## 2. SAFETY INFORMATION

---

Please read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage, personal injury, or product malfunction.

- Ensure all water supply lines are turned off before beginning installation.
- Consult a qualified plumber if you are unsure about any installation steps.
- Do not use abrasive cleaners or harsh chemicals on the product finish.
- Verify all connections are secure and leak-free after installation.

## 3. PACKAGE CONTENTS

---

Verify that all components are present and undamaged before proceeding with installation.

- Shower Panel System (Main Unit)

- Handheld Shower Head with Hose
- Mounting Hardware
- Installation Manual (this document)
- Valve

## 4. SETUP AND INSTALLATION

---

The BWE Shower Panel System is designed for wall-mounted installation. All necessary assembly accessories are included. The system comes with pre-plumbed hot/cold water pipelines and a standard plumbing connector for quick installation.

### 4.1 Tools Required (Not Included)

- Adjustable Wrench
- Screwdriver (Phillips and Flathead)
- Drill
- Measuring Tape
- Level
- Pencil
- Sealant Tape (Teflon Tape)

### 4.2 Installation Steps

1. **Prepare the Installation Area:** Turn off the main water supply. Remove any existing shower fixtures. Clean the wall surface where the shower panel will be mounted.
2. **Mark Mounting Points:** Hold the shower panel against the wall at the desired height. Use a pencil to mark the locations for the mounting brackets. Refer to the dimensions image for guidance.

