OPERATING INSTRUCTIONS

1. Powering On and Extended Playtime

The Elite Strap features a built-in battery pack designed to extend your Meta Quest 3/3S playtime by up to 2 additional hours. The strap's battery is utilized first, before the headset's internal battery. You can monitor the battery levels of both the headset and the Elite Strap separately within the headset's interface.

This allows for convenient recharging of both devices at once. The Elite Strap with Battery is also compatible with the Meta official charging dock, which can charge both the strap and the headset concurrently.

MAINTENANCE

Cleaning

To maintain the longevity and hygiene of your Elite Strap, regularly wipe down the surfaces with a soft, dry, or slightly damp cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the materials. Ensure the strap is completely dry before storage or next use.

Storage

Store the Elite Strap in a cool, dry place away from direct sunlight and extreme temperatures. When not in use, it is recommended to store the strap attached to your Meta Quest headset or in a compatible carrying case to protect it from dust and physical damage.

TROUBLESHOOTING

Battery Not Charging

- **Check Connections:** Ensure the charging cable is securely connected to both the Elite Strap and the power source.
- **Verify Power Source:** Confirm that the power adapter and outlet are functioning correctly.
- **Inspect Cable:** Examine the charging cable for any signs of damage. Try using a different compatible USB-C charging cable if available.
- **Status Indicator:** If the status LED lights up briefly and then turns off, it may indicate an issue with the charging circuit or battery.
- **Restart Headset:** Sometimes restarting the Meta Quest headset can resolve minor charging glitches.
- **Contact Support:** If the issue persists after these steps, contact Meta Support for further assistance.

Discomfort During Use

- **Adjust Dial:** Re-adjust the rear dial to ensure a snug, but not overly tight, fit.
- **Top Strap Adjustment:** Modify the position and tension of the flexible top strap to redistribute weight and alleviate pressure points.
- **Headset Position:** Ensure the Meta Quest headset is positioned correctly on your face, with the lenses centered over your eyes.
