assembly steps to ensure correct installation.
- Confirm that the box spring is fully seated within your bed frame (if applicable) and that the bed frame itself is stable.

- **Cover Not Fitting Properly:**

- Ensure the metal frame is correctly assembled and its dimensions match the cover.
- Adjust the cover to ensure it is evenly stretched over the frame.