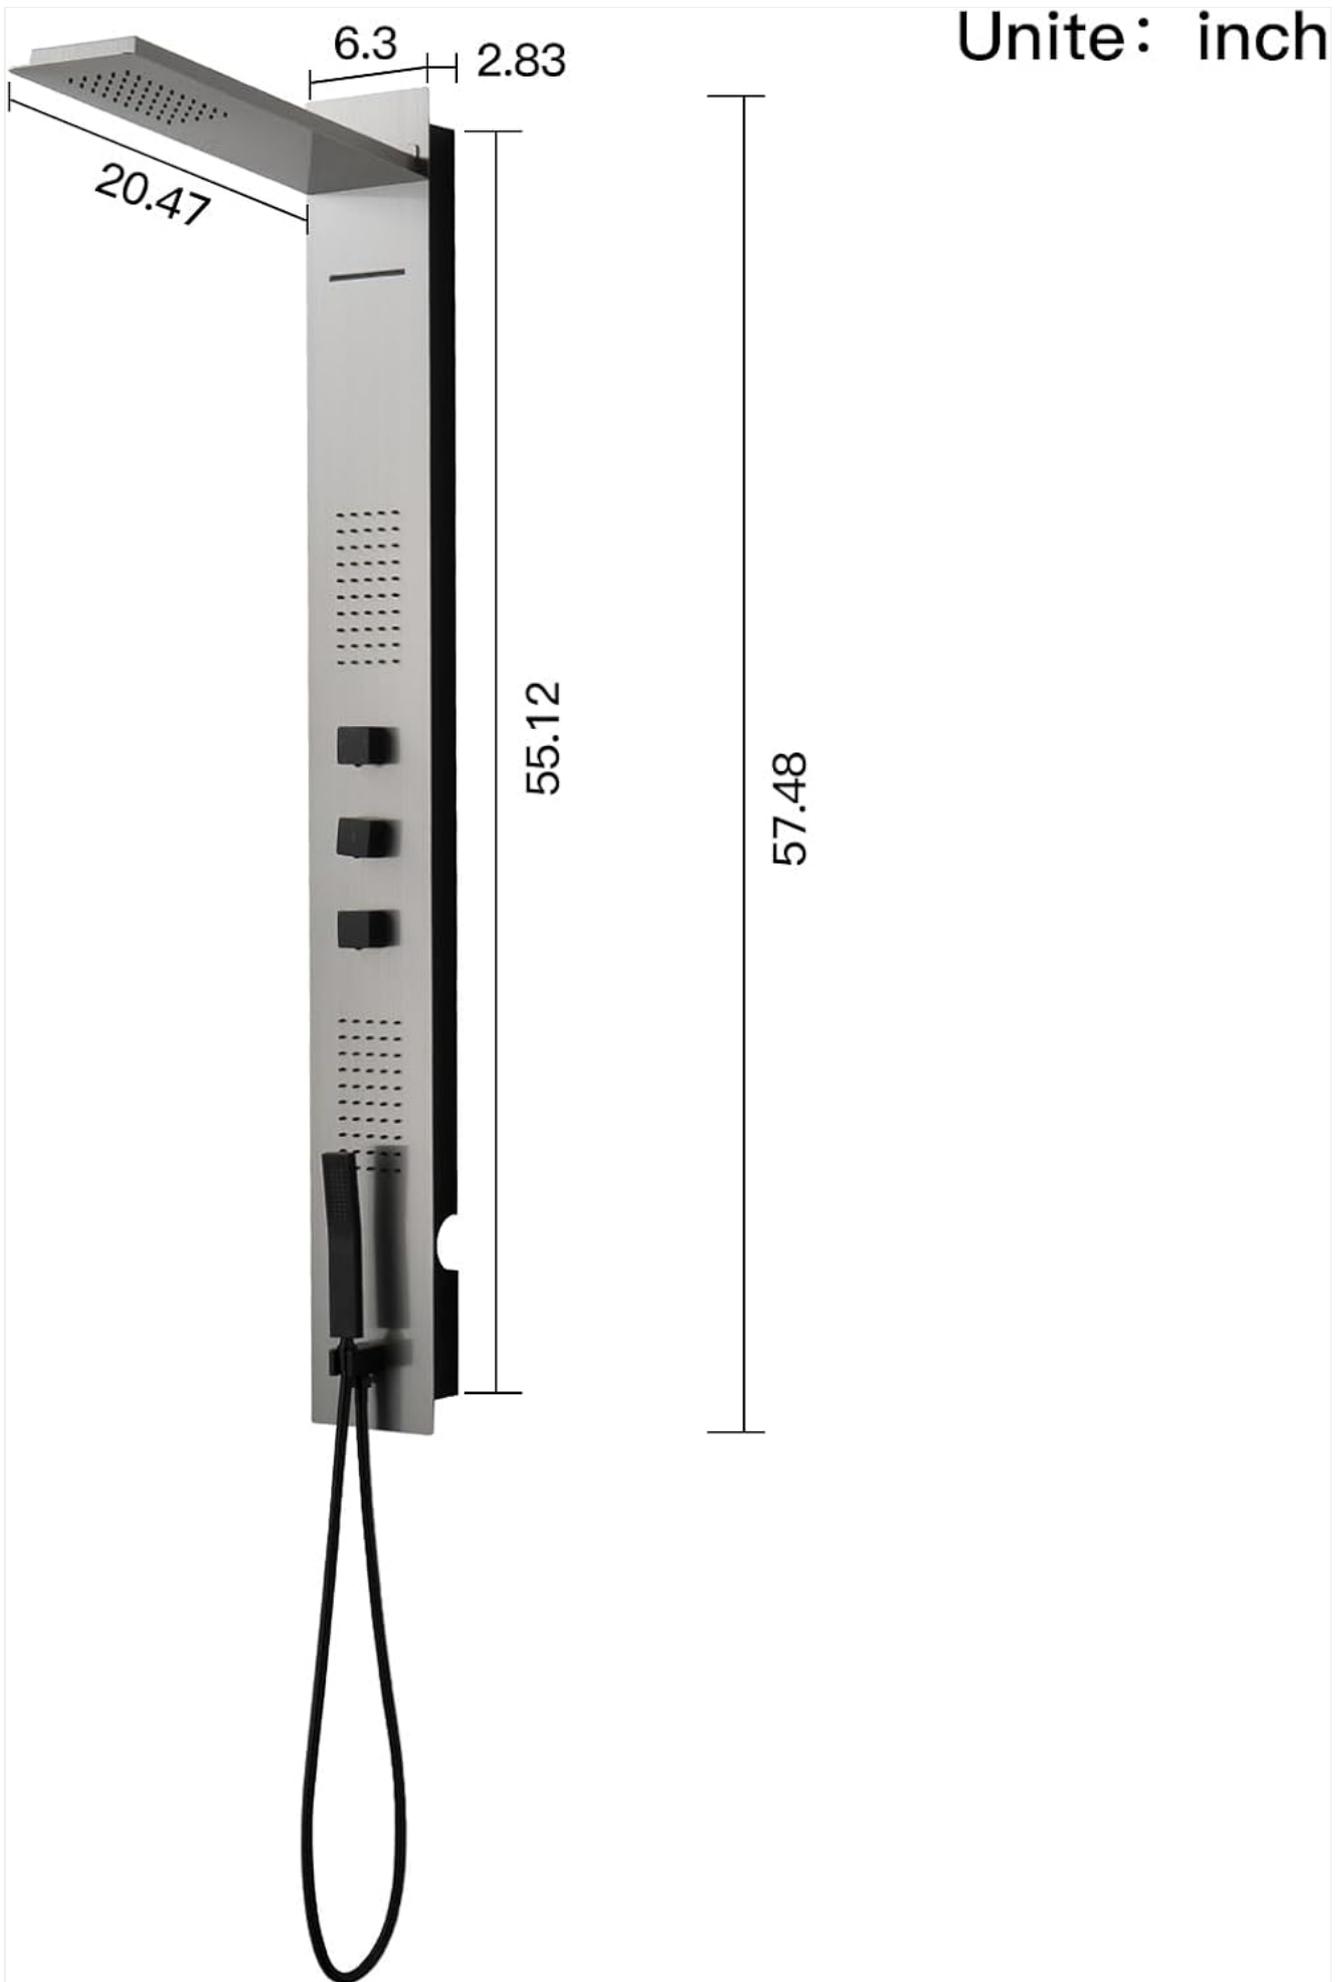

Image 4.1: Product dimensions for accurate installation planning.

3. **Drill Holes and Install Brackets:** Drill pilot holes at the marked points. Insert wall anchors if necessary. Secure the

mounting brackets to the wall using the provided screws. Ensure the brackets are level.

4. **Connect Water Lines:** Connect the hot and cold water supply lines to the corresponding inlets on the back of the shower panel. Use sealant tape on all threaded connections to prevent leaks. Ensure connections are tight but do not overtighten.
5. **Mount the Shower Panel:** Carefully hang the shower panel onto the installed mounting brackets. Ensure it is securely seated.
6. **Connect Handheld Shower:** Attach the handheld shower hose to its designated outlet on the panel and connect the handheld shower head.
7. **Test for Leaks:** Slowly turn on the main water supply. Check all connections for leaks. If any leaks are detected, turn off the water supply and re-tighten the connections.
8. **Final Check:** Ensure all functions operate correctly.

## 5. OPERATING INSTRUCTIONS

---

Your BWE Shower Panel System offers multiple functions for a customized showering experience.

### 5.1 Controls

- **Temperature Adjustment Knob:** This knob controls the water temperature. Rotate it to adjust between hot (H) and cold (C) water.
- **Function Adjustment Knob:** This knob allows you to select between the different shower functions: Waterfall, Rainfall, Massage Jets, and Handheld Shower Head.

