SteamOne EUTAC140B

SteamOne Portable Garment Steamer

MODEL: EUTAC140B

User Instruction Manual

1. Introduction

Thank you for choosing the SteamOne Portable Garment Steamer, Model EUTAC140B. This powerful and compact steamer is designed to quickly and efficiently remove wrinkles, sanitize, and refresh a wide variety of fabrics, making it ideal for both home use and travel. With its rapid heat-up time and ergonomic design, maintaining your garments has never been easier.

2. Safety Information

Please read all safety instructions carefully before using the appliance. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always unplug the steamer from the electrical outlet immediately after use and before cleaning.
- Do not immerse the steamer in water or other liquids.
- Use only distilled or demineralized water in the water tank to prevent mineral buildup and extend the life of the appliance.
- Keep the steam head away from your body and hands during operation. Steam is hot and can cause burns.
- Do not operate the steamer with a damaged cord or plug, or if the appliance has been dropped or damaged.
- This appliance is for household use only. Do not use outdoors.
- Ensure the voltage indicated on the appliance matches your local power supply before connecting.
- Never leave the steamer unattended while it is plugged in or operating.

3. Product Overview

Familiarize yourself with the components of your SteamOne Portable Garment Steamer:

- **Steam Head:** Emits steam for wrinkle removal and sanitization.
- **Water Tank:** Removable tank for filling with water (260ml capacity).
- **Power Button/Steam Trigger:** Activates and controls steam flow.
- **Handle:** Ergonomically designed for comfortable grip.
- **Power Cord:** Connects the steamer to an electrical outlet (2m length).

The compact design of the SteamOne steamer, with dimensions of approximately 99.69mm width and 272.12mm height, features a convenient 260ml removable water tank for easy refilling.

4. Setup

Before first use, ensure all packaging materials are removed.

1. Remove the water tank from the main unit.
2. Open the water tank cap and fill the tank with distilled or demineralized water up to the 'MAX' line. Do not overfill.
3. Close the water tank cap securely and reinsert the tank into the steamer until it clicks into place.
4. Place the garment on a hanger or hold it taut.

5. Operating Instructions

Follow these steps for effective steaming:

1. Plug the power cord into a suitable electrical outlet (240V). The steamer will begin to heat up.
2. Wait approximately 30 seconds for the steamer to reach its operating temperature. The indicator light (if present) will change or turn off when ready.
3. Hold the steamer upright, ensuring the steam head is facing away from you.
4. Press and hold the steam trigger to release steam. Move the steam head slowly over the fabric, from top to bottom, allowing the steam to penetrate the fibers.
5. For stubborn wrinkles, pass the steam head over the area multiple times.
6. The steamer is suitable for all fabric types, including cotton, wool, polyester, silk, linen, and muslin. For delicate fabrics, hold the steam head slightly further away.
7. When finished, release the steam trigger and unplug the steamer.

The steamer in action, effectively removing wrinkles from a shirt with its 1400W power and 24g/min steam flow.

The versatile SteamOne steamer is effective on all fabric types, from delicate silk and linen to durable cotton and denim, ensuring safe and efficient wrinkle removal.

Sanitization Feature

The high-temperature steam produced by the SteamOne steamer can eliminate up to 99% of viruses, germs, and bacteria on fabrics, providing a hygienic refresh for your clothes and textiles.

An internal view highlighting the SteamOne technology, capable of eliminating 99% of viruses, germs, and bacteria through its powerful steam.

6. Maintenance and Cleaning

Regular maintenance ensures optimal performance and longevity of your steamer.

- **After Each Use:** Empty any remaining water from the tank. Allow the steamer to cool completely before storing.
- **Cleaning the Exterior:** Wipe the exterior of the steamer with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Descaling (Monthly or as needed):** If you notice reduced steam output or mineral residue, descaling may be necessary. Consult the manufacturer's website or contact support for specific descaling instructions, as methods can vary. Using distilled water significantly reduces the need for descaling.

7. Troubleshooting

If you encounter issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No steam or low steam output	Water tank empty; Steamer not heated up; Mineral buildup.	Refill water tank; Wait 30 seconds for heat-up; Perform descaling.
Water leaking from steam head	Overfilled water tank; Steamer not fully heated; Condensation.	Do not overfill; Wait for full heat-up; This is normal for initial use or if held horizontally.
Steamer not turning on	Not plugged in; Power outlet issue; Damaged cord/plug.	Ensure plug is fully inserted; Test outlet with another device; Do not use if damaged, contact support.

If the problem persists after trying these solutions, please contact SteamOne customer support.

8. Specifications
