

NAD HTR 10

NAD HTR 10 Universal Learning Remote Control User Manual

Model: HTR 10

INTRODUCTION

The NAD HTR 10 is a universal learning remote control designed to manage various home entertainment devices. It features advanced capabilities such as IR learning, macro programming, punch-through volume control, and direct source access, enhancing your control over your audio/video system. This manual provides detailed instructions for setting up, operating, and maintaining your HTR 10 remote control.

KEY FEATURES

- Controls up to 5 devices, preprogrammed with NAD remote commands.
- Learning function: Capable of learning up to 220 commands from other remote controls.
- Macro operations: Programs up to 48 macros, each with as many as 64 commands, for executing complex sequences with a single button press.
- Punch-through operations: Allows easy access to commonly used functions (e.g., volume) across different devices without reselecting the active device.
- Backlit buttons: Features an adjustable time-out backlight for convenient operation in low-light conditions.
- IR signal generation: Can generate IR signals with a carrier frequency up to 500 kHz.
- Enhanced navigation: Cursor section designed with surrounding buttons for more effective navigation.
- Channel volume adjustments: Includes a dedicated button for volume adjustment of height channels, suitable for Atmos theatre designs.

REMOTE CONTROL LAYOUT

Below is an image illustrating the layout of the NAD HTR 10 Universal Learning Remote Control, highlighting its various buttons and sections.

Figure 1: Overview of the NAD HTR 10 Remote Control.

Familiarize yourself with the button layout as you proceed through the setup and operating instructions.

SETUP

1. Battery Installation

The NAD HTR 10 remote control requires batteries for operation. To install or replace batteries:

1. Locate the battery compartment cover on the back of the remote control.
2. Slide or lift the cover to open the compartment.
3. Insert new alkaline batteries, ensuring the correct polarity (+ and -) as indicated inside the compartment.
4. Replace the battery compartment cover securely.

Note: Always use fresh alkaline batteries and dispose of old batteries responsibly.

2. Device Programming (Preprogrammed Commands)

The HTR 10 is preprogrammed with NAD remote commands. To select and control a device:

1. Press one of the **DEVICE SELECTOR** buttons (AMP, TV, BLS, STB, AUX, MACRO) located at the top of the remote (refer to Figure 1).
2. Once a device button is pressed, the remote is ready to send commands for that specific device.
3. Test basic functions like power and volume to confirm the device responds.

3. Learning Function (IR Learning)

The HTR 10 can learn commands from other infrared remote controls. This allows you to consolidate multiple remotes into one.

1. Ensure both the HTR 10 and the original remote have fresh batteries.
2. Place the HTR 10 and the original remote head-to-head, approximately 1-2 inches apart, ensuring their IR emitters are aligned.
3. Enter the learning mode on the HTR 10 (refer to the full NAD HTR 10 manual for specific key sequences, as this varies by model).
4. Select the device button on the HTR 10 where you want to store the learned command (e.g., TV for television commands).
5. Press the button on the HTR 10 that you wish to program.
6. Immediately press and hold the corresponding button on the original remote until the HTR 10 indicates successful learning (e.g., an LED flash).
7. Repeat for all desired commands.
8. Exit learning mode.

Note: Some remotes use different IR frequencies or protocols that may not be compatible with the learning

function. If a command fails to learn, try repositioning the remotes or consult the full product manual.

OPERATING INSTRUCTIONS

Power Control

- **ON (Green Button):** Powers on the selected device.
- **OFF (Red Button):** Powers off the selected device.

Device Selector Buttons

Located at the top of the remote, these buttons switch the remote's control to a specific device type:

- **AMP:** Controls an amplifier or AV receiver.
- **TV:** Controls a television.
- **BLS:** Controls a Blu-ray player or similar disc player.
- **STB:** Controls a set-top box (cable/satellite).
- **AUX:** Controls an auxiliary device.
- **MACRO:** Activates programmed macro sequences.

Volume and Channel Control

- **VOL (+/-):** Adjusts the volume up or down.
- **CH (+/-):** Changes the channel up or down.
- **Mute (Speaker with X icon):** Mutes or unmutes the audio.