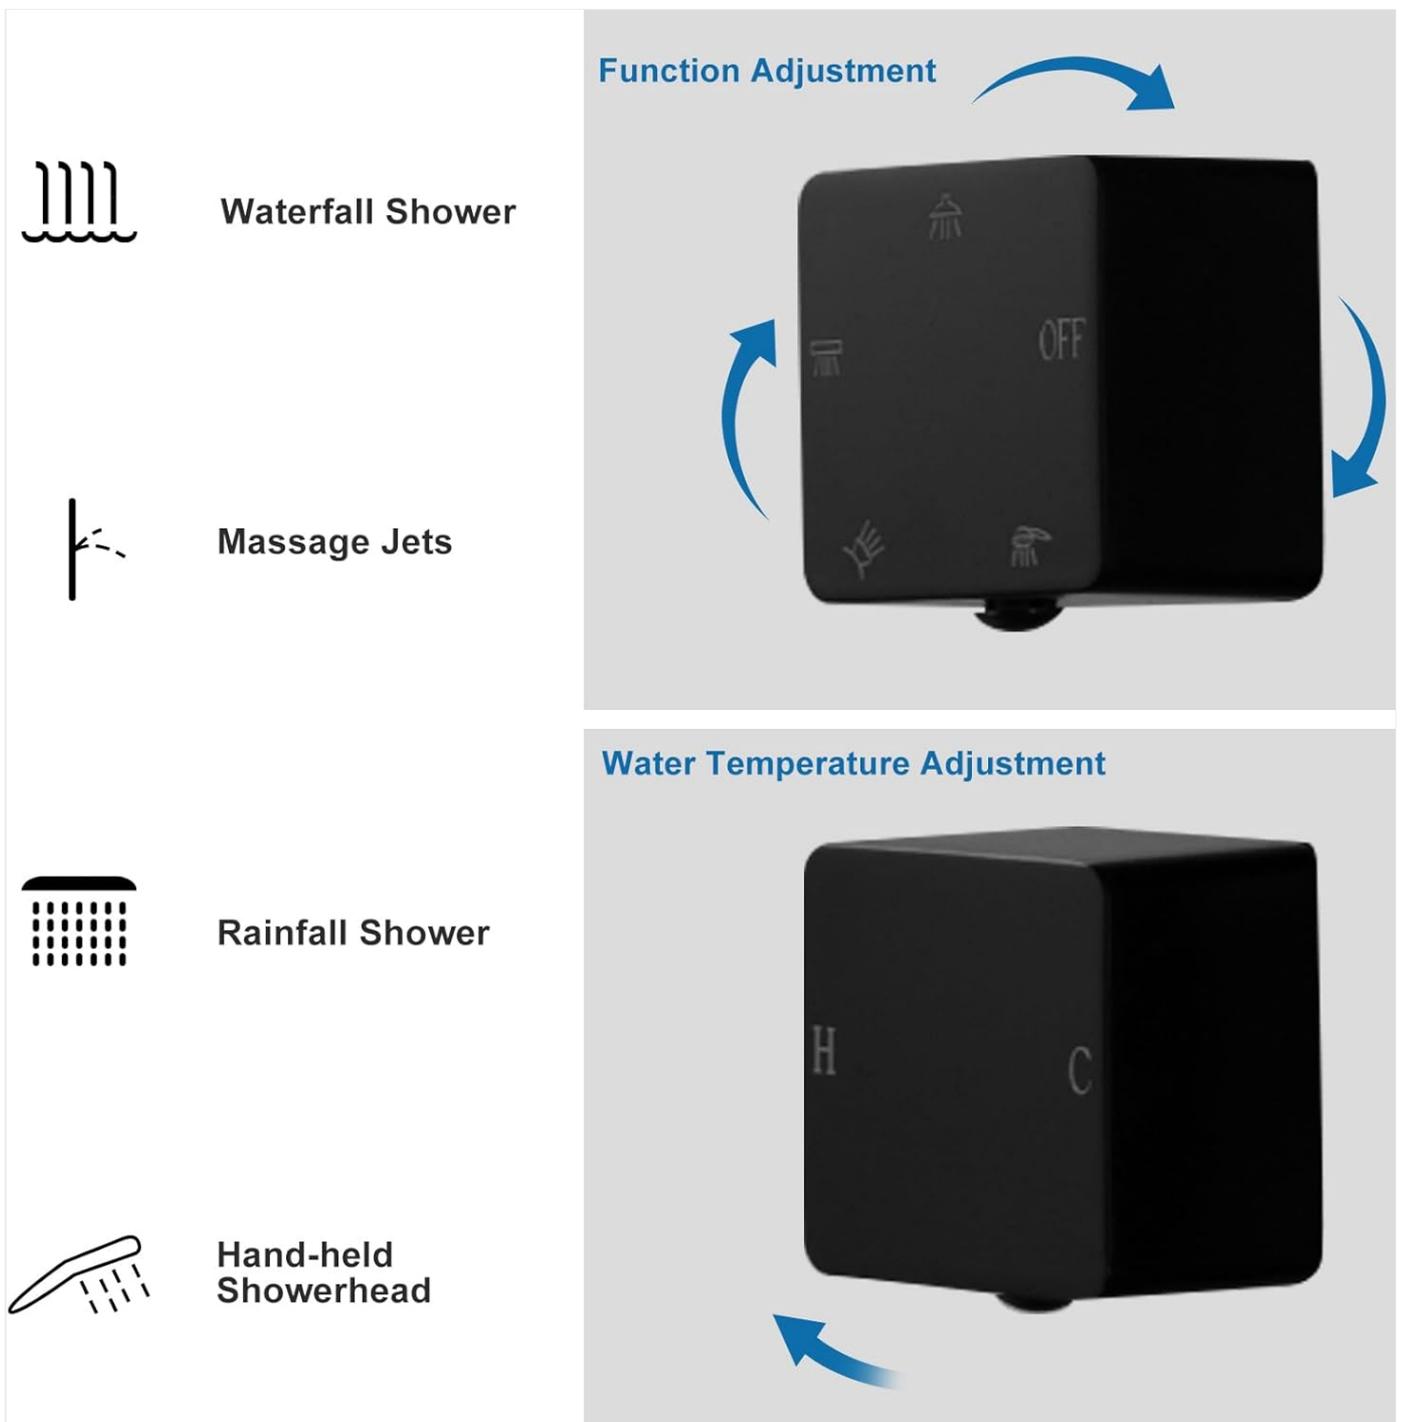

Image 5.1: Controls for function selection and temperature adjustment.

## 5.2 Shower Functions

- **Rainfall Shower:** Provides a wide, gentle overhead spray, simulating natural rainfall.

Image 5.2: Rainfall shower mode in use.

- **Waterfall Shower:** Delivers a broad, flat stream of water for a unique showering experience.
- **Massage Jets:** Two body jets provide targeted, powerful sprays for muscle relief. These can be used separately.

Image 5.3: Massage body jets in operation.

- **Handheld Shower Head:** Offers flexibility for focused rinsing, cleaning, or assisting children and pets. It features an adjustable flow rate.

Image 5.4: Handheld shower head in operation.

## 6. MAINTENANCE

---

Regular maintenance will ensure the longevity and optimal performance of your shower panel system.

- **Cleaning:** Clean the brushed nickel and black finish with a soft cloth and mild soap or a non-abrasive bathroom cleaner. Avoid harsh chemicals, abrasive pads, or polishes, as these can damage the finish.
- **Nozzle Cleaning:** Periodically clean the silicone nozzles on the rainfall head and massage jets by gently rubbing them to dislodge any mineral buildup.
- **Leak Checks:** Regularly inspect all connections for any signs of leaks. Address any leaks promptly to prevent water damage.

## 7. TROUBLESHOOTING

---

Refer to the following table for common issues and their potential solutions.

Problem	Possible Cause	Solution
Low Water Pressure	<ul style="list-style-type: none"> <li>Partially closed water supply valve</li> <li>Clogged nozzles or shower head</li> <li>Low household water pressure</li> </ul>	<ul style="list-style-type: none"> <li>Ensure main water supply valves are fully open.</li> <li>Clean shower head and jet nozzles.</li> <li>Consult a plumber to assess household water pressure.</li> </ul>
Leaks from Connections	<ul style="list-style-type: none"> <li>Loose connections</li> <li>Insufficient sealant tape</li> <li>Damaged O-rings or washers</li> </ul>	<ul style="list-style-type: none"> <li>Turn off water supply, then gently tighten connections.</li> <li>Reapply sealant tape to threaded connections.</li> <li>Inspect and replace any damaged O-rings or washers.</li> </ul>
Inconsistent Water Temperature	<ul style="list-style-type: none"> <li>Water heater issues</li> <li>Pressure balance valve malfunction</li> </ul>	<ul style="list-style-type: none"> <li>Check your water heater settings.</li> <li>Contact a qualified plumber for inspection of the pressure balance valve.</li> </ul>
