AKIRES AK-75R

AKIRES Swamp Cooler Air Conditioner User Manual

Model: AK-75R | Brand: AKIRES

1. INTRODUCTION

Thank you for choosing the AKIRES Swamp Cooler Air Conditioner. This 3-in-1 portable evaporative cooler functions as an air cooler, fan, and humidifier, designed to provide efficient and comfortable cooling for various indoor and outdoor spaces. This manual provides essential information for safe operation, setup, maintenance, and troubleshooting to ensure optimal performance and longevity of your unit.

2. IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- Do not operate any appliance with a damaged cord or plug.
- Do not use the appliance near water or in wet conditions.
- Always unplug the appliance from the power outlet before cleaning, servicing, or moving.
- Do not insert fingers or foreign objects into the air inlets or outlets.

- Ensure the appliance is placed on a stable, level surface to prevent tipping.
- Keep the appliance away from heat sources, direct sunlight, and flammable materials.
- Only use the appliance for its intended household use as described in this manual.
- Supervise children and pets when the appliance is in operation.
- Do not use the cooling function without water in the tank. The control panel will display "DO NOT USE WITHOUT WATER".

3. PACKAGE CONTENTS

Verify that all items are included in your package:

- AKIRES Swamp Cooler Air Conditioner Unit
- Remote Control
- 4 x Ice Packs
- User Manual (this document)

4. SETUP GUIDE

4.1 Placement

Place the unit on a flat, stable surface. The unit is designed for portability with 360° universal wheels, allowing easy movement between rooms.

Carry Around.Cool Around

Image: The AKIRES cooler shown in different environments, emphasizing its portability and ease of placement.

4.2 Filling the Water Tank

1. Open the top lid of the unit.
2. Pour clean water into the top water tank. The unit has a 4.2-gallon tank, reducing the need for frequent refills.
3. Monitor the water level indicator on the front of the unit to ensure it stays between the 'MIN' and 'MAX' lines.
4. For enhanced cooling, place the provided ice packs (after freezing them for 3-5 hours) into the upper water tank alongside the water.

4.2-GAL Water Tank for 13H Cooling

You don't need to refill water frequently

To avoid water deterioration and odor. Please pay attention to update the water.

5. OPERATING INSTRUCTIONS

Your AKIRES Swamp Cooler can be operated using the control panel on top of the unit or the included remote control.

Easy to Use

Image: A detailed view of the control panel and remote control, highlighting the intuitive button layout for easy operation.

5.1 Control Panel Functions

- **ON/OFF:** Powers the unit on or off.
- **SPEED:** Cycles through 3 fan speeds (Low, Mid, High).
- **TIMER:** Sets the auto-off timer from 1 to 12 hours.
- **MODE:** Selects operating mode: Normal, Natural, or Sleep.
- **COOL:** Activates or deactivates the evaporative cooling/humidification function. Ensure water is in the tank when using this mode.
- **SWING:** Activates or deactivates the 120° automatic oscillation for wide-angle air distribution.

5.2 Operating Modes

- **Fan Mode:** Operates as a standard fan, circulating air without water.
- **Humidifier Mode:** When water is added and the COOL function is active, the unit humidifies the air, beneficial for dry environments.
- **Air Cooler Mode:** With water and ice packs, the unit provides powerful evaporative cooling.

Image: A visual representation of the unit's three functions: Fan, Humidifier, and Cooler, highlighting its versatility.

5.3 Oscillation

The unit features a 120° automatic oscillation function to distribute cool air evenly across a wider area. The horizontal louvers can be manually adjusted for vertical airflow direction.

Immediate cool

High airflow fills your room with breezy cool at ultra-fast speeds

6. MAINTENANCE

Regular maintenance ensures the efficiency and longevity of your AKIRES Swamp Cooler.

6.1 Water Tank Cleaning

To prevent water deterioration and odor, regularly update the water in the tank. The unit features a drain hole at the bottom for easy water removal.

1. Unplug the unit from the power outlet.
2. Locate the drain hole at the bottom of the unit.
3. Remove the cap to drain the water completely.
4. Clean the tank with a soft cloth and mild detergent if necessary. Rinse thoroughly.
5. Replace the drain cap securely before refilling.

6.2 Filter Maintenance

The unit is equipped with a composite ice curtain filter system (PP corrosion-resistant filter, HEPA filter, Activated Carbon Fibre Filter) that purifies air by trapping hair, droplets, bacteria, and small allergens. Regularly clean the filter for optimal air quality.

4-in-1 Composite Ice Curtain.

Multiple layers of filtering, purification, and humidification.

HAPA filter and PP corrosion-resistant material filter and purify hair, droplets, bacteria, small allergens, etc. The filtration of the filter ensures that every breath is beautiful and healthy.

Image: A diagram showing the multi-layered filtration system, including PP corrosion-resistant, HEPA, and Activated Carbon Fibre filters.

1. Unplug the unit.
2. Remove the dust cover/cooling pad from the back of the unit.
3. Gently clean the filter with a soft brush or vacuum cleaner to remove dust and debris.
4. If heavily soiled, rinse the filter under running water (ensure it's completely dry before reinserting).
5. Reinstall the filter and dust cover.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not turn on.	No power supply.	Check if the power cord is securely plugged into a working outlet.
No cool air/humidification.	Water tank is empty or COOL function is off.	Fill the water tank and ensure the COOL button is activated.
Weak airflow.	Air filter is dirty or fan speed is too low.	Clean the air filter. Increase the fan speed using the SPEED button.
Unusual odor.	Stagnant water in the tank.	Drain and clean the water tank thoroughly. Use fresh water.
Water leakage.	Drain cap is loose or tank is overfilled.	Ensure the drain cap is tightly secured. Do not overfill the water tank beyond the MAX line.
