MAINTENANCE

Cleaning

To maintain the appearance and functionality of your remote control, clean it regularly with a soft, dry cloth. For stubborn dirt, lightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid using harsh chemicals or abrasive materials, as these can damage the remote's surface or buttons.

Battery Care

If the remote control will not be used for an extended period, remove the batteries to prevent leakage, which can damage the device. Replace batteries promptly when they are depleted to ensure optimal performance.

Storage

Store the remote control in a cool, dry place away from direct sunlight and extreme temperatures to prolong its lifespan.

TROUBLESHOOTING

- **Remote Not Responding:**

  - Check if the batteries are inserted correctly with the correct polarity.
  - Replace old or depleted batteries with new AAA batteries.
  - Ensure there are no obstructions between the remote control and the Yamaha receiver.
  - Confirm you are within the effective operating range of the receiver.