Menu Navigation

The central circular section is for menu navigation:

- **Directional Arrows (Up, Down, Left, Right):** Navigate through menus and options.
- **ENTER:** Confirms a selection or enters a menu.
- **MENU:** Opens or closes the device's main menu.
- **INFO:** Displays information about the current program or input.
- **AV PRESET:** Accesses audio/video presets.
- **Return (Curved arrow):** Goes back to the previous menu or screen.

Preset / Input Selection

These buttons allow direct selection of inputs or presets:

- **IN 1 - IN 9, IN 0:** Selects specific input sources (e.g., HDMI 1, HDMI 2).
- **+10:** Used for entering two-digit channel numbers or specific input numbers.
- **TEST:** Activates a test function, often for audio calibration.

Transport Controls

These buttons are typically used for controlling media playback:

- **Play (Triangle):** Starts playback.
- **Pause (Two vertical bars):** Pauses playback.

- **Stop (Square):** Stops playback.
- **Fast Forward (Double right arrow):** Fast forwards through media.
- **Rewind (Double left arrow):** Rewinds through media.
- **Skip Forward (Right arrow with vertical bar):** Skips to the next track/chapter.
- **Skip Backward (Left arrow with vertical bar):** Skips to the previous track/chapter.
- **EQ:** Accesses equalizer settings.

Channel Volume Adjustments

These buttons provide fine-tuning for specific audio channels, especially useful in surround sound setups:

- **CENT (+/-):** Adjusts the volume of the center channel.
- **SUB (+/-):** Adjusts the volume of the subwoofer channel.
- **SURR (+/-):** Adjusts the volume of the surround channels.
- **HGT (+/-):** Adjusts the volume of the height channels (for immersive audio formats like Dolby Atmos).

Macro Operations

Macros allow you to program a sequence of commands to be executed with a single button press. To use a macro:

1. Press the **MACRO** device selector button.
2. Press the specific button assigned to the desired macro.

Refer to the full NAD HTR 10 manual for detailed instructions on programming macros.

Punch-Through Operations

Punch-through allows certain commands (like volume or channel) to always control a specific device, regardless of the currently selected device. For example, you can set the volume buttons to always control your amplifier, even when the remote is set to control your TV.

Configuration of punch-through functions typically involves specific key sequences. Consult the full NAD HTR 10 manual for detailed setup instructions.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the remote control. Do not use liquid cleaners or abrasive materials.
- **Battery Replacement:** Replace batteries when the remote's performance degrades or if the backlight becomes dim. Always replace all batteries at the same time with new ones of the same type.
- **Storage:** Store the remote in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Solution
---------	-------------------

Problem	Possible Solution
Remote not responding.	Check battery installation and replace if necessary. Ensure there are no obstructions between the remote and the device's IR receiver. Verify the correct device is selected using the DEVICE SELECTOR buttons.
Learning function not working.	Ensure remotes are placed head-to-head, 1-2 inches apart. Check batteries in both remotes. Some IR signals may not be compatible; try learning a different command from the same remote.
Macro not executing correctly.	Re-program the macro, ensuring correct timing and sequence of commands. Ensure all devices involved in the macro are powered on and ready.

SPECIFICATIONS

Feature	Detail
Brand	NAD
Model Name	HTR 10
Compatible Devices	Audio/Video Receiver, Streaming Device, Television
Special Features	Pre Programmed, Universal, Universal Infrared, Learning Function, Macro Operations, Punch Through Operations, Backlit
Battery Description	Alkaline (Batteries required for operation)
Connector Type	Infrared
Color	Black
Max Number of Supported Devices	5
Parcel Dimensions	28.3 x 5.79 x 4.29 cm
Item Weight	191 g

WARRANTY AND SUPPORT

For warranty information, technical support, or further assistance with your NAD HTR 10 Universal Learning Remote Control, please refer to the documentation included with your product or visit the official NAD Electronics website. You may also contact NAD customer support directly for specific inquiries.
